Prospects For Faculty In The Arts Sciences:

Prospects for Faculty in the Arts and Sciences William G. Bowen, Julie Ann Sosa, 2014-07-14 This thought provoking study of academic job markets over the next quarter century uses rigorous analysis to project substantial excess demand for faculty starting in the 1997-2002 period. Particularly severe imbalances are projected in the humanities and social sciences. Contrary to popular impressions however these projected shortages are not caused by any unusual bunching of retirements. The authors' discussion of factors affecting the outlook for academic employment includes information on changes in the age distributions of faculties, trends in enrollment, shifts in the popularity of fields of study, changes in the faculty student ratio, and the continuing increase in the time spent by the typical graduate student in obtaining a doctorate. This work will appeal to a broad audience. It will be essential reading for those who are responsible for determining the size and character of graduate programs in universities, for aspiring academics who are looking for a sense of their job prospects for college and university faculty members and administrators who must recruit new colleagues, and for those interested in the federal role in higher education. Originally published in 1989, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. **American Higher Education**

Transformed, 1940-2005 Wilson Smith, Thomas Bender, 2008-04-11 This long-awaited sequel to Richard Hofstadter and Wilson Smith's classic anthology *American Higher Education: A Documentary History* presents one hundred and seventy-two key edited documents that record the transformation of higher education over the past sixty years. The volume includes such seminal documents as Vannevar Bush's 1945 report to President Franklin D. Roosevelt, *Science: The Endless Frontier*; the U.S. Supreme Court decisions in *Brown v. Board of Education* and *Sweezy v. New Hampshire*; and Adrienne Rich's challenging essay *Taking Women Students Seriously*. The wide variety of readings underscores responses of higher education to a memorable, often tumultuous half-century. Colleges and universities faced a transformation of their educational goals, institutional structures and curricula, and admission policies; the ethnic and economic composition of student bodies; an expanding social and gender membership in the professoriate; their growing allegiance to, and dependence on, federal and foundation financial aids; and even the definitions and defenses of academic freedom. Wilson Smith and Thomas Bender have assembled an essential reference for policymakers, administrators, and all those interested in the history and sociology of higher education. *Projecting Science and Engineering Personnel Requirements for the 1990s* United States Congress, House, Committee on Science, Space, and Technology, Subcommittee on Investigations and Oversight, 1993. **The**

Challenge to Racial Stratification Matthew Holden, Jr., 1994-01-01 The *National Political Science Review* is the official

publication of the National Conference of Black Political Scientists This series now entering its fourth volume includes significant scholarly research reflecting the diverse interests of scholars from various backgrounds who use different models approaches and methodologies The central focus is on politics and policies that advantage or disadvantage groups because of race ethnicity gender and other major variables In his introduction to this volume Matthew Holden describes the rationale for the creation of American racial stratification and boldly shows how American intellectuals have helped reinforce that stratification Several chapters discuss conflicts in contemporary views of the United States ranging from a belief in its being a free society to the historical reality of the nation s background as a slave society Other chapters address the international problem of racial stratification concentrating on Nigeria and South Africa

Affirmative Action and the University Kul B. Rai, John W. Critzer, 2000-01-01 Affirmative Action and the University is the only full length study to examine the impact of affirmative action on all higher education hiring practices Drawing on data provided by the Equal Employment Opportunity Commission and the U S Department of Education s National Center for Education Statistics the authors summarize track and evaluate changes in the gender and ethnic makeup of academic and nonacademic employees at private and public colleges and universities from the late 1970s through the mid 1990s Separate chapters assess changes in employment opportunities for white women blacks Asians Hispanics and Native Americans The authors look at the extent to which a two tier employment system exists In such a system minorities and women are more likely to make their greatest gains in non elite positions rather than in faculty and administrative positions The authors also examine differences in hiring practices between public and private colleges and universities

Academic Duty Donald Kennedy, 1997 Aware of the numerous pressures that academics face from the pursuit of open inquiry in the midst of culture wars to confusion and controversy over the ownership of ideas to the scramble for declining research funds and facilities he explores the whys and wherefores of academic misconduct be it scholarly financial or personal

The Politics of Liberal Education Darryl Gless, Barbara Herrnstein Smith, 1992 Controversy over what role the great books should play in college curricula and questions about who defines the literary canon are at the forefront of debates in higher education The Politics of Liberal Education enters this discussion with a sophisticated defense of educational reform in response to attacks by academic traditionalists The authors here themselves distinguished scholars and educators share the belief that American schools colleges and universities can do a far better job of educating the nation s increasingly diverse population and that the liberal arts must play a central role in providing students with the resources they need to meet the challenges of a rapidly changing world Within this area of consensus however the contributors display a wide range of approaches illuminating the issues from the perspectives of their particular disciplines classics education English history and philosophy among others and their individual experiences as teachers Among the topics they discuss are canon formation in the ancient world the idea of a common culture and the educational implications of such social movements as feminism technological changes including computers and television and

intellectual developments such as theory Readers interested in the controversies over American education will find this volume an informed alternative to sensationalized treatments of these issues Contributors Stanley Fish Phyllis Franklin Henry Louis Gates Jr Henry A Giroux Darryl J Gless Gerald Graff Barbara Herrnstein Smith George A Kennedy Bruce Kuklick Richard A Lanham Elizabeth Kamarck Minnich Alexander Nehamas Mary Louise Pratt Richard Rorty Eve Kosofsky Sedgwick

Changing the Game Nancy Weiss Malkiel, 2023-11-14 How a visionary university and foundation president tackled some of the thorniest problems facing higher education As provost and then president of Princeton University William G Bowen 1933-2016 took on the biggest and most complex challenges confronting higher education cost disease inclusion affirmative action college access and college completion Later as president of the Andrew W Mellon Foundation he took his vision for higher education and the strategies for accomplishing that vision to a larger arena Along the way he wrote a series of influential books including the widely read *The Shape of the River* coauthored with Derek Bok which documented the success of policies designed to increase racial diversity at elite institutions In *Changing the Game* drawing on deep archival research and hundreds of interviews Nancy Weiss Malkiel argues that Bowen was the most consequential higher education leader of his generation Bowen who became Princeton's president in 1972 at the age of 38 worked to shore up the university's financial stability implement coeducation and create a more inclusive institution Breaking through the traditional Ivy League demographics of white Protestant and male he embraced equal access in admissions for women and men and actively sought to enroll Black Hispanic and Asian American students To increase the intellectual muscle of the faculty he used targeted recruiting and enforced higher scholarly standards In 1988 Bowen moved on to Mellon where among many other accomplishments he developed digital research tools most notably JSTOR and promoted racial diversity through the Mellon Mays Undergraduate Fellowship Attacking problems with tenacity insight and deep knowledge Bowen showed the world of higher education how a visionary leader can transform an institution **Minutes of the Meeting** Association of Research Libraries, 1991 V 52 includes the proceedings of the conference on the Farmington Plan 1959 Notices of the American Mathematical Society American Mathematical Society, 1990
