Prostate Specific Antigen:

The Prostate-specific Antigen (PSA) Test ., 2007 The Great Prostate Hoax Richard J. Ablin, Ronald Piana, 2014-03-04
Reveals how fear based and inaccurate testing is resulting in unnecessary high risk surgeries arguing that the PSA test was never intended for prostate cancer screening Facts about the Prostate Specific Antigen (PSA) Blood Test and Prostate Cancer Louisiana State University Health Sciences Center, 2006* *Informed Decision Making About Prostate-Specific Antigen (PSA) Testing: Findings and Implications from Formative Testing of a Multimodal Intervention* Cindy S. Soloe, Lauren A. McCormack, Katherine Treiman, David Driscoll, Shelly Harris, 2009-02-01 We created the You Decide multimodal intervention to provide men with the information skills and reinforcement needed to engage in informed decision making IDM related to prostate cancer screening We developed intervention materials based on three rounds of formative research conducted with 145 members of the intended recipient audience through 10 focus groups and more than 50 individual in depth interviews This report documents key findings from our formative research that may apply to the development of other IDM interventions especially those related to prostate cancer Our findings underscored 1 the difficulty of promoting IDM for cancer screening given people s high affinity for such screenings and 2 the challenge of graphically communicating risk related tradeoffs We found that pretest participants had a preference for full story narratives conveying personal experiences and interpersonal learning opportunities Our formative research findings also supported the need to use plain language to address a range of health literacy levels We describe our efforts to apply these formative research findings in our final intervention materials and discuss implications for future intervention research Our findings underscore the importance of involving the intended audience in the process of developing intervention materials **The Prostate-specific Antigen (PSA) Test** , 2007 **Prostate Specific Antigen and Prostate Cancer** Sudhir Isharwal, Zhou Wang, 2011 Prostate cancer PCa is a disease with high incidence and prevalence Early detection of PCa has been an area for research to decrease its morbidity and mortality The discovery of prostate specific antigen PSA revolutionised screening of PCa which was largely dependent on detection of prostatic acid phosphatase and digital rectal examination Several leading organisations and cancer societies based on present evidence have published their recommendations for its use in detection and monitoring of PCa There has been difference in opinions on its appropriate threshold value to recommend prostate biopsy and benefits on health outcomes due to its use in screening This book presents and discusses current research in the study of PCa and its role in the screening of prostate cancer *Prostate-Specific Antigen (PSA Test)* , 2007 **Prostate Specific Antigen** Michael K. Brawer, Roger S. Kirby, Claus G. Roehrborn, 1999-01-01 The development of serum based assays for the measurement of prostate specific antigen has revolutionized the approach to the management of prostate cancer This advance has however been clouded by concerns about the overdetected of incidental carcinoma with little malignant potential This text discusses the issues highlighted by research into PSA and outlines recommendations for the diagnosis and

management of prostatic disease in Europe the USA and elsewhere **The Oncogenomics Handbook** William J. LaRochelle, Richard A. Shimkets, 2007-11-09 An integrated overview of cancer drug discovery and development from the bench to the clinic showing with broad strokes and representative examples the drug development process as a network of linked components leading from the discovered target to the ultimate therapeutic product Following a systems biology approach the authors explain genomic databases and how to discover oncological targets from them how then to advance from the gene and transcript to the level of protein biochemistry how next to move from the chemical realm to that of the living cell and ultimately pursue animal modeling and clinical development Emerging cancer therapeutics including Rituxan Erbitux Gleevec Herceptin Avastin ABX EGF Velcade Kepivance Iressa Tarceva and Zevalin are addressed Highlights include cancer genomics pharmacogenomics transcriptomics gene expression analysis proteomic and enzymatic cancer profiling technologies and cellular and animal approaches to cancer target validation *Prostate Specific Antigen (PSA) for Prostate Cancer Screening* Lesley Deanne Dunfield, 2007
