The Politics of Sub-National Authoritarianism in Russia Cameron Ross, 2016-02-24 By the end of the 2000s Russia had become an increasingly authoritarian state which was characterised by the following features outrageously unfair and fraudulent elections the existence of weak and impotent political parties a heavily censored often self censored media weak rubber stamping legislatures at the national and sub national levels politically subordinated courts the arbitrary use of the economic powers of the state and widespread corruption However this picture would be incomplete without taking into account the sub national dimension of these subversive institutions and practices across the regions of the Russian Federation After the collapse of the Soviet Union sub national political developments in Russia became highly diversified and the political map of Russia's regions became multi faceted The period of 2000s demonstrated a drive on the part of the Kremlin to re centralise politics and governance to the demise of newly emerging democratic institutions at both the national and sub national levels Yet federalism and regionalism remain key elements of the research agenda in Russian politics and the overall political map of Russia's regions is far from being monotonic Rather it is similar to a complex multi piece puzzle which can only be put together through skilful crafting The 12 chapters in this collection are oriented towards the generation of more theoretically and empirically solid inferences and provide critical evaluations of the multiple deficiencies in Russia's sub national authoritarianism including principal agent problems in the relations between the layers of the power vertical unresolved issues of regime legitimacy that have resulted from manipulative electoral practices and the inefficient performance of regional and local governments The volume brings together a team of international experts on Russian regional politics which includes top scholars from Britain Canada Russia and the USA Youth in Putin's Russia Elena Omelchenko, 2021-12-02 This edited volume sheds light on the lives of young people in various central and peripheral regions of Russia including youth belonging to different ethnic and religious groups and who have differing views on contemporary politics While the literature continues to grow regarding the inclusion of youth in global contexts the specific cultural political and economic circumstances of being young in Russia make the Russian case unique Chapter authors focus on four key aspects that characterize the youth experience in contemporary Russia cultural practices and value affiliations citizenship and patriotism ethnic and religious diversity and the labor market This collection will appeal to readers interested in contemporary life in Russia and looking for the latest empirical material on youth identities and cultures as well as those looking to learn about the critical viewpoint of local academics regarding the ongoing processes in contemporary Russian society **Russia's Far North** Veli-Pekka Tynkkynen, Shinichiro Tabata, Daria Gritsenko, Masanori Goto, 2018-03-09 The Russian Far North is immensely rich in resources both energy and other resources and is also one of the least developed regions of Russia This book presents a comprehensive overview of the region It examines resource issues and the related environmental problems considers the Arctic and the problems of sea routes maritime boundaries and military build up

assesses economic development and considers the ethnic peoples of the region and also cultural and artistic subjects Overall the book provides a rich appraisal of how the region is likely to develop in future **Russian "Hybrid Warfare"** Ofer Fridman, 2018-08-01 During the last decade Hybrid Warfare has become a novel yet controversial term in academic political and professional military lexicons intended to suggest some sort of mix between different military and non military means and methods of confrontation Enthusiastic discussion of the notion has been undermined by conceptual vagueness and political manipulation particularly since the onset of the Ukrainian Crisis in early 2014 as ideas about Hybrid Warfare engulf Russia and the West especially in the media Western defense and political specialists analyzing Russian responses to the crisis have been quick to confirm that Hybrid Warfare is the Kremlin's main strategy in the twenty first century But many respected Russian strategists and political observers contend that it is the West that has been waging Hybrid War Gibrinaya Voyna since the end of the Cold War In this highly topical book Ofer Fridman offers a clear delineation of the conceptual debates about Hybrid Warfare What leads Russian experts to say that the West is conducting a Gibrinaya Voyna against Russia and what do they mean by it Why do Western observers claim that the Kremlin engages in Hybrid Warfare And beyond terminology is this something genuinely new *Russian Foreign Policy* Jeffrey Mankoff, 2011-09-22 Introduction the guns of August Contours of Russian foreign policy Bulldogs fighting under the rug the making of Russian foreign policy Resetting expectations Russia and the United States Europe between integration and confrontation Rising China and Russia's Asian vector Playing with home field advantage Russia and its post Soviet neighbors Conclusion dealing with Russia's foreign policy reawakening
