Constructing Human Rights in the Age of Globalization Mahmood Monshipouri, Neil Englehart, Andrew J. Nathan, Kavita Philip, 2015-06-01 Both human rights and globalization are powerful ideas and processes capable of transforming the world in profound ways Notwithstanding their universal claims however the processes are constructed and they draw their power from the specific cultural and political contexts in which they are constructed Far from bringing about a harmonious cosmopolitan order they have stimulated conflict and opposition In the context of globalization as the idea of human rights has become universal its meaning has become one more terrain of struggle among groups with their own interests and goals Part I of this volume looks at political and cultural struggles to control the human rights regime that is the power to construct the universal claims that will prevail in a territory with respect to property the state the environment and women Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran China and Hong Kong Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise

Cultural Analysis Aaron Wildavsky, 2018-02-06 As a result of a lifetime of incomparably wide ranging investigations Aaron Wildavsky concluded that politics in the United States and elsewhere was a patterned activity exhibiting recurring regularities Political

values beliefs and institutions were neither endlessly varied nor haphazardly organized They tended to exhibit a limited range of variation and were organized in discoverable predictable ways In Cultural Analysis the fourth collection of his essays posthumously published by Transaction Wildavsky argues that American politics public law and public administration are the contested terrain of rival inescapable political cultures Analysts of American politics distinguish liberals from conservatives and Democrats from Republicans but do not explain how these categories of political allegiance develop maintain themselves or change Wildavsky offers a cultural functional explanation for ideological and partisan coherence and realignment Wildavsky also felt that these dualisms did not adequately capture the ideological and partisan variation he observed on the political landscape Like others he detected another recurring strain of political allegiance that of classical liberalism or libertarianism People of this political stripe valued freedom more than equality the primary political value of contemporary liberals and also more than order the primary political value of conservatives The value of Wildavsky s reconceptualization of the ideological and social foundations of political conflict compromise and coalition is assessed here by Wildavsky s former colleagues and students at the University of California Berkeley Dennis Coyle Richard Ellis Robert Kagan Austin Ranney and Brendon Swedlow

Culture and Consensus in European Varieties of Capitalism I.
