Protein Solvent Interactions:

Protein-Solvent Interactions Roger Gregory, 1995-01-04 This work covers advances in the interactions of proteins with their solvent environment and provides fundamental physical information useful for the application of proteins in biotechnology and industrial processes It discusses in detail structure dynamic and thermodynamic aspects of protein hydration as well as proteins in aqueous and organic solvents as they relate to protein function stability and folding

Effect of Solute-solvent Interactions on Protein Stability and Ligand Binding Ikbac Son, 2017 **Computational and Experimental Characterization of Proteins With Respect to Protein-Solvent Interactions** Sven Matthias Amrhein, 2016 *Enzymes in Nonaqueous Solvents* Evgeny N. Vulfson, 2008-02-05 Enzymatic catalysis has gained considerable attention in recent years as an efficient tool in the preparation of natural products pharmaceuticals fine chemicals and food ingredients The high selectivity and mild reaction conditions associated with enzymatic transformations have made this approach an attractive alternative in the synthesis of complex bioactive compounds which are often difficult to obtain by standard chemical routes However the majority of organic compounds are not very soluble in water which was traditionally perceived as the only suitable reaction medium for the application of biocatalysts The realization that most enzymes can function perfectly well under nearly anhydrous conditions and in addition display a number of useful properties e.g. highly enhanced stability and different selectivity has dramatically widened the scope of their application to the organic synthesis Another great attraction of using organic solvents rather than water as a reaction solvent is the ability to perform synthetic transformations with relatively inexpensive hydrolytic enzymes It is worth reminding the reader that in vivo the synthetic and hydrolytic pathways are catalyzed by different enzymes However elimination of water from the reaction mixture enables the reversal of hydrolytic enzymes and thus avoids the use of the expensive cofactors or activated substrates that are required for their synthetic counterparts *Non-covalent Interactions In Proteins* Andrey Karshikoff, 2006-11-23 Although textbooks on the physics of condensed matter consider non covalent interactions in detail their application for analysis of protein properties is often poorly presented or omitted On the other hand books on biochemistry molecular modeling or molecular simulation introduce these interactions in the context of the corresponding topic which sometimes results in superficial explanations of their nature This book succeeds in uniting comprehensive considerations of non covalent interactions with the specificity of their application in protein sciences The ideal aid for students of physics or chemistry with interests in biology and biophysics the book can also be useful for students of biology biochemistry or biomedicine who want to extend their knowledge of how protein properties are described at the molecular level *Protein-solvent Interactions and Classical Density Functional Theory* Eric A. Mills, 2015 **Intrinsically Disordered Proteins**, 2018-11-21 Intrinsically Disordered Proteins Volume 611 the latest release in the Methods in Enzymology series highlights new advances in the field with this new volume presenting interesting chapters on topics of interest including the Characterization of Structure

Interaction of Food Macromolecules

Ibrahim Khalifa,Zou Xiaobo,Soottawat Benjakul,2025-10-06 Interaction of Food Macromolecules The Matrix of Future Foods provides a detailed understanding on why biological macromolecules i e proteins lipids and carbohydrates with ligands interactions are essential to understanding biology at the molecular level The book aims to create a multidisciplinary forum of discussion on the interaction between macromolecules and ligands providing an understanding on how biological macromolecules with ligands interactions are central to facilitating the discovery design and development of future functional foods In addition it outlines information available on the macromolecules ligands interaction that happens inside the food matrixes and inside our bodies Knowing about the mechanisms responsible for the macromolecules ligands recognition and binding facilitates the discovery design and development of future and functional foods Discusses how the interaction between macromolecules and ligands facilitates the discovery design and development of future functional foods Shows how macromolecules can affect foods stability functionality physicochemical behaviors and bioavailability Outlines how binding models such as lock and key induced fit and conformational selection of macromolecule ligands affect the overall properties of food and foodstuffs Biological Fluid-Surface Interactions in Detection and Medical Devices Michael Thompson,Christophe Blaszykowski,Sonia Sheikh,Cesar Rodriguez-Emmenegger,Andres de los Santos Pereira,2017 This book examines the interactions between implants and biological fluids that cause fouling in biosensors and the serious issue of thrombus formation suitable for professional researchers in academia and industry and postgraduate students
