Protest Businesses Mobilising Campaign:

The Protest Business? Grant Jordan, William A. Maloney, 1997-06-15 This study's main concern is to examine why people chose to join campaigning groups such as Friends of the Earth or Amnesty in preference to political parties Particular emphasis is given to environmental campaign groups

Insiders versus Outsiders Andreas Dür, Gemma Mateo, 2016-07-07 What explains differences in the lobbying behaviour of interest groups And what consequences do these differences have for the access that interest groups can gain to decision makers and the influence that they can exert on policy outcomes Building on an unprecedented amount of empirical evidence on lobbying in Europe this book puts forward a distinction between lobbying insiders and lobbying outsiders Lobbying insiders most prominently business interests try to establish direct contacts with decision makers enjoy good access to executive institutions and manage to shape policy outcomes when mobilizing the public on an issue is difficult Lobbying outsiders in particular citizen groups such as consumer environmental or health non governmental organizations put greater emphasis on mobilizing the public or changing public attitudes find it easier to gain access to legislative decision makers and have the greatest impact on outcomes on issues that are amenable to an outside lobbying campaign The book shows that a single argument building on group type as the main variable can explain variation across interest groups in their choice of strategy their access to decision makers and the conditions under which they can exert influence The existence of lobbying insiders and lobbying outsiders has important implications for both our understanding of political decision making and the normative appraisal of contemporary democracy

Radical Space Debra Benita Shaw, Maggie Humm, 2016-03-24 The spatial turn in the Humanities and Social Sciences has produced a considerable body of work which reassesses space beyond the fixed Cartesian coordinates of Modernity and the nation state In the process space has been revealed as a productively contested concept with methodological implications across and between disciplines The resulting understandings of space as fluid changeable and responsive to the situation of bodies both human and non human has prepared the ground for radical concepts and uses of space with implications for how we conceive of contemporary lived reality Rather than conceiving of bodies as constantly rendered docile within the spaces of the post industrial nation state Radical Space reveals how activists and artists have deployed these theoretical tools to examine and contest spatial practice Bringing together contributions from academics across the humanities and social sciences together with creative artists this dynamically multidisciplinary collection demonstrates this radicalization of space through explorations of environmental camps new explorations of psychogeography creative interventions in city space and mapping the extra terrestrial onto the mundane spaces of everyday existence

The Nonprofit Sector Walter W Powell, Patricia Bromley, 2023-05-25 Timely unique and definitive not only chronicles the history of the nonprofit sector but also provides a broad but critical analysis of its current state Vartan Gregorian President Carnegie Corporation of New York The nonprofit sector has changed in fundamental ways in recent decades As the sector has grown in scope and size both domestically and

internationally the boundaries between for profit governmental and charitable organizations have become intertwined Nonprofits are increasingly challenged on their roles in mitigating or exacerbating inequality And debates flare over the role of voluntary organizations in democratic and autocratic societies alike The Nonprofit Sector takes up these concerns and offers a cutting edge empirical and theoretical assessment of the state of the field This book now in its third edition brings together leading researchers economists historians philosophers political scientists and sociologists along with scholars from communication education law management and policy schools to investigate the impact of associational life Chapters consider the history of the nonprofit sector and of philanthropy the politics of the public sphere governance mission and engagement access and inclusion and global perspectives on nonprofit organizations Across this comprehensive range of topics The Nonprofit Sector makes an essential contribution to the study of civil society Praise for previous editions Takes a decidedly multidisciplinary approach invaluable Journal of Policy Analysis and Management A major contribution to the field Social Forces

Environmental Pressure Groups in Transition Peter Rawcliffe, 1998 Presents a detailed study of the changing nature of environmental pressure groups since the 1980s The book concentrates on the most important national campaigning groups through which environmental pressure has been channelled in Britain

The End Of Globalization Alan Rugman, 2012-09-30 Professor Alan Rugman is one of the world's leading academics in the field of international business and strategy In The End of Globalization he argues that we are currently witnessing the end of globalization and draws on new research and analysis to argue that globalization never really happened anyway Like Bartlett and Ghoshal's Managing Across Borders this book is aimed at the market of practitioners and policy makers not academics and theoreticians showing them what the current state of the global economy means for them Global business is dominated by the 500 largest multinational enterprises MNEs out of a total of 30 000 MNEs altogether The 500 MNEs that are the engines of international business think regional and act local Using analysis drawn from world leading companies Professor Rugman looks in detail at the managerial implications of the end of globalization including in depth discussion of corporate strategies organizational structures and analytical methods

Generations, Political Participation and Social Change in Western Europe Maria Grasso,2016-03-31 This new comparative analysis shows that there are reasons to be concerned about the future of democratic politics Younger generations have become disengaged from the political process The evidence presented in this comprehensive study shows that they are not just less likely than older generations to engage in institutional political activism such as voting and party membership they are also less likely to engage in extra institutional protest activism Generations Political Participation and Social Change in Western Europe offers a rigorously researched empirical analysis of political participation trends across generations in Western Europe It examines the way in which the political behaviour of younger generations leads to social change Are younger generations completely disengaged from politics or do they simply choose to participate in a different way to previous generations The book is of key interest to scholars students and practitioners of political sociology political participation and behaviour European Politics Comparative Politics and Sociology
