Protocol Specification, Testing, and Verification, VI Concordia University, Université de Montréal, 1987 *Protocol Specification, Testing and Verification XV* Piotr Dembinski, Marek Sredniawa, 2016-01-09 This volume presents the latest research worldwide on communications protocols emphasizing specification and compliance testing It presents the complete proceedings of the fifteenth meeting on Protocol Specification Testing and Verification arranged by the International Federation for Information Processing **Protocol Specification, Testing, and Verification, VII** IFIP Working Group 6.1, 1987 Protocol Specification, Testing and Verification, XII R.J. Linn, M.Ü. Uyar, 2016-09-20 For more than a decade researchers and engineers have been addressing the problem of the application of formal description techniques to protocol specification implementation testing and verification This book identifies the many successes that have been achieved within the industrial framework and the difficulties encountered in applying theoretical methods to practical situations Issues discussed include testing and certification verification validation environments and automated tools formal specifications protocol conversion implementation specification languages and models Consideration is also given to the concerns surrounding education available to students and the need to upgrade and develop this through sponsorship of a study of an appropriate curriculum at both undergraduate and graduate levels It is hoped this publication will stimulate such support and inspire further research in this important arena **Protocol Test Systems VIII** Ana Cavalli, Stan Budkowski, 2013-03-09 IWPTS 95 International Workshop on Protocol Test Systems is being held this year at NT Institut National des Telecommunications Evry France from 4 to 6 September 1995 IWPTS 95 is the eighth of a series of annual meetings sponsored by the IFIP Working Group WG6 1 dedicated to Architecture and Protocols for Computer Networks The seven previous workshops were held in Vancouver Canada 1988 Berlin Germany 1989 Mclean USA 1990 Leidschendam The Netherlands 1991 Montreal Canada 1992 Pau France 1993 and Tokyo Japan 1994 The workshop is a meeting place where both research and industry theory and practice come together By bringing both researchers and practitioners together IWPTS opens up the communication between these groups This helps keep the research vital and improves the state of the practitioner s art Forty eight papers have been submitted to IWPTS 95 and all of them have been reviewed by the members of the Program Committee and additional reviewers The completed reviewers list is included in this Proceedings Based on these reviews the Program Committee selected 26 for oral presentation and 4 to be presented as posters Two specially invited papers complete the Workshop Program which is composed of ten sessions Testing Methods Session 1 Test Environments Session 2 Theoretical Framework Session 3 Algorithms and Languages Session 4 Test Generation 1 Session 5 Testability Session 6 Test Generation 2 Session 7 Industrial Applications Session 8 Distributed Testing and performance Session 9 and Test Management Session 10 **Protocol Specification, Testing, and Verification, XI** Bengt Jonsson, Joachim Parrow, Björn Pehrson, 1991 This book contains original contributions on theory applications and experiences

from the use of advanced techniques applied to distributed systems The emphasis is on services and protocols Specific areas addressed include Specification languages and models Formal specification Testing and certification Implementation and Environments and automated tools In addition to these more traditional topics contributions are included on bull Specification testing and verification of real time properties bull Novel methods for formal specification of realistic services bull Automated and semi automated analysis of non finite state systems bull Design and implementation by stepwise refinement and bull Applications of the above to new generations of high speed networks multi media services and distributed environments for computer supported cooperative work

Communication Protocol Specification and Verification Richard Lai, Ajin Jirachiefpattana, 2012-12-06 Communication protocols are rules whereby meaningful communication can be exchanged between different communicating entities In general they are complex and difficult to design and implement Specifications of communication protocols written in a natural language e g English can be unclear or ambiguous and may be subject to different interpretations As a result independent implementations of the same protocol may be incompatible In addition the complexity of protocols make them very hard to analyze in an informal way There is therefore a need for precise and unambiguous specification using some formal languages Many protocol implementations used in the field have almost suffered from failures such as deadlocks When the conditions in which the protocols work correctly have been changed there has been no general method available for determining how they will work under the new conditions It is necessary for protocol designers to have techniques and tools to detect errors in the early phase of design because the later in the process that a fault is discovered the greater the cost of rectifying it Protocol verification is a process of checking whether the interactions of protocol entities according to the protocol specification do indeed satisfy certain properties or conditions which may be either general e g absence of deadlock or specific to the particular protocol system directly derived from the specification In the 80s an ISO International Organization for Standardization working group began a programme of work to develop formal languages which were suitable for Open Systems Interconnection OSI This group called such languages Formal Description Techniques FDTs Some of the objectives of ISO in developing FDTs were enabling unambiguous clear and precise descriptions of OSI protocol standards to be written and allowing such specifications to be verified for correctness There are two FDTs standardized by ISO LOTOS and Estelle Communication Protocol Specification and Verification is written to address the two issues discussed above the needs to specify a protocol using an FDT and to verify its correctness in order to uncover specification errors in the early stage of a protocol development process The readership primarily consists of advanced undergraduate students postgraduate students communication software developers telecommunication engineers EDP managers researchers and software engineers It is intended as an advanced undergraduate or postgraduate textbook and a reference for communication protocol professionals
