Prr Ethnic Conflicts In The Former Ussr:

Ethnicity and Territory in the Former Soviet Union Dr James Hughes, Gwendolyn Sasse, 2014-09-25 The collapse of the Soviet empire in 1991 removed a decades long system of successful control of potential ethnic and regional conflict The result was the eruption of numerous conflicts over state building some of which degenerated into violence and some of which were resolved or prevented by strategies of accommodation This volume explores the common trends and differences in the responses of the new post Soviet states to the problems of state building in ethnically and regionally divided societies focusing on the impact of ethnic and regional conflicts on post communist transition and institutional development The book will be essential reading for specialists and students alike who are interested in conflict regulation and post Soviet politics

Ethnic Conflict in the Post-Soviet World L. M. Drobizheva, 1998 A collection of essays on ethnic conflict in the region most of which do not support the notion that conflicts in Central Europe and the NIS are ethnically based or that ethnicity provides the key to their outbreak or resolution but rather social political and economic conflicts are spawned by imperial collapse and far reaching socioeconomic crises Underlying themes include the motivating power of claims to equality and human dignity and the struggle for control over political and economic resources Annotation copyright by Book News Inc Portland OR

National Integration and Violent Conflict in Post-Soviet Societies Pål Kolstø, 2002 The theory presented in this work s predecessor Nation Building and Ethnic Integration in Post Soviet Societies An Investigation of Latvia and Kazakhstan 1999 fails to explain why the Dniester war of 1992 broke out in Moldova while Estonia remained free of large scale violence Kolsto Russian and East European area studies U of Oslo Norway presents six contributions that revisit the question of when ethnic strife is likely to break out after the removal of authoritarian government After reviewing candidates for explanatory theories four country studies explore the evidence and one contribution discusses the international setting The final chapter compares theory to evidence and concludes that theories of resources and opportunities available to various groups are better predictors of violence than theories of grievances and relative discriminations Annotation copyrighted by Book News Inc
