Psyche And Eros Mind And Gender In The Life Course:

Psyche and Eros Gisela Labouvie-Vief, 1994-08-26 In *Psyche and Eros* Gisela Labouvie Vief describes historical and current concepts of mind and development drawing from disciplines as diverse as philosophy mythology religion literature and psychology She then presents a powerful theory of the maturing of mind which brings together her empirical work and her exploration into mythology The classical Greek myth of the gods Psyche and Eros serves as an evocative illustration of the author's theory Psyche and Eros asserts that the core experience of development differs along gender lines Rationality is regarded as masculine while imagination is viewed as feminine Competition between masculine and feminine parts of the mind has limited our ability to describe the mind and its development over the life course The author suggests that we overcome the dualistic way of thinking about mind and see how rationality and imagination can complement each other

Psyche and Eros Gisela Labouvie-Vief, 1994-08-26 This 1994 book asserts that the experience of development differs along gender lines **Integrating Emotions and Cognition Throughout the Lifespan** Gisela Labouvie-Vief, 2015-01-07 This book synthesizes the literature on emotional development and cognition across the lifespan The book proposes a core language by which to describe positive and problematic developmental changes by recourse to a parsimonious set of core principles such as elevations or declines in tension thresholds and their relation to the waxing and waning of the cognitive system over the life course It integrates similarly the lifelong consequences of the positive or damaging aspects of the social milieu in fostering increases in tension thresholds with their advanced capacity for maintaining equilibrium and warding off stress versus a lowering of tension thresholds with disturbances of equilibrium maintenance and heightened susceptibility to stress and deregulation **The Cambridge Companion to Jung** Polly Young-Eisendrath, Terence Dawson, 1997-05-28

Essays by an international team of Jungian analysts form a critical introduction to Jung and analytical psychology **The ^AOxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood** Paul Verhaeghen, Christopher Hertzog, 2016-03-09 The Oxford Handbook of Emotion Social Cognition and Problem Solving in Adulthood provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socioemotional development social cognition emotion coping and everyday problem solving **Cerebellum and Cerebrum in Homeostatic Control and Cognition** Eric Parkins, 2021-11-22 Cerebellum and Cerebrum in Homeostatic Control and Cognition presents a ground breaking hybrid brain psychology proposing that the cerebellum and cerebrum operate in a complementary manner as equal cognitive partners in learning based control The book synthesises contemporary neuroscience and psychology in terms of their common underlying control principle homeostasis Drawing on research and theory from neuroscience psychology AI and robotics it provides a hybrid control systems interpretation of consciousness and self unconscious mind REM dream sleep emotion self monitoring and self control memory infantile amnesia and cognitive development This is used to investigate different elements of cerebellum cerebrum offline interaction

including attention and working memory and explores cerebellar and cerebral contributions to various aspects of a number of disorders including ADHD ASD and schizophrenia Presenting original ideas around neuropsychological architecture the book will be of great interest to academics researchers and post graduate students in the fields of neuropsychology cognitive psychology neuroscience and clinical psychology *Subject to Change* Polly Young-Eisendrath,2012-12-06 What can psychotherapy and psychoanalysis teach us about turning human misery into insight and personal freedom Polly Young-Eisendrath offers a response that opens new vistas in our understanding of ourselves within the complexity of a postmodern world *Subject to Change* is a collection of essays spanning a twenty year period of theorising and practice of a highly regarded senior Jungian analyst The diverse ideas and perspectives discussed in the essays deal with the big issues surrounding how Jungian analysts and psychoanalysts understand their profession and what it teaches us about our subject lives The book is divided into four clear and informative sections Subjectivity and uncertainty Gender and desire Transference and transformation Transcendence and subjectivity The classic essays presented in this book will have significant appeal to all those concerned with Jungian analysis psychotherapy psychoanalysis gender development and the interface between psychotherapy and spirituality **The Psychological Development of Girls and Women** Sheila Greene,2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers *The Psychological Development of Girls and Women* will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women's studies **Social Cognition and Aging** Thomas M. Hess,Fredda Blanchard-Fields,1999-06-18 Most of the research done in social cognition has been conducted with younger adults and may not be applicable to a much older population *Social Cognition and Aging* provides a snapshot view of research that has been done with older adults or is directly applicable to this population Focusing on issues of self identity social interactions and social perceptions this book provides a broad overview of how aging affects one's own perceptions and actions as well as how others perceive and interact with the aged Coverage includes such topics as self control memory resilience age stereotypes moral development

and the art of living With contributions from top researchers in both gerontology and psychology this book is an important reference for academics and professionals alike in personality cognition social psychology adult development sociology and gerontology **Handbook of Research on Knowledge-Intensive Organizations** Jemielniak, Dariusz,Kociatkiewicz, Jerzy,2009-03-31 Provides an international collection of studies on knowledge intensive organizations with insight into organizational realities as varied as universities consulting agencies corporations and high tech start ups
