Philip Hilmar Person

Psychiatric Hospital:

State Mental Hospitals Paul Ahmed, 2012-12-06 The 1970s constitute the decade of decisions about state mental hospitals. These large monolithic and seemingly impervious institutions are being phased out in some states and their basic purpose for existence is being seriously questioned in almost all others. Since 1970 hospitals have closed in California, Illinois, Kentucky, Massachusetts, Minnesota, New York, Oklahoma, Washington, and Wisconsin. Similar closings have occurred in several provinces of Canada, in Great Britain, and in some European countries. The purpose of the book is to examine the multiple issues growing out of the hospital closings: Why are the state hospitals being closed? What is the impact of closings on patients, hospital staff, and the communities where the hospitals are located? What has been the impact on the communities receiving these patients? What are the trends for the future in terms of numbers of closings and types of hospitals which will remain? Is there a role for the state hospital in the care of the mentally ill, or is it an obsolete institution? The impetus for the closings is diverse. The discovery and wide spread use of the tranquilizing drugs in the early 1950s allowed more patients to be returned to the community under medication.

The Eclipse of the State Mental Hospital George W. Dowdall, 1996-04-11 State hospitals still account for the majority of the state dollars spent on mental health care across the nation. Why do state hospitals persist and expand despite public scandal and professional disapproval? What role does the state mental hospital play in the current system of care for the seriously mentally ill? What role should it play and at what cost? Dowdall explores recent efforts, successful and unsuccessful, to meet the increasingly elaborate standards imposed from without on the contemporary state mental hospital and the impact of these efforts on the quality of care provided to its patients.
