Radical Responses to Radical Regimes Barry R. Schneider, 1995

Radical Responses to Radical Regimes: Evaluating Preemptive Counter-Proliferation Barry Schneider, National University, 2012-07-06 On December 7 1993 Secretary of Defense Les Aspin announced that the United States was adding a military dimension to its fight to prevent the spread of weapons of mass destruction WMD The new program called the Counter Proliferation Initiative CPI provides funding to prepare for combating foes with nuclear biological and chemical NBC and missile weapons on future battlefields improves monitoring for locating rival NBC missile programs improves theater defenses and develops weapons capable of penetrating and destroying underground facilities US efforts will include a diplomatic offensive to persuade US allies to take similar counter proliferation steps The central thrust of the CPI is to prepare US and allied forces for dealing with future enemies on the battlefield who are armed with weapons of mass destruction An important secondary thrust of the CPI is to provide the Commander in Chief with the tools to disarm an adversary unilaterally if necessary before the adversary can initiate the use of WMD in situations where we are on a collision course with such an enemy and no alternative course seems feasible Numerous preemptive counter proliferation strikes have taken place since 1940 Allied air forces and special operations forces destroyed German nuclear facilities and heavy water supplies that were an integral part of the Nazi A bomb research effort US bombers also destroyed the most important Japanese nuclear research laboratory in Tokyo at the end of WWII Other raids include Iran versus Iraq in 1980 Israel versus Iraq in 1981 Iraq versus Iran with seven raids from 1984 to 1988 and the US led coalition versus Iraq in 1991 When deciding whether or not to use military action to remove a WMD capacity from a rival state it is important that decision makers address a number of key questions and ensure that answers to each are positive before making PCP decisions Is the enemy undeterrable violent and a risk taker Is the enemy on the WMD threshold or beyond it Are vital US interests threatened Are key enemy targets precisely located and vulnerable Is surprise achievable Does the US have a first strike capability Is the US homeland safe from enemy WMD Would the US and its allies be safe from retaliation from the WMD of third parties Have all non military options been exhausted before considering preemption Does the US have clear objectives achievable by appropriate means Is the US committing enough resources and is it taking all necessary steps to insure victory Finally a note of caution PCP strikes against states armed with WMD had better work completely or they could spell disaster for the initiator

Publishers,1997-07 **Countering the Proliferation of Weapons of Mass Destruction** Thanos P Dokos,2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Dokos presents an assessment of the Alliance's options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers

Developing a Theoretical Model of Counterproliferation for the 21st Century Brian Bates,Chris McHorney,2000 Examining counterproliferation as a global phenomenon the authors use an in depth analysis of the Counterproliferation Initiative to develop a theoretical model of counterproliferation for the 21st century Arguing that existing counterproliferation policy is the product of bureaucratic competition the authors propose several modifications of existing policy In the second half of the book they use four case studies Cuban Missile Crisis Persian Gulf War Osirak Reactor Raid and Sudan to identify factors that might contribute to an effective counterproliferation strategy More specifically the authors explore the relationship between the strength of an intelligence gathering apparatus and the successful or unsuccessful elimination of weapons of mass destruction The study concludes with observations and limited predictions regarding the future of counterproliferation

Just War on Terror? Brian Wicker,2016-04-22 Following the 9 11 attacks by Al Qaeda President Bush declared war on terror In the succeeding years Western governments have struggled to find the right way to respond to the new and deadly threat posed by terrorism With the election of President Obama the rhetoric has softened and policies have been adjusted but the underlying problems and challenges remain the same Meanwhile the war on terrorism in Afghanistan has been intensified Drawing on just war teaching as developed within both Christian and Muslim traditions this book examines whether and how liberal democracies can combat the new global terrorism both effectively and justly The authors including distinguished academics from both sides of the Atlantic Christian and Muslim theologians former senior civil servants and a General deploy a wide range of experience and expertise to address one of the most difficult and pressing

ethical challenges to contemporary society **The Continuing Storm** Avigdor Haselkorn, 1999-02-08 In this thought provoking book strategic analyst Avigdor Haselkorn provides an important reassessment of the 1991 Gulf War Haselkorn's step by step narrative in which he reviews the events of the war with Iraq examines intelligence and planning during the war discusses why President Bush abruptly terminated it and analyzes the strategic consequences is absorbing and frightening He reveals that the war was not the splendid high tech victory that many Americans perceive but a nearly catastrophic event The threatened use of weapons of mass destruction during the Gulf War has redefined the meaning of deterrence Haselkorn contends and has set in motion trends that portend great danger to world peace This book focuses on the role played by biological and chemical weapons in the Gulf War and scrutinizes the dynamics of deterrence It supplies the grim facts about anthrax botulinum toxin and poison gases and traces the terror of their use Haselkorn shows that President Bush had little choice about ending the war when he did given the failure of U S intelligence and severe flaws in strategic planning Indeed leaders on both sides of the conflict were either dangerously uninformed or did not fully understand the information they had This book provides a key to understanding the continuing stalemate with Iraq and it offers new insights into how the spread of weapons of mass destruction will affect world politics and future battlefields *Prevention, Pre-emption and the Nuclear Option* Aiden Warren, 2012-02-20 Despite its portrayal as a bold departure the Bush Doctrine was not the new or revolutionary policy instrument that many at the time portended This work seeks to argue that while it was clear that the Bush Doctrine certainly qualified as a preventive war policy it is apparent that the adoption of this strategy did not mark a total break with American tradition or earlier Administrations Warren seeks to dispel arguments pertaining to the supposed radical nature of the Bush Doctrine based on comparisons with previous National Security Strategies and previous Administrations penchant for prevention However the work also highlights that what was new and bold about the Bush Administration's National Security Strategy of 2002 was its willingness to embrace reinvigorating a nuclear option that could ultimately be used in the context of preventive war While Obama has struck bold rhetorical notes and promises in relation to limiting the role of nuclear weapons he has stopped short of changing the status quo on critical issues that have lingered since the Cold War such as tactical nuclear weapons and keeping missiles on alert This book's final section examines the extent to which Obama has attempted to adjust the nuclear option with the recent release of the congressionally mandated Nuclear Posture Review NPR Offering new insights into the Bush doctrine and providing a comprehensive analysis of the current status of the US nuclear weapons strategy this volume will be of great interest to scholars and students of American foreign policy security studies and international relations *Deterring America* Derek D. Smith, 2006-05-25 Faced with America's military superiority many countries are turning to weapons of mass destruction WMD as a means to deter United States intervention However the events of September 11 awakened America to a degree of vulnerability it had never experienced before making it increasingly unwilling to tolerate such weapons in the hands of unstable and unpredictable

regimes Through theoretical historical and prescriptive lenses this book explores the modern security dilemma created by the twin fears of American encroachment and vulnerability which form a vicious cycle of insecurity that challenges traditional notions of deterrence Using Iraq and North Korea as case studies Smith argues that the United States may need to re-evaluate its foreign policy strategies against WMD proliferation giving renewed attention to defensive measures negotiated disarmament interdiction and perhaps preemption

A Grand Strategy for America Robert J. Art, 2013-02-01 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world's preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert J Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America's contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America's interests The seven are dominion forcibly trying to remake the world in America's own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states' offensive capabilities isolationism withdrawing from all military involvement beyond U.S. borders containment holding the line against aggressor states and selective engagement choosing to prevent or to become involved only in those conflicts that pose a threat to the country's long-term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U.S. interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times

The DTIC Review, 1999

The End of Grand Strategy Simon Reich, Peter Dombrowski, 2018-01-15 In *The End of Grand Strategy* Simon Reich and Peter Dombrowski challenge this common view They eschew prescription in favour of describing and explaining what America's military actually does They argue that each presidential administration inevitably resorts to each of the six variants of grand strategy that they implement simultaneously as a result of a series of fundamental recent changes what they term calibrated strategies Reich and Dombrowski support their controversial argument by examining six major maritime operations stretching from America's shores to every region of the globe Each of these operations reflects one major variant of strategy They conclude that grand strategy as we know it is dead

War, Peace, and Christianity J. Daryl Charles, Timothy J. Demy, 2010-05-13 With issues of war and peace at the forefront of current events an informed Christian response is needed This timely volume answers 104 questions from a just war perspective offering thoughtful yet succinct answers Ranging from the theoretical to the practical the volume looks at how the just war perspective relates to the philosopher historian statesman theologian combatant and individual with particular emphases on its historical development and application to contemporary geopolitical challenges

Forgoing ideological extremes Charles and Demy give much attention to the biblical teaching on the subject as they provide moral guidance A valuable resource for considering the ethical issues relating to war Christians will find this book s user friendly format a helpful starting point for discussion All Options on the Table Rachel Elizabeth Whitlark,2021-11-15 When is preventive war chosen to counter nuclear proliferation In All Options on the Table Rachel Elizabeth Whitlark looks beyond systemic and slow moving factors such as the distribution of power Instead she highlights individual leaders beliefs to explain when preventive military force is the preferred strategy Executive perspective not institutional structure is paramount Whitlark makes her argument through archivally based comparative case studies She focuses on executive decision making regarding nuclear programs in China North Korea Iraq Pakistan and Syria This book considers the actions of US presidents John F Kennedy Lyndon B Johnson George H W Bush Bill Clinton and George W Bush as well as Israeli prime ministers Menachem Begin Yitzhak Rabin and Ehud Olmert All Options on the Table demonstrates that leaders have different beliefs about the consequences of nuclear proliferation in the international system and their state s ability to deter other states nuclear activity These divergent beliefs lead to variation in leaders preferences regarding the use of preventive military force as a counter proliferation strategy The historical evidence amassed in All Options on the Table bears on strategic assessments of aspiring nuclear powers such as Iran and North Korea Whitlark argues that only those leaders who believe that nuclear proliferation is destabilizing for the international system will consider preventive force to counter such challenges In a complex nuclear world this insight helps explain why the use of force as a counter proliferation strategy has been an extremely rare historical event Culture and Security Keith R. Krause,2012-11-12 A comprehensive and empirically rich set of case studies that examine the impact of socio cultural influences on multilateral arms control and security building processes around the world Nonproliferation Policy and Nuclear Posture Neil Narang,Erik Gartzke,Matthew Kroenig,2015-10-08 This volume examines the causes and consequences of nuclear postures and nonproliferation policies The real world importance of nuclear weapons has led to the production of a voluminous scholarly literature on the causes and consequences of nuclear weapons proliferation Missing from this literature however is a more nuanced analysis that moves beyond a binary treatment of nuclear weapons possession to an exploration of how different nuclear postures and nonproliferation policies may influence the proliferation of nuclear weapons and subsequent security outcomes This volume addresses this deficit by focusing on the causes and consequences of nuclear postures and nonproliferation policies It is the aim of this book to advance the development of a new empirical research agenda that brings systematic research methods to bear on new dimensions of the nuclear weapons phenomenon Prior to the contributions in this volume there has been little evidence to suggest that nuclear postures and policies have a meaningful impact on the spread of nuclear weapons or security outcomes This book brings together a new generation of scholars advancing innovative theoretical positions and performing quantitative tests using original data on nuclear postures nonproliferation

policies and WMD proliferation Together the chapters in this volume make novel theoretical empirical and methodological contributions to the field of nuclear weapons proliferation This book will be of much interest to students of nuclear proliferation international relations and security studies

Strategic Challenges Schear James a Flanagan Stephen J, Stephen J. Flanagan, 2008-02-27 Since 2001 the United States has endured a tumultuous period one dominated by the 9 11 attacks and all that has followed the war on terrorism the Afghan and Iraqi campaigns looming confrontations with known or suspected proliferators of weapons of mass destruction and episodic explosions of mass violence in chronically unstable regions In this second half of the decade these and related strategic challenges will test the skill tenacity and imagination of the current and the next U S administration and the American public How well these challenges are managed then or mastered will greatly influence whether future historians look back upon this decade as a dangerous passage toward a more peaceful globally connected order or as a descending path into an ever more fragmented violent world This volume explores seven looming as yet unmastered strategic challenges facing the United States Each chapter tackles one of the following challenges tackling global terrorism stopping WMD proliferation undertaking defense transformation protecting the homeland strengthening relations with allies and partners engaging other major powers and defusing conflicts in unstable regions Each chapter takes a similar approach defining the problem at hand i e a short discussion of relevant trends explicating current U S efforts to master the challenge i e U S objectives methods degree of success or setbacks and analyzing looming choices that U S policymakers will face in the next decade and as appropriate the consequences of alternative courses of action Strategic Challenges capitalizes on the great regional and topical expertise of the INSS professional research staff to present an authoritative overview of the global strategic environment facing the United States

The Coming Crisis Victor A. Utgoff, 2000 How will continued proliferation of nuclear weapons change the global political order This collection of essays comes to conclusions at odds with the conventional wisdom Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear backed aggression George Quester and Brad Roberts examine long term strategic objectives in responding to nuclear attack by a regional aggressor Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear armed states Scott Sagan explains how the nuclear nonproliferation policies best suited to some states can spur proliferation by others Caroline Ziemke shows how the analysis of a state s strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them And Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not
