Radical Nonintervention Rethinking The Delinquency Problem:

Radical Nonintervention: Rethinking the Delinquency Problem Edwin M. Schur, 1973 **Radical Nonintervention: Rethinking the Delinquency Problem** Edwin M. Schur, 1973 The Oxford Handbook of Developmental and Life-Course Criminology David P. Farrington, Lila Kazemian, Alex R. Piquero, 2018-11-23

Developmental and life course criminology are both concerned with the study of changes in offending and problem behaviors over time. Developmental studies in criminology focus on psychological factors that influence the onset and persistence of criminal behavior while life course studies analyze how changes in social arrangements like marriage, education or social networks can lead to changes in offending. Though each perspective is clearly concerned with patterns of offending and problem behavior over time, the literature on each is spread across various disciplines including criminology, criminal justice, psychology and sociology. The Oxford Handbook on Developmental and Life Course Criminology offers the first comprehensive survey of these two approaches together. Edited by three noted authorities in the field, the volume provides in depth critical reviews of the development of offending, developmental and life course theories, development correlates and risk/protective factors, life transitions and turning points, and effective developmental interventions from the world's leading scholars. In the first two sections, the contributors provide overviews of specific criminal career parameters including age crime curve, prevalence, frequency of offending and co-offending, and review the main theoretical frameworks in the developmental and life course criminology areas. They further summarize some of the empirical literature on known developmental correlates and risk/protective factors associated with longitudinal patterns of offending. In the next section, the fourth section focuses on life transitions and turning points as they may relate to persistence in or desistance from criminal activity into adulthood while the final section examines the genesis of antisocial/delinquent and criminal activity, its maintenance and its cessation. A state of the art overview on the topic, this Handbook aims to be the most authoritative resource on all issues germane to developmental and life course criminologists and provides next steps for further research.

Youth Justice Handbook Wayne Taylor, Rod Earle, Richard Hester, 2014-02-25

What knowledge and skills do you need to practise effectively as a professional within the youth justice system? What values should inform your work with children and young people subject to criminal justice sanctions? These are the central questions addressed by the editors and contributors in this comprehensive new text. The Youth Justice Handbook provides an essential resource for practitioners in youth justice as well as those who are studying the subject as part of their training or an academic course. Its aim is to equip practitioners in youth justice and the wider children's workforce with an understanding of key theoretical concepts from a range of disciplines that might inform and enhance their work. It encourages a critical interrogation of the ideas that underpin practice by drawing on social constructionist approaches to issues such as child development, crime and punishment and related concepts. It provides a descriptive account of current practice in areas such as community corrections and incarceration, examining the evidence

base for this and suggesting where appropriate alternative strategies The key objective of the Handbook is to provide students with the confidence to critically reflect on the ideas and debates that currently influence the work undertaken with young people as well as those that may shape practice in the future By equipping them with the basic skills of analysis and an understanding of key themes and developments it aims to further promote their progression as reflective practitioners and autonomous learners The Youth Justice Handbook takes a multidisciplinary approach and contains chapters from leading experts in the field which draw on original research and practical experience of working in the area It is divided into five parts Contexts of childhood and youth Research knowledge and evidence in youth justice Policy possibilities and penal realities in youth justice Reflective practice Widening contexts
