Case-based contents help to introduce IR techniques and demonstrate the role of minimally invasive therapy in the overall clinical management. Pre and post procedural patient assessments are also included in the chapters to enhance patient safety and early detection of complications. Interventional Radiology treatments now play a major role in many disease processes and continues to grow with new procedures added to the armamentarium of the interventional radiologist almost on a yearly basis. Interventional radiology, because of its pivotal role in medical care, requires its own teaching curriculum. Recognising this, the Cardiovascular and Interventional Radiology Society of Europe (CIRSE) devised an undergraduate curriculum in IR specifically designed for teaching medical students.
