Radionics - Medicine of the Future Langstone Day, George La De Warr, 2021-11-08 Radionics is an extraordinary technique of energy balancing that was born at the beginning of 900 and now has operators all over the world The great English pioneer George de la Warr defined it The science that studies the action of mind on matter and the union of all things One of its peculiarities is in fact the possibility to operate at a distance By means of the radiesthetic faculty and with specific instruments the radionic operator can analyze and intervene on any system living or not living that is near him as well as on the other side of the world Although this may seem absurd the new discoveries of Physics confirm that at certain levels there is no separation and we are one as claimed by the ancient Knowledge Radionics demonstrates this daily to thousands of people around the world who use it to send or receive treatment To carry out its action Radionics uses pendulums graphs symbols shapes instruments of many types Although it uses in some cases electronic instruments it has nothing to do with this science in fact it operates exclusively at those pre physical levels which subtend matter The fields of action of Radionics are many In reality there is no sector on which it is not possible to intervene positively with this very special technique precious for the health and the future of man and of the whole planet This text offers the reader the basis for making the most of this wonderful and fascinating branch of human knowledge
