Corlett, Richard B. Primack, 2011-03-03 The first edition of *Tropical Rain Forests* an Ecological and Biogeographical Comparison exploded the myth of the rain forest as a

single uniform entity In reality the major tropical rain forest regions in tropical America Africa Southeast Asia Madagascar and New Guinea have as many differences as similarities as a result of their isolation from each other during the evolution of their floras and faunas This new edition reinforces this message with new examples from recent and on going research After an introduction to the environments and geological histories of the major rain forest regions subsequent chapters focus on plants primates carnivores and plant eaters birds fruit bats and gliding animals and insects with an emphasis on the ecological and biogeographical differences between regions This is followed by a new chapter on the unique tropical rain forests of oceanic islands The final chapter which has been completely rewritten deals with the impacts of people on tropical

rain forests and discusses possible conservation strategies that take into account the differences highlighted in the previous chapters This exciting and very readable book illustrated throughout with color photographs will be invaluable reading for undergraduate students in a wide range of courses as well as an authoritative reference for graduate and professional ecologists conservationists and interested amateurs

**The Conservation Atlas of Tropical Forests** N.Mark Collins,1991-06-18 The first of a series designed to cover all tropical rain forests in the world This is a visual portfolio of detailed maps of Asia accompanied by a text which seeks to analyze the extent and causes of deforestation and to point a way towards sustainable forest development

**Tropical Rain Forests of Southeast Asia** Isamu Yamada,1998-01-01 Although global environmental problems created by the disappearance of tropical rain forests are all too well known the forests themselves vast in size and rich in diversity are the least understood of the world s ecosystems This book presents one researcher s view of Southeast Asia s tropical rainforests based on a quarter century of fieldwork in a wide range of forest types Moving from the mangrove of the coastal belt inland through freshwater and peat swamp forests to the lowly dipterocarp forests of the heartlands and up to the montane forests the author s lively account contains a wealth

of detailed observations that effectively communicate the complex natural structure of tropical rain forests while providing the reader with candid first impressions mud mosquitoes and all

**Rain Forest** Laurie Agopian, Illene Miller, 1995 In this study of rain forest students will learn about the interdependence of the plant and animal life that is so unique to this environment

*Rain Forests* Lynn M. Stone, 1989 Examines the rain forest as an ecological niche and describes the plant and animal life supported there

**Tropical Rain Forest Ecosystems** H. Lieth, M.J.A. Werger, 2012-12-02 After publication of the first volume of the Tropical Rain Forest the International Journal of Mycology and Lichenology commented This is a welcome addition to the literature on the ecology of tropical rain forests The book provides a wealth of data and stimulating discussions and is of great interest to ecologists interested in tropical areas Whereas the first volume dealt with system ecological aspects such as community organization and processes the present volume concentrates on biogeographical aspects such as species composition diversity and geographical variation Recent ecological research in the tropical rain forest has greatly extended our understanding of biogeographical patterns of variation in the various groups of organisms and has revealed many of the ecological and evolutionary forces that led to the present patterns of variation Many important systems of co evolution between the tropical rain forest ecosystems have also come to light and the loss of species and related damage is better understood in quantitative terms This volume presents a comprehensive review of these and other features of the rain forest ecosystem structure and the ecological processes operating that system General chapters on abiotic and biotic factors are followed by specific chapters on all major groups of organisms Prospects for the future are discussed and research needs clearly stated Also the human exploitation of the system its effects and its limits are discussed The book is extensively illustrated by photographs graphs and tables and comprehensive bibliographies follow each chapter Author systematic and subject indices complete the book It is a must for all ecologists agriculturists foresters agronomists hydrologists soil scientists entomologists human ecologists nature conservationists and planners dealing with tropical areas Biologists and environmentalists will also find the volume of great interest
