*Neuropeptide Hormones, and Neuroendocrine Function* Eduardo A. Nilnai, 2018-07-20 This textbook presents for the first time a comprehensive body of the latest knowledge in the field of neuropeptides and their action on energy balance. It contains a detailed and comprehensive account of the specific hypothalamic peptides in regards to their roles in energy balance, food intake control and co-morbidities to better understand the pathophysiology of obesity. The textbook includes an examination of the history of the evolution of human society from a thin to the obese phenotype and within that context how modern society habits and industrial food production did not respect the evolutionary trait resulting in changes in the energy balance set point. It provides a novel conceptualization of the problem of obesity when considering the biochemistry of peptide hormones and entertaining novel ideas on multiple approaches to the problems of energy balance as well as demonstrates and explains why alterations in pro-hormone processing are paramount to understand metabolic disease. This text is excellent material for teaching graduate and medical school courses as well as a valuable resource for researchers in biochemistry, cell and molecular biology, neuroscientists, physician endocrinologists and nutritionists.

**Endocrinology** Fima Lifshitz, 2006-12-26 Celebrating more than twenty years as the single best source in the field this Fifth Edition has now expanded into two cornerstone volumes with 53 fully inclusive chapters and 73 renowned contributors that comprehensively address every topic and trend relevant to the identification, diagnosis and management of endocrine and endocrine-related disorders.

**Development and Environment** Warren Burggren, Benjamin Dubansky, 2018-09-24 Rather than a loosely connected list of facts/topics, this book addresses virtually every field that involves the use of developing animals in environmental science. In doing so it will help define the scientific collective within these fields to both those readers who are outside of a particular field/students and professionals alike and those who work within said field where multiple iterations of the same job description exist. Both the content and choice of authors fully support this goal as the editors and contributing authors represent contemporary thought and experimentation in their respective fields ranging from developmental physiology through environmental toxicology to medicine. As such this work will appeal to a broad audience including any scientist or trainee interested in the nexus of environment, development and physiology.
