## **Rainforest Relations:**

**RAIN FOREST RELATIONS** Melissa Leach, 1994-08-17 Centering on the Mende speaking people living around the Gola forest reserves in Sierra Leone *Rainforest Relations* shows how local communities and individuals in rainforest regions use and view forest resources amid international environmental scrutiny and changing socioeconomic conditions Leach argues that if both the rainforests and their human inhabitants are to survive conservation policies must refocus to address local interests in general and women's interests in particular Drawing on anthropological fieldwork in Mende communities Leach details day to day interaction with the environment examining labor and tenure arrangements gathered products and their markets hunting and fishing practices and crop types She focuses on different women's and men's experiences and their access to use and control of the land She shows how links between local women and their environment depend on dynamic gender relations in agriculture forest resource use and social life This gender study is placed in the context of both an overview of West African conservation agendas over the past century and an examination of the strengths and weaknesses of ecofeminism and other currently popular approaches to women and the environment BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

**Rainforest Relations** Melissa Leach, 1994 With environmental change and conservation in West Africa's tropical rainforests becoming topics of increasing political and academic interest this book brings a fresh set of perspectives to the debate those of the forest dwellers themselves Based on her detailed field research in the Mende communities around Gola North Forest reserve and surveying the recent debates and literature concerning forest conservations and current analytical approaches to gender and the environment Melissa Leach examines the importance of rainforest resources to the local economy and social relations and shows that neither an understanding of forest use and change nor adequate conservation policies can be achieved without a concern for gender

*Australian Rainforests* D. M. J. S. Bowman, 2000-02-17 A critical evaluation of the ecological hypotheses proposed to explain the distribution of Australian rainforests **Tropical Rainforests** Eldredge Bermingham, Christopher W. Dick, Craig Moritz, 2005-08 Synthesizing theoretical empirical analyses of the processes that help shape these unique ecosystems *Tropical Rainforests* looks at the effects of evolutionary histories past climate change ecological dynamics on the origin maintenance of tropical rainforest communities

**Rainforest Survival** Glen Earthsong, AI, 2025-02-15 *Rainforest Survival* offers a comprehensive guide to thriving in one of Earth's most demanding environments It focuses on essential survival skills emphasizing water procurement shelter construction and safe food sourcing The book underscores the importance of understanding rainforest ecology and the need for sustainable practices when interacting with this delicate ecosystem It uniquely blends traditional survival techniques with modern scientific knowledge drawing from ethnobotanical studies and firsthand accounts The book progresses methodically beginning with an introduction to rainforest ecology and survival psychology Subsequent chapters delve into practical techniques such as identifying edible versus poisonous plants and

constructing shelters from readily available materials The book demonstrates the application of survival skills across different rainforest regions accounting for variations in climate flora and fauna Ultimately Rainforest Survival aims to equip readers with the knowledge to navigate rainforests responsibly making it invaluable for outdoor enthusiasts and anyone interested in nature and adventure

**Tropical Rainforest Responses to Climatic Change** Mark B. Bush, John Flenley, 2007 The goal of this book is to provide a current overview of the impacts of climate change on tropical forests to investigate past present and future climatic influences on the ecosystems with the highest biodiversity on the planet Tropical Rainforest Responses to Climatic Change will be the first book to examine how tropical rain forest ecology is altered by climate change rather than simply seeing how plant communities were altered Shifting the emphasis onto ecological processes e g how diversity is structured by climate and the subsequent impact on tropical forest ecology provides the reader with a more comprehensive coverage A major theme of this book that emerges progressively is the interaction between humans climate and forest ecology While numerous books have appeared dealing with forest fragmentation and conservation none have explicitly explored the long term occupation of tropical systems the influence of fire and the future climatic effects of deforestation coupled with anthropogenic emissions Incorporating modelling of past and future systems paves the way for a discussion of conservation from a climatic perspective rather than the usual plea to stop logging

Ecofeminist Natures Noel Sturgeon, 2016-01-08 Examining the development of ecofeminism from the 1980s antimilitarist movement to an internationalist ecofeminism in the 1990s Sturgeon explores the ecofeminist notions of gender race and nature She moves from detailed historical investigations of important manifestations of US ecofeminism to a broad analysis of international environmental politics

Human-Environment Relations Emily Brady, Pauline Phemister, 2012-02-02 This fresh and innovative approach to human environmental relations will revolutionise our understanding of the boundaries between ourselves and the environment we inhabit The anthology is predicated on the notion that values shift back and forth between humans and the world around them in an ethical communicative zone called value space The contributors examine the transformative interplay between external environments and human values and identify concrete ways in which these norms residing in and derived from self and society are projected onto the environment

Tropical Rainforests Susan E. Place, 2001-05 Presents an overview of the nature of rainforests and discusses the causes and consequences of deforestation in Latin America s rainforests as well as alternative approaches to development

Ecofeminism and Globalization Lois Ann Lorentzen, Heather Eaton, 2004-09-08 Discusses ecofeminism in the context of the social political and ecological consequences of globalization The book includes case studies essays theoretical works and articles on ecofeminist movements from many of the world s regions including Taiwan Mexico Kenya Chile India Brazil Canada England and the United States

Bonanza It examines public regulation of private land public land management the roles culture and ethnic values play in land use and concludes with Jacobs title essay Who Owns America is a powerful and illuminating exploration of the very terrain that makes us Americans Its broad set of theoretical and historical perspectives will fascinate historians environmental activists policy makers and all who care deeply about the land we share **African Niche Economy** Jane L Guyer,2019-07-30 No detailed description available for An African Niche Economy *Practising Feminist Political Ecologies* Wendy Harcourt,Ingrid L. underpin current interpretations and presents an original and revisionist account of Benin art history Unmasking the State Mike McGovern, 2024-05-31 When the Republic of Guinea gained independence in 1958 one of the first policies of the new state was a village to village eradication of masks and other ritual objects it deemed fetishes The Demystification Program as it was called was so urgent it even preceded the building of a national road system In Unmasking the State Mike McGovern attempts to understand why this program was so important to the emerging state and examines the complex role it had in creating a unified national identity In doing so he tells a dramatic story of cat and mouse where minority groups cling desperately to their important and outlawed customs Primarily focused on the communities in the country's southeastern rainforest region people known as Forestiers the Demystification Program operated via a paradox At the same time it banned rituals from Forestiers day to day lives it appropriated them into a state sponsored program of folklorization McGovern points to an important purpose for this by objectifying this polytheistic group's rituals the state created a viable counterexample against which the Muslim majority could define proper modernity Describing the intertwined relationship between national and local identity making McGovern showcases the coercive power and the unintended consequences involved when states attempt to engineer culture
