Researching And Applying Metaphor:

Researching and Applying Metaphor Graham Low, Lynne Cameron, 1999-02-11 This book demonstrates how metaphor needs to be researched using multiple methods of investigation

Researching and Applying Metaphor in the Real World Graham Low, Zazie Todd, Alice Deignan, Lynne Cameron, 2010-10-13 It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used especially where the aim is to address real world problems The notion of real world metaphor research has been developed to describe this important area of investigation This book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed Research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description Methods include corpus analysis experimentation discourse analysis cross cultural analysis and genre analysis In each case the empirical studies refer back to Gibbs's opening overview of real world research The result is an invaluable and cross referenced collection of papers addressing real world problems

Metaphors for, in and of Education Research Andy Davies, Warren Midgley, Karen Trimmer, 2014-09-18 Metaphors for in and of Education Research draws on a variety of philosophical theoretical and methodological approaches exploring metaphors as instruments for describing understanding and inspiring education research Key themes addressed by authors in this collection include how metaphors provide new understandings of the philosophical assumptions underlying education research how metaphors provide new perspectives on methodological issues in education research and how metaphors evoke cognitive affective and volitional responses to the experience of conducting or participating in education research The book includes chapters written by academics with experience in various education sectors including middle high school and tertiary education Areas of academic expertise include doctoral study literacy and learning special education educational partnerships and leadership and applied linguistics

Clinical Research in Psychoanalysis Marina Altmann de Litvan, 2021-07-19 This book offers different theoretical approaches about what clinical research is Clinical Research in Psychoanalysis is a unique contribution to the attempts to bridge the gap between clinicians and researchers and to create a culture of a more rigorous and systematic inquiry It provides an innovative experience because for the first time different methods and perspectives were used to analyse one same clinical material This was done by analysts from different working parties of the International Psychoanalytical Association IPA from a range of different schools of psychoanalytic thought This allows the reader to have a vision of the different methods that are currently being used by some working parties of the IPA and to learn about the strengths of each one for certain situations and types of research This book reevaluates clinical research intending to make

links between the analysts working through the working parties and the different ways of thinking in clinical research By covering key topics such as how working parties can facilitate different types of research the place of metaphor in psychoanalytic research and practice and the future for psychoanalytic research this text is a fruitful dialogue between different theoretical conceptions and between clinicians and researchers that will expand our perspectives on the evidence we find in clinical material and will broaden our views on the patient This book offers a unique and invaluable experience to psychologists and psychoanalysts who are trying to improve their clinical practice and bring research evidence into their psychoanalytic practice It is an invaluable contribution to psychoanalytic training of candidates teachers and students

Navigating the Realities of Metaphor and Psychotherapy Research Dennis Tay, 2022-12-01 The real world commitment of cognitive linguistics is demonstrated by increasingly extensive collaboration between researchers and industry partners Yet there has been little critical reflection on the lessons learnt from these collaborative efforts Beginning researchers may benefit from in depth discussion of how various practical realities inform constrain or otherwise shape important methodological and or analytic decisions This Element reflects on long term collaborative work between a metaphor researcher and psychotherapists offering practical advice on navigating the latent realities of this type of research The three foundational components of psychotherapy the therapist the client and the interactional setting itself are discussed in turn covering issues like ethically engaging therapists in research design and data analysis dealing with underexplored variabilities in client responses and managing the inherent tension between spontaneity and control in an interactional setting like psychotherapy Some thoughts on how the lessons are transferable to other research contexts are offered The Cambridge Handbook of Metaphor and Thought Raymond W. Gibbs, Jr., 2008-09-22 A comprehensive collection of essays in multidisciplinary metaphor scholarship that has been written in response to the growing interest among scholars and students from a variety of disciplines such as linguistics philosophy anthropology music and psychology These essays explore the significance of metaphor in language thought culture and artistic expression There are five main themes of the book the roots of metaphor metaphor understanding metaphor in language and culture metaphor in reasoning and feeling and metaphor in non verbal expression Contributors come from a variety of academic disciplines including psychology linguistics philosophy cognitive science literature education music and law **Confronting Metaphor in Use** Mara Sophia Zanutto, Lynne Cameron, Marilda C. Cavalcanti, 2008-03-27 It is timely for researchers to approach metaphor as social and situated as a matter of language and discourse and not just as a matter of thought Over the last twenty five years scholars have come to appreciate in depth the cognitive motivated and embodied nature of metaphor but have tended to background the linguistic form of metaphor and have largely ignored how this connects to its role in the discourses in which our lives are constructed and lived This book brings language and social dimensions into the picture offering snapshots of metaphor use in real language and in real lives across the very different cultures of Europe and Brazil and contributing to the theorizing of

metaphor in discourse **Cognition and Language Learning** Sadia Belkhir, 2020-02-05 This collection highlights the interplay between cognition and language learning and tackles such issues as cognition and skills development language processing vocabulary memorisation metaphor identification vocabulary attrition motivation and the perception of phonemes among others The contributions here represent current forward looking research in the field of cognitive linguistics and education To date there has been a sharp need for innovative research that examines the interrelationship between cognition and the process of language learning This volume responds to this requirement bringing together researchers interested in this research area to discuss their contributions and to open debates about the role played by cognition in language learning The book will appeal to master s and doctoral students teachers educational practitioners and researchers interested in research into the interaction between cognition and language learning **Language Teachers' Narratives of Practice** Lesley Harbon, Robyn Moloney, 2014-08-26 Language Teachers Narratives of Practice is a collection of seventeen essays that examine personal and professional stories of and by language teachers in diverse Australian contexts The voices of twenty one Australian language teachers in all describe teachers own linguistic and cultural personal and professional narratives and how each narrative has informed the construction of their classroom language teaching practice to suit their teaching contexts We see how teachers make individual responses to emerging pedagogies developed through the lens of their personal experience and understanding of language and culture In our invitations to these teachers to contribute chapters to the book we have encouraged them to make visible the diversity within the Australian language teaching context This is a new resource for use in a professional development context for pre service teachers in service teachers tertiary teacher educators and researchers This resource will serve as a practical text for teachers to draw on to extend their own professional knowledge and classroom practice in relevant useful and diverse areas The narratives can be examined as case studies of teacher identity and life worlds development of pedagogies intercultural learning and the differentiation and adaptation needed in particular environments within a diverse environment such as Australia **Metaphor in Use** Fiona MacArthur, Jose Luis Oncins-Martinez, Manuel Sánchez-García, Ana María Piquer-Píriz, 2012 Metaphor is a fascinating phenomenon but it is also complex and multi faceted varying in how it is manifested in different modes of expression languages cultures or time scales How then can we reliably identify metaphors in different contexts How does the language or culture of speakers and hearers affect the way metaphors are produced or interpreted Are the methods employed to explore metaphors in one context applicable in others The sixteen chapters that make up this volume offer not only detailed studies of the situated use of metaphor in language gesture and visuals around the world providing important insights into the different factors that produce variation but also careful explication and discussion of the methodological issues that arise when researchers approach metaphor in diverse real world contexts The book constitutes an important contribution to applied metaphor studies and will prove an invaluable resource for the novice and experienced metaphor researcher alike

Metaphor and Gesture Alan Cienki, Cornelia Müller, 2008-06-04 This volume is the first to offer an overview on metaphor and gesture a new multi disciplinary area of research Scholars of metaphor have been paying increasing attention to spontaneous gestures with speech meanwhile researchers in gesture studies have been focussing on the abstract ideas which receive physical representation through metaphors when speakers gesture This book presents a snapshot of the state of the art in these converging fields offering research papers as well as commentaries from multiple perspectives In addition to conceptual metaphor theory it includes different theoretical approaches to semiotics and the methods used range from controlled experimentation to cognitive ethnography to lexical semantic analysis The use of metaphor in gesture is shown to reflect idiosyncracies of thought in the moment of speaking as well as structural cultural and interactional patterns The series of commentaries discusses the potential importance of studying metaphor and gesture from the perspectives of such fields as anthropology cognitive linguistics conversation analysis psychology and semiotics **The Routledge Handbook**

Speaking and Instructed Foreign Language Acquisition Mirosław Pawlak, Ewa Waniek-Klimczak, Jan Majer, 2011-07-04 Developing the ability to speak in a foreign language is an arduous task This is because it involves the mastery of different language subsystems simultaneous focus on comprehension and production and the impact of a range of social factors This challenge is further compounded in situations in which learners have limited access to the target language Thus there is a need to explore issues related to teaching learning and testing speaking with a view to translating the guidelines based on theoretical positions and research findings into feasible and context specific pedagogical recommendations This is the rationale behind this book which considers speaking from leading theoretical perspectives investigates individual variables which affect its development and reports the results of studies focusing on different aspects of its instructed acquisition Drawing Attention to Metaphor Camilla Di Biase-Dyson, Markus Egg, 2020-04-15 The

communicative act of drawing attention to metaphor is a relatively recent topic in metaphor studies and one that has remained contentious from a cognitive perspective This book brings philologists of ancient languages together with metaphor experts from several modalities to interrogate whether ancient and modern texts and languages draw attention to figurative tropes in similar ways In this way the diachronic multimodal and pluridisciplinary contributions to this volume critically review the theoretical frameworks underpinning metaphor marking and metaphor analysis from a completely new empirical basis Handbook of Qualitative Research in Education Michael R.M. Ward, Sara Delamont, 2020-08-28 This updated second edition unpacks the discussions surrounding the finest qualitative methods used in contemporary educational research Bringing together scholars from around the world this Handbook offers sophisticated insights into the theories and disciplinary approaches to qualitative study and the processes of data collection analysis and representation offering fresh

ideas to inspire and re invigorate researchers in educational research **Research Handbook on Jurilinguistics** Anne Wagner,Aleksandra Matulewska,2023-10-06 This Research Handbook offers a comprehensive study of jurilinguistics that not only presents the latest international research findings among academics and practitioners but also provides a new approach to the phenomena and nature of communicative flexibility legal genres vulnerability of interlingual legal communication and the cultural landscape of legal translation **Clean Language Interviewing** Heather Cairns-Lee,James Lawley,Paul Tosey,2022-07-20 Combining academic rigour with real application examples a global range of contributors analyse the use of Clean Language Interviewing in multiple settings including business education and healthcare **Metonymy and Language** Charles Denroche,2014-12-05 Metonymy and Language presents a new theory of language and communication in which the central focus is on the concept of metonymy the recognition of partial matches and overlaps Through the use of original data sets and rigorous primary research Denroche characterizes metonymy as key to understanding why language is so fit for purpose and how it achieves such great subtlety and flexibility This study develops the notion of metonymic competence and demonstrates that metonymic behavior is often pursued for its own sake in recreational activities such as quizzes puzzles and play and shows the possible impact of the application of metonymic processing theory to professional fields such as language teaching and translator training Furthermore it proposes a research approach with metonymy at its center metonymics which Denroche suggests could provide a powerful framework for addressing issues in numerous fields of practice in the arts and sciences **Interdisciplinarity in Translation and Interpreting Process Research** Maureen Ehrensberger-Dow,Susanne Göpferich,Sharon O'Brien,2015-06-15 First published as a special issue of Target issue 25 1 2013 this volume explores interdisciplinarity in translation and interpreting process research fields that have enjoyed a boom in the last decade For this reason the time was ripe for a reflection on the broad range of methodologies that have been applied in our endeavours to understand both translation and interpreting processes better The ten chapters provide a snapshot of how translation and interpreting process researchers have availed themselves of concepts and theories developed in other disciplines such as psychology the cognitive sciences journalism and literary studies to examine and illuminate their object of study This collection demonstrates that translation and interpreting process research borrow heavily from other disciplines and call for a consideration of how translation research can become truly interdisciplinary through increased collaboration synergy and mutual advancement
