**Geological Survey of Canada, Current Research (Online) no. 2003-C14 ,     Geological Survey of Canada, Current Research (Online) no. 2002-C19** Alan G. Jones,2002 This paper reports results from magnetotelluric measurements made along an approximately 300 kilometre northwest southeast trending profile that crossed the major geological structures of central Baffin Island The main goal of this survey was to determine the sub surface geometry of major geological boundaries particularly between Archean Rae Craton rocks and overlying Paleoproterozoic continental margin units The paper describes data acquisition methods problems encountered and presents a preliminary model that describes much of the magnetotelluric response observed along the profile     **Geological Survey of Canada, Current Research (Online) no. 2002-A5 ,     Geological Survey of Canada, Current Research (Online) no. 2003-C18 ,**

Malone,Bill Atweh,Jeffrey Northfield,Jeff Northfield,2013-11-26 Research and Supervision in Mathematics and Science Education provides student researchers and their supervisors with information about both the essentials of planning conducting reporting and publishing qualitative research and the characteristics of quality supervision

It is focused primarily for postgraduate research students in mathematics and science education and their supervisors. It will also be of interest to students and faculty in other disciplines that use educational and sociological research paradigms. The volume builds on two phenomena of recent years: first the increasing momentum of postgraduate research in mathematics and science education and second the resulting need of those involved for knowledge about doing research and about engaging in quality supervision. The decision to address both research and supervision in one volume is a response to the fact that faculty who supervise postgraduate research often are in need of resources covering not only aspects of project and thesis supervision but also the knowledge to assist students in research design especially in the qualitative field. Drawing on recent research and practice the authors of the chapters in this book illustrate approaches and strategies that have been used successfully with and by postgraduate students. The book also has a strong future orientation describing how postgraduate supervision and research will change as more and more students gain access to and make use of the vast array of technological resources now available. A necessary and unique addition to books in the field of postgraduate research and supervision this volume's particular appeal stems from its practical approach its creative future perspective and the wide generalizability of the thinking and ideas it presents.

Geological Survey of Canada, Current Research (Online) no. 2004-H1 R. Rowe, J. B. Percival, William Hamilton Hendershot, 2004. This study forms part of a larger project to examine metal dynamics in soils in order to distinguish between and quantify contributions of metals from anthropogenic and natural sources. This study characterized the mineralogy of six soil samples from the Rouyn Noranda and Sudbury areas in order to identify minerals that can be a source of trace metals and to determine suitable mineral fractions for future weathering experiments. Results are compared among the silt sized clay sized and heavy mineral fractions from the B C soil horizons as analyzed by x ray diffraction and scanning electron microscopy.
