Education and Training Jonathan Tummons, 2020-05-18 What does professionalism mean for teachers and trainers in further education colleges or adult education centres Over the last twenty years ideas about professionalism and professional identity within the post compulsory sector have been shaped and reshaped by successive policies standards and professional bodies Yet these ideas themselves remain controversial and continue to be the focus of debate as well as research This book gathers together a series of articles published over the last ten years providing critical and research based perspectives on professionalism within post compulsory education and training The twelve chapters that are presented here explore issues such as professional standards and continuing professional development and their impact on current definitions and frameworks of professionalism as well as the policies that have shaped these processes These are issues that are of relevance and importance not only to practitioners and researchers in the post compulsory sector but to anyone who is concerned with contemporary debates about what it means to be a professional in education and training The chapters in this book were originally published as articles in *Research in Post Compulsory Education* *Existential Crises in Educational*

Administration and Leadership Eugenie A. Samier, 2022-06-30 This book examines the theoretical foundations relevant to existential issues in educational leadership and management taking inspiration from Munch's painting *The Scream* The book considers internationally relevant topics such as the growth of neoliberalism globalisation cultural shifts forced migration and the digitalisation of the socio cultural sphere and uniquely positions these crises as existential threats rather than simply political cultural or social The volume explores this complex set of dimensions in existential experience and outlines the implications for research and teaching in educational leadership By exemplifying the narrative and introspective nature of

Costello,2003-12-01 The central purpose of this book is to enable practitioners to undertake and to offer an account of an action research project The volume is divided into seven sections the first six of which are headed by commonly asked questions Having examined the nature of action research Costello focuses on developing an appropriate project data collection and analysis and producing a research report The final selection offers suggestions for further reading **Ethics**

in Research Ian Gregory,2003-12-01 Ian Gregory explores how ethical concerns influence not only how research is conducted but also how researchers engage with a piece of research Also analysed in detail is the impact ethics have on the interpretation of data and research findings BOOK JACKET Policy, Discourse and Rhetoric Marie Lall,2012-09-11 This is not yet another book on New Labour and neoliberalism but the only book which uses policy case study evidence to show the rhetorical nature of the commitment New Labour appeared to have been making to education Unlike other books on that era this one aims to review New Labour's time in government through specific policy texts This book reviews some of the major policy shifts in the education sector analysing selected case study policies in order to articulate dominant discourses in recent policy making which have helped establish a particular hegemony The book's originality lies in its policy analysis and case study base whereby key policy texts across different sectors are dissected using the policy cycle framework allowing for an in depth analysis of the policy discourse as well as a discussion on how the neoliberal agenda was reflected and or promoted Education is often only perceived as limited to policies relating to schools and higher education However the book seeks to demonstrate that education as a sector is a much broader field and therefore the areas covered include key policies in citizenship and youth work widening participation in higher education the place of inclusive education in the curriculum the undergraduate medical curriculum and the effect of the Cox review on creativity In effect the broad selection of sectors demonstrates that New Labour's education policies were not only detrimental in traditional education settings but also affected areas such as medicine and the media which are of importance to those who no longer are affected by what happens in institutions of learning and teaching The book is consequently relevant for a much wider audience beyond the education community FE Lecturer's Survival Guide Angela Steward,2006-12-09 The author provides readers with strategies for dealing with a wide range of issues including managing workloads effectively developing positive relationships and creating a learning environment
