Wheeler, 1990-02-23 *Enhancing Faculty Careers* examines the key factors that bear on professional growth including the role of professional schools in the preparation of prospective faculty career consulting wellness programs employee assistance programs to help deal with substance abuse and strategies for instituting early retirement programs *Faculty Careers and Work Lives: A Professional Growth Perspective* KerryAnn O'Meara, Aimee LaPointe Terosky, Anna Neumann, 2008 This volume reviews and synthesizes recent research on faculty demographics appointment types work life and reward systems as well as major theoretical perspectives useful to researchers who study faculty work careers and professional development In doing so it advances and challenges current dialogue on faculty careers notably by exploring a narrative of constraint that underlies much contemporary research and reform in higher education Although highlighting the valuable ways whereby the narrative of constraint has illuminated the myriad barriers than can and too often do inhibit faculty careers the authors assert that the theme of constraint obscures possibility learning agency and growth In emphasizing constraint many contemporary research and reform efforts overlook faculty striving for growth The volume reintroduces growth as an

important consideration in higher education discourses of policy and practice and with attention to four of its key aspects learning agency professional relationships and commitments The authors discuss current research on faculty demographics appointments work reward systems along with theories used in research relative to these four aspects of growth They also discuss how attention to faculty growth may open up new directions for policy public communication and future research on higher education faculty This is the third issue in the 34th volume of the Jossey Bass series ASHE Higher Education Report Each monograph in the series is the definitive analysis of a tough higher education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

Resources in Education ,2001 The Faculty Factor Martin J. Finkelstein, Valerie Martin Conley, Jack H. Schuster, 2016-11 In an academy squeezed hard by formidable pressures what is the future of the faculty Over the past 70 years the American university has become the global gold standard of excellence in research and graduate education The unprecedented surge of federal research support of the postWorld War II American university paralleled the steady strengthening of the American academic profession itself which managed to attract the best and brightest educators from around the world while expanding the influence of the faculty factor throughout the academic realm But in the past two decades escalating costs and intensifying demands for efficiency have resulted in a wholesale reshaping of the academic workforce one marked by skyrocketing numbers of contingent faculty members Extending Jack H Schuster and Martin J Finkelstein s richly detailed classic *The American Faculty The Restructuring of Academic Work and Careers* this important book documents the transformation of the American faculty historically the leading global source of Nobel laureates and innovation into a diversified and internally stratified professional workforce Drawing on heretofore unpublished data the book provides the most comprehensive contemporary depiction of the changing nature of academic work and what it means to be a college or university faculty member in the second decade of the twenty first century The rare higher education study to incorporate multinational perspectives by comparing the status and prospects of American faculty to teachers in the major developing economies of Europe and East Asia *The Faculty Factor* also explores the redistribution of academic work and the ever more diverse pathways for entering into maneuvering through and exiting from academic careers Using the tools of sociology anthropology and demography the book charts the impact of waves of technological change mass globalization and the severe financial constraints of the last decade to show the impact on the lives and careers of those who teach in higher education The authors propose strategic policy recommendations to extend the strengths of American higher education to retain leadership in the global economy Written for professors adjuncts graduate students and academic political business and not for profit leaders this data rich study offers a balanced assessment of the risks and opportunities posed for the American faculty by economic market driven forces beyond their control **The Palgrave Handbook of Imposter Syndrome in Higher Education** Michelle Addison, Maddie Breeze, Yvette Taylor, 2022-04-11 This handbook explores feeling like an imposter in higher education and what this can tell us about contemporary educational inequalities Asking why imposter syndrome matters now we investigate experiences of imposter syndrome across social locations institutional positions and intersecting inequalities Our collection queries advice to fit in with the university and authors reflect on not

belonging in with and against educational institutions The collection advances understandings of imposter syndrome as socially situated in relation to entrenched inequalities and their recirculation in higher education Chapters combine creative methods and linger on the figure of the imposter wary of both individualising and celebrating imposters as lucky misfits fraudsters or failures and critically interrogating the supposed universality of imposter syndrome *I Prefer to Teach* James J.F. Forest, 2018-10-24 This book draws on the perspectives of nearly 20 000 faculties from around the world to determine significant trends in how professors view teaching and research Women in Higher Education and the Journey to Mid-Career: Challenges and Opportunities Schnackenberg, Heidi L., 2022-06-24 Individuals in mid career positions in higher education typically feel that they are faced with fewer engagement endeavors and new initiatives with which they can participate in as institutions tend to find them not as new and their ideas no longer as cutting edge even though they very well may be For women in academia this phenomenon is even more complex Typically by mid career women have survived the sprint to tenure while juggling family caregiver responsibilities Post tenure they may find themselves in a space where they have more control over their work and can engage at a more comfortable pace However without institutional support and personal determination to remain engaged women may find themselves facing stagnation in their career development Thus it is essential that mentorship opportunities are established and career trajectories put in place for mid career women Women in Higher Education and the Journey to Mid Career Challenges and Opportunities considers specific challenges issues strategies and solutions that are associated with female academics during mid career phases The book includes a variety of emerging evidence based professional practice and narrative personal accounts as written by administrators faculty staff and students The book considers strategies for remaining vibrant and productive and suggestions from successful mid career women academics and reflections from women who have passed the mid career phase Covering topics such as tenure self care and academic leadership this reference work is ideal for administrators faculty policymakers academicians scholars researchers practitioners instructors and students **Redefining Post-Traditional Learning: Emerging Research and Opportunities** Cook-Benjamin, Lorie, Cook, Jared, 2019-08-02 Post traditional students are rapidly becoming the majority of the higher education student population This changing demographic within the higher education landscape increases the demand for flexible learning options accessible to non traditional learners Redefining Post Traditional Learning Emerging Research and Opportunities is a comprehensive research publication that explores shifting demographics within higher education and offers recommendations to current teaching methodologies Highlighting a range of topics such as adult learners pedagogy and international students this book provides a theoretical foundation followed by an intentional dissection of current and best research practices through the lenses of andragogy student demographics and technology It is ideal for teachers instructional designers curriculum developers educational professionals school administrators policymakers academicians teaching professionals researchers and graduate students **Reshaping**

Teaching in Higher Education Alan Jenkins, 2003 Linking research with teaching is one of the main topics in the educational development world This practice based guide shows how academic research activity can be connected to academic teaching activity to ensure that neither operates in a vacuum and each can be enhanced by the other Addressing issues at the individual course and institutional level and written for an international readership this will be a key book for course leaders and educational developers

The American Faculty Jack H. Schuster, Martin J. Finkelstein, 2008-12-15 Higher education is becoming destabilized in the face of extraordinarily rapid change The composition of the academy's most valuable asset the faculty and the essential nature of faculty work are being transformed Jack H Schuster and Martin J Finkelstein describe the transformation of the American faculty in the most extensive and ambitious analysis of the American academic profession undertaken in a generation A century ago the American research university emerged as a new organizational form animated by the professionalized discipline based scholar The research university model persisted through two world wars and greatly varying economic conditions In recent years however a new order has surfaced organized around a globalized knowledge based economy powerful privatization and market forces and stunning new information technologies These developments have transformed the higher education enterprise in ways barely imaginable in generations past At the heart of that transformation but largely invisible has been a restructuring of academic appointments academic work and academic careers a reconfiguring widely decried but heretofore inadequately described This volume depicts the scope and depth of the transformation combining empirical data drawn from three decades of national higher education surveys The authors' portrait at once startling and disturbing provides the context for interpreting these developments as part of a larger structural evolution of the national higher education system They outline the stakes for the nation and the challenging work to be done

The New Academic Generation Martin J. Finkelstein, Robert K Seal, Jack H. Schuster, 1998-05-29 Higher education researchers Martin Finkelstein Robert Seal and Jack Schuster focus on the changing face of American academe as women foreign born and minority scholars enter the professorate in large numbers Considering this trend the authors argue that the next generation will usher in an era of dramatic changes and that the long term implications of these changes will be
