Parallax Alan W. Hirshfeld, 2002-05-01 In the dramatic tradition of the best selling Longitude Parallax charts the historical path of observational astronomy's most daunting challenge measuring the distance to a star The greatest scientific minds applied themselves in vain to the problem across the millennia beginning with the ancient Greeks Not until the nineteenth century would three astronomers armed with the best telescopes of the age race to conquer this astronomical Everest their contest ending in a virtual dead heat Against a sweeping backdrop filled with kidnappings dramatic rescue swordplay madness and bitter rivalry Alan Hirshfeld brings to life the heroes of this remarkable story Meet the destitute boy plucked from a collapsed building who becomes the greatest telescope maker the world has ever seen the hot tempered Dane whose nose is lopped off in a duel over mathematics the merchant's apprentice forced to choose between the lure of money and his passion for astronomy and the musician who astounds the world by discovering a new planet from his own backyard Generously illustrated with diagrams period engravings and paintings Parallax is an unforgettable tale that illuminates the distinctly human side of science

The Voyager Neptune Travel Guide ,1989 **News from Mars** Joshua Nall,2019-08-13 Mass media in the late nineteenth century was full of news from Mars In the wake of Giovanni Schiaparelli s 1877 discovery of enigmatic dark straight lines on the red planet astronomers and the public at large vigorously debated the possibility that it might be inhabited As rivalling scientific practitioners looked to marshal allies and sway public opinion through newspapers periodicals popular books exhibitions and encyclopaedias they exposed disagreements over how the discipline of astronomy should be organized and how it should establish acceptable conventions of discourse News from Mars provides a new account of this extraordinary episode in the history of astronomy revealing how major transformations in astronomical practice across Britain and America were inextricably tied up with popular scientific culture and a transatlantic news economy that enabled knowledge to travel As Joshua Nall argues astronomers were journalists too eliding practice with communication in consequential ways As writers and editors they played a pivotal role in the emergence of a new astronomy dedicated to the study of the physical constitution and life history of celestial objects blurring harsh distinctions between those who produced esoteric knowledge and those who disseminated it
