## **Resolving The Security Dilemma In Europe The German Debate On Non Offensive Defence:**

**Resolving the Security Dilemma in Europe** Bjørn Møller, 1991 For the first time since the beginning of the Cold War more than 40 years ago the political determinants of military security in Europe are changing much more quickly than the technological ones Non offensive defence is now a more acceptable strategy than it was before and this book points towards realistic solutions to the problems of excessive dependence on nuclear weapons and or self defeating offensive force structures The ideas examined are especially important for British and American audiences since the Anglo Saxon countries are the ones most wedded to NATO orthodoxy and therefore the slowest to react to the current wave of change

*Non-Offensive Defence for the Twenty-First Century* Bjørn Møller, 2019-03-11 This anthology constitutes an attempt to take stock of the debate on non offensive defence after the Cold War providing information on a research project that was initiated in 1985 at the Centre for Peace and Conflict Research in Copenhagen

**Concepts of Non-Provocative Defence** G. Wiseman, 2001-12-18 This book examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars

**Resolving the Security Dilemma in the Gulf Region** Bjørn Møller, 1997

Nonoffensive Defense Unidir United Nations Institute For Disarmament Research, 2021-01-26 This book first published in 1990 examines the theories on nonoffensive or nonprovocative defence that arose at the end of the Cold War The debate around the theories is analysed here including the claims that nonoffensive defence would lead to conventional stability security at lower levels of armaments and reduce suspicion leading to peace and stability

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in

relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it **Ibss: Political Science: 1991**

British Library of Political and Economic Science,1993 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **Defensive Restructuring of the Armed Forces in Southern Africa** Bjørn

Møller,Gavin Cawthra,2019-01-15 Published in 1997 the work explores the reorientation of security policies and the accompanying restructuring of the armed forces going on in Southern Africa under entirely new circumstances Democracy has come to South Africa the civil wars in Angola and Mozambique have ended and the region is establishing a regional framework for cooperation While covering the entire region a special focus is placed on South Africa which is predestined to play a leading role but which is struggling with the legacy of the apartheid regime and its repeated aggressions against neighbouring states A defensive restructuring of the South African of the South African military is an element in the building of mutual trust The implications of such defensive restructuring to a non offensive defence are described in detail In addition to the analytical contribution the work also contains central documents and a bibliography **Contemporary Security**

**Analysis and Copenhagen Peace Research** Stefano Guzzini,Dietrich Jung,2003-12-25 This book examines the development of peace research and explores its present challenges focusing on the contribution made by the Copenhagen Peace Research Institute The authors investigate how peace research relates to security studies and international relations providing a comprehensive study of conceptual innovations and a discussion of secu *Contemporary Security Studies* Alan

Collins,2025 **Security Expertise** Trine Villumsen Berling,Christian Bueger,2015-04-10 This volume brings together scholars from different fields to explore the power consequences and everyday practices of security expertise Expertise mediates between different forms of knowledge scientific and technological legal economic and political knowledge This book offers the first systematic study of security expertise and opens up a productive dialogue between science and technology studies and security studies to investigate the character and consequences of this expertise In security theory the study of expertise is crucial to understanding whose knowledge informs security making and to reflect on the impact and responsibility of security analysis In science and technology studies the study of security politics adds a challenging new case to the agenda of research on expertise and policy The contributors investigate cases such as academic security studies security think tanks the collaboration between science anthropology and the military transnational terrorism and the ethical consequences of security expertise Together they challenge our understanding of how expertise works and what

consequences it has for security politics and international relations This book will be of particular interest to students of critical security studies sociology science and technology studies and IR security studies in general **Security and Environment in the Mediterranean** Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century

*Security* Barry Buzan, Ole Wæver, Jaap de Wilde, 1998 Sets out a comprehensive framework of analysis for security studies examining the distinctive character and dynamics of security in five sectors military political economic environmental and societal It rejects traditionalists case for restricting security in one sector arguing that security is a particular type of politics applicable to a wide range of issues and offers a constructivist operational method for distinguishing the process of securitization from that of politicization Annotation copyrighted by Book News Inc Portland OR [Security, Arms Control and Defence Restructuring in East Asia](#) Bjørn Møller, 2019-01-22 First published in 1998 this volume examines East Asia especially Northeast Asia which has been a region of considerable political security of importance for several key reasons It features several great and medium powers China Japan and Russia as well as North and South Korea Even though no arms race is yet discernible among these states with the partial exception of the two Koreas it is conceivable that one might commence If it did the level of militarization could become quite alarming if only because of the tremendous and rapidly growing economic potential of the regional states Even though relations among regional states except the two Koreas are currently peaceful the region features several unresolved issues e.g. concerning territory and a historical legacy of enmity between several states To prevent such conflicts of interest from erupting into armed conflict is of the utmost importance A stabilizing factor is that the military potentials in the region are still predominantly defensively oriented i.e. most states lack the requisite power projection or invasion capabilities to inflict serious harm on each other However this might change in the not so distant future Hence the importance of confidence building measures of an institutionalization of regional relations and of a strengthening of commitments to defensive military strategies and postures **The National Security of Small States in a Changing World** Efraim Inbar, Gabriel Sheffer, 2013-09-13 The first part of this book is primarily devoted to

analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world s small states

The Economics of Conflict and Peace Jurgen Brauer, William G. Gissy, 2017-07-05 This work addresses new directions in research on the economic theory of conflict the cost of war and the benefits of peace A collection of 17 papers drawing on contributors from all continents the volume is divided into four sections The first discusses novel ways to think about the economics of conflict and peace from theory perspectives These include discussions of conflict from the perspectives of standard neoclassical analysis and economic geography An especially interesting paper in this section addresses conflict in the context of the emerging theory of international public finance A second section deals with military expenditures economic human development and economic growth in the US and developing nations of Asia and Africa The volume enters new territory in sections three and four Section three contains a set of papers on the economic cost of war and war s aftermath significantly expanding economists rather modest efforts to date Section four is concerned with how the concepts of economics might be operationalized and institutionalized to foster security

War, Peace and International Security Jan Eichler, 2016-12-09 This book examines and explains the dialectic of war and peace between the outbreak of WWI and the Russian annexation of Crimea in 2014 The theoretical inspiration is built upon Galtung s concept of negative and positive peace Aron s distinction between strategy and diplomacy and Carr s theory of periodization Here the author compares globalization with the interwar period and examines how the first decade s positive peace diplomacy and big hopes were replaced by negative peace and explains the growing role of military strategy which culminated after the Russian annexation of Crimea and the following military incidents between NATO and Russia This volume will be of interest to teachers students and researchers in the fields of modern history international security and peace studies

The Future of the United Nations System Chadwick F. Alger, 1998 What does the future hold for the UN In this book twenty two scholars from all continents contribute twelve chapters that cover prevention of violence creating economic and social structures that sustain human fulfilment sharing and protecting the commons and peace education The search for future potential based on experience in these twelve laboratories leads to sixty six recommendations for new institutions and programs on issues that include controlling weapons humanitarian intervention collaboration between UN peacekeepers and NGOs human rights economic policies advancement of women refugees ecological security communications and peace education These recommendations are brought together in a concluding chapter and summarized in the appendix Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies Instead their implementation would require creative efforts of Member States secretariats NGOs and dedicated individuals

that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life This is stimulating reading for anyone who wants to be challenged to think creatively about the potential for coping with a growing array of global problems *Current Bibliographical Information* Dag Hammarskjöld Library, 1992 Elusive Security Laura Neack, 2007 This clear and concise text offers a comprehensive comparison of national international and human security concepts and policies Laura Neack argues that security remains elusive because of a centuries old ethic insisting that states are the primary and most important international actors can rely ultimately only on themselves for protection and must keep all options on the table for national security The author compellingly demonstrates how a state first security ethic ultimately fails to secure states the international community and most important human beings Although security as a concept can be widened to include almost any aspect of existence Neack focuses especially on security from physical violence beginning with efforts by states to defend themselves against violent attack She explores such topics as the internal and external dimensions of security terrorism and defending the homeland threat perception and responses preemptive and preventive wars and other military interventions Next Neack examines efforts over the past century to protect states through the construction of the United Nations international security system and how collective security peacekeeping and peace enforcement have been used in that system Throughout Neack shows that human security has only mattered in terms of servicing the state s security needs a critique she takes up directly in the final chapters A range of short and extended case studies are offered to illustrate the conceptual materials and policy debates over security In this state first world we only can choose between degrees of insecurity true security remains elusive
