Resistance Paul L. Wachtel, 1982-03

RESISTANCE AND THE PROCESS OF THERAPEUTIC CHANGE Paul L Wachtel Psychotherapy whether practiced from a psychodynamic or a behavioral point of view is rarely as straightforward as textbooks and case reports usually seem to imply More often the work proceeds in fits and starts and often does not seem to be proceeding at all but rather unraveling or moving backward The typical case is in fact quite atypical Almost all cases present substantial difficulties for which the therapist feels at least some of the time quite unprepared Practicing psychotherapy is a difficult if also rewarding way to earn a living It is no profession for the individual who likes certainty predictability or a fairly constant sense that one knows what one is doing There are few professions in which feeling stupid or stymied is as likely to be a part of one's ordinary professional day even for those at the pinnacle of the field Indeed I would be loath to refer a patient to any therapist who declared that he almost always felt effective and clear about what was going on Such a feeling can be maintained I believe only by an inordinate amount of bravado and lack of critical self reflection But the therapist trying to get some ideas about how to work with 1 These are of course not the only two points of view in psychotherapy nor do I believe they are the only two of value

American Journal of Psychotherapy, 1947

Resistance, Rebellion and Refusal in Groups Richard M. Billow, 2018-04-24 The author expands and develops his ideas first presented in *Relational Group Psychotherapy From Basic Assumptions to Passion* He constructs a theoretically sophisticated yet experience near approach to contemporary group therapy Building on Bion's striking theoretical realignment replacing the polarity unconscious conscious with infinite finite the author revises traditional concepts and terms to offer a new model of relational group psychotherapy In this book he defines the essential therapeutic task to address the hunger for truth an appetite stimulated by the group itself Group members bring infinite potential into the room but the truth that is developed and realized is bounded by the nature of their interrelationships individual psychologies and perspectives as well as by human limitations in processing experience to make it meaningful How the therapist along with group members assess and respond to the need for truth in the immediate clinical context create the phenomena of resistance rebellion and refusal
