The conference was attended by researchers, teachers, students, and engineers in the field of mathematical statistics and economic analysis. Through data statistics and analysis, we can quickly understand the pattern of economic development. This conference combines mathematical statistics and economic analysis, explores the relationship between the two, and provides a platform for experts and scholars in the fields of mathematical statistics and economic analysis to discuss related issues and exchange ideas. Therefore, we hope to create a forum for sharing research results and exploring future research directions so that participants can learn about the latest research directions, contents, and results of mathematical statistics and economic analysis. Secondly, we hope that the conference can provide solutions to the major problems facing mathematical statistics and economic analysis and create a space that encourages discussion and joint development of research, technological development, and innovation.

Tigar Trash V. Browning-Ferris Industries, Inc, 1977 African Perspectives on Genetic Resources Kent Nnadozie, 2003 **A National Plan for Energy Research, Development & Demonstration** United States. Energy Research and Development Administration, 1975 Handbook of Research on Artificial Intelligence in Human Resource Management Strohmeier, Stefan, 2022-03-08. This cutting-edge Handbook offers a comprehensive introduction to the emerging research field of artificial intelligence (AI) in human resource management (HRM). Broadly mapping AI fields relevant for HR, it not only considers the more well-known areas of machine learning and natural language processing but also lesser-known fields such as affective computing and robotic process automation.

Learning and Innovation in Natural Resource Based Industries Allan Dahl Andersen, Anabel Marín, 2020-06-04. This book develops and articulates a new perspective on the relationship between natural resources and development by foregrounding issues of innovation, knowledge, and industrial dynamics. Despite growing academic attention to the relationship between economic development and natural resources in social sciences, the issue has received rather limited attention in the field of Innovation Studies. This is problematic given the centrality of innovation and technological change for growth and development. Against that background, this book makes three contributions: Firstly, it summarizes and synthesizes existing insights about learning and innovation in Natural Resource Based Industries. Secondly, it develops new insights based on original research work. Thirdly, it distills and explains the remaining research challenges in the field. Containing important insights for researchers, businesses, and policymakers, this book will be useful to all those with an interest in navigating a natural resource-based development pathway. This book was originally published as a special issue of *Innovation and Development*.
