Responding To The Challenges Of Developmental Education New Directions For Community Colleges:

Responding to the Challenges of Developmental Education Carol A. Kozieracki, 2005-04-20 Developmental education is a core mission of the community college and approximately 40 percent of entering community college students enroll in one or more developmental math English or reading courses The existing literature recommends several instructional and organization practices for developmental educators to follow in addressing the needs of those students Despite the availability of these models however community colleges each facing its own unique combination of students needs and available resources continue to struggle in their efforts to effectively educate underprepared students and help them move onto and succeed in college level courses This volume of New Directions for Community Colleges offers a realistic assessment of the difficulties community colleges face in attempting to assist students who share the common characteristic of being underprepared for college level work but whose backgrounds academic preparation motivational levels and goals are extraordinarily varied The authors discuss the dangers of isolating developmental students faculty and curriculum from the broader academic structure of the college They provide examples of successful programs and offer a range of recommendations that college administrators can adapt to their campuses and student populations They also call for additional research on developmental education especially systematic assessments of existing programs and qualitative research that captures the perceptions of the students for whom these programs are designed **Using Typological**

Approaches to Understand College Student Experiences and Outcomes Shouping Hu, Shaoqing Li, 2011-12-20 Facing a new round of criticisms on the quality of undergraduate education in American colleges and universities higher education administrators are eager to find or create effective programs and practices that can enrich student experiences and enhance outcomes In order to do that those who work at colleges and universities need to have a better understanding of their students Institutional researchers with access to a wealth of student data have the analytical expertise to supply information that can guide institutional policy and practice Typological frameworks particularly can be used to generate such information and this volume presents rich examples of typological approaches to the study of college students Typological research can reveal patterns in students characteristics attitudes and behaviors and how those patterns are related to desirable outcomes such as learning and persistence or to the nature meaning and utility of student faculty interactions outside the classroom Such information can help campus leaders and other concerned groups gain a deeper understanding of their students design better targeted and intentional interventions to optimize student experiences and maximize student learning and personal development outcomes This is a special supplemental issue of New Directions for Institutional Research Always timely and comprehensive this series provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management *Marginalized Students* Elizabeth M. Cox, Jesse S. Watson, 2011-10-18 Summary Gone are the days when the term diversity may have been

used to solely signify the color of one's skin or gender. This volume examines how diverse and marginalized populations are situated within American community colleges and pushes the boundaries of our understanding of these terms. The editors and contributing authors examine various student groups as well as give voice to the marginalization felt by a group of faculty. Topics include: Examining the concept of student marginalization through a framework based on Dewey's 1916 work *Democracy and Education*; Experiences of Adult English as Second Language learners; Seeing the community college environment through the eyes of student athletes; Current research on lesbian, gay, bisexual, transgender, and queer (LGBTQ) community college students and the need for more research; Student veterans; Underprepared college students; And community college faculty in correctional institutions. The volume concludes with key resources for anyone who works with or researches marginalized populations. The resources include sources for further reading, existing organizations serving various marginalized groups, and some possible funding opportunities.

Completing College

Vincent Tinto, 2012-03-01. Even as the number of students attending college has more than doubled in the past forty years, it is still the case that nearly half of all college students in the United States will not complete their degree within six years. It is clear that much remains to be done toward improving student success. For more than twenty years, Vincent Tinto's pathbreaking book *Leaving College* has been recognized as the definitive resource on student retention in higher education. Now with *Completing College*, Tinto offers administrators a coherent framework with which to develop and implement programs to promote completion. Deftly distilling an enormous amount of research, Tinto identifies the essential conditions enabling students to succeed and continue on within institutions. Especially during the early years, he shows that students thrive in settings that pair high expectations for success with structured academic, social, and financial support, provide frequent feedback and assessments of their performance, and promote their active involvement with other students and faculty. And while these conditions may be worked on and met at different institutional levels, Tinto points to the classroom as the center of student education and life and therefore the primary target for institutional action. Improving retention rates continues to be among the most widely studied fields in higher education, and *Completing College* carefully synthesizes the latest research and most importantly translates it into practical steps that administrators can take to enhance student success.

Understanding Community

Colleges John S. Levin, Susan Kater, 2013. *Understanding Community Colleges* provides a comprehensive review of the community college landscape: management and governance, finance, student demographics and development, teaching and learning, policy, faculty, and workforce development, and bridges the gap between research and practice. This contributed volume brings together highly respected scholars in the field who rely upon substantial theoretical perspectives: critical theory, social theory, institutional theory, and organizational theory for a rich and expansive analysis of community colleges. The latest text to publish in the *Core Concepts in Higher Education* series, this exciting new text fills a gap in the higher education literature available for students enrolled in Higher Education and Community College graduate programs. This text

provides students with A review of salient research related to the community college field Critical theoretical perspectives underlying current policies An understanding of how theory links to practice including focused end of chapter discussion questions A fresh examination of emerging issues and insight into contemporary community college practices and policy
