Civilian Participants in the Cultural Revolution Francis Mok, 2019-11-25 In the ten years of the Cultural Revolution political persecutions violation of rights deprivation of freedom violence and brutality were daily occurrences Especially striking is the huge number of ordinary civilians who were involved in inflicting pain and suffering on their comrades colleagues friends neighbors and even family members The large scale and systematic form of violence and injustice that was witnessed differs from that in countries like Chile under military rule or South Africa during apartheid in that such acts were largely committed by ordinary people instead of officials in uniforms Mok asks how we should assess the moral responsibility of these wrongdoers if any for the harm they did both voluntarily and involuntarily After the death of Chairman Mao there was a trial of the Gang of Four who were condemned as the chief perpetrators of the Cultural Revolution Besides tens of millions of officials and cadres who were wrongly accused and unfairly treated were subsequently cleared and reinstated under the new leadership However justice has not yet been fully done because no legal or political mechanism has ever been established for the massive number of civilian perpetrators to answer for all sorts of violence inflicted on other civilians to make peace with their victims and to make amends The numerous civilians who participated need to come to terms with the people they wronged in those turbulent years Justice in general and transitional justice in particular may still be pursued by taking the first steps to clarify and identify the moral burden and responsibility that may legitimately be ascribed to the various types of participant This book will be of interest to anyone who studies the Cultural Revolution of China especially those who are concerned with the ethical dimension

Clinical Trials and the African Person Ike Iyioke, 2018-05-23 Clinical Trials and the African Person aims to position the African notion of the self person within the clinical trials context As opposed to autonomy based principlism this other regarding communalist perspective is the preferred alternative model This tactic draws further attention to the inadequacy of the principlist approach particularly in multicultural settings It also engenders a rethink stimulates interest and re assesses the failed assumptions of universal ethical principles As a novel attempt that runs against much of the prevailing Euro American intellectual mood this approach strives to introduce the African viewpoint by making explicit the import of the self in a re contextualized arena meaning within the community and a given milieu Thus research ethics must go beyond autonomy based considerations for the individual to rightly embed him/her within his/her community and the environment

Handbook of Moral and Character Education Larry Nucci, Tobias Krettenauer, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more

Centering Educational Administration Robert J. Starratt, 2003-04-02 In this book Starratt enters the national conversation among educational administration scholars and practitioners about what constitutes the core of their knowledge and practice In Part I he develops three main themes

cultivating meaning community and moral responsibility which he then positions against national themes about the core of educational administration school improvement democratic community and social justice Rather than focusing on the routine managerial tasks normally associated with school administration budgeting personnel and legal problems time and resource management etc this text asks aspiring school leaders to reflect first on the underlying philosophical and sociological perspectives that constitute the substance of administrative work in education Centering Educational Administration provides A Unique Perspective on Leadership The author views leadership as organically related to teaching and learning as concerned with internal capacity building in response to state imposed accountability pressures and as an existential process of writing one s autobiography through their day to day work An Interdisciplinary View of Educational Administration Centering Educational Administration asks educational administrators to bring contemporary philosophical ethical and anthropological issues as well as learning theory social theory and political theory into their thinking about the daily operation of the school A Unique Perspective on School Improvement This text asserts that school improvement narrowly defined as improving results on high stakes tests can likewise place the nation at risk An equally important agenda is teaching the young the basic satisfactions norms and potential of using their knowledge in the service of the community and of a wider humanity Exercises in Reflective Practice This book challenges the reader to use the ideas of each chapter to analyze the current practices in their school and to propose concrete changes to improve the teaching and learning environment of their school
