Responsive Schools Renewed Communities:

Responsive Schools, Renewed Communities Clifford W. Cobb, 1992 Choice in education is an issue of community empowerment As Clifford W Cobb demonstrates in this persuasive look at school choice the most effective schools are those founded in a community of parents students and teachers working together toward shared goals Cobb maintains that this kind of mutually supportive organization is essential to rescue not only our children s education but also the communities that protect us from the increasing domination of our lives by large bureaucratic institutions We must begin he believes to trust parents to choose the schools that best serve their needs and the needs of their children or to start their own schools if they have to This book makes a convincing case that the best way to achieve meaningful choice is through a system of enrollment vouchers used in conjunction with deregulation of public schools Cobb explains why watered down plans restricting choice to state controlled schools are sure to fail Reform must be complete In the system he proposes vouchers would be distributed to families for all children of school age and could be redeemed at either public or nonpublic schools of those families choice At the same time public schools would be allowed to operate as effectively as nonpublic schools free of the dead hand of bureaucracy This volume presents a wealth of evidence in support of vouchers describing programs in the United States as well as voucher like systems in other countries The author recounts the success of a voucher system for higher education the GI Bill and cites functioning voucher programs for housing and daycare He establishes that the contest surrounding vouchers is incorrectly seen as a struggle over public or private control of education Instead the political dialogue should be concerned with whether democracy is more likely to thrive where there is diversity fostered by choices If we blot out the distinctive features of subgroups within the United States Cobb warns we will destroy an important source of national strength Even if supporting community poses a risk of too much diversity he finds that a risk worth taking Cobb uses factual case studies to show how vouchers can enable poor families to help themselves Even without a voucher plan a surprising number of low income families already make use of nonpublic schools Desperate to get a child out of a debilitating public school environment a family living below the poverty line may forgo free schooling and choose instead a school where tuition must be paid a heroic act he observes entirely unrecognized by those who attack vouchers as elitist and contrary to democratic principles Cobb also describes how vouchers will offer racial and ethnic minorities the option of supporting integrated schools or of establishing separate schools in which to develop their own community leadership If you think of vouchers as subsidies for the rich this book will change your mind The author s deep belief in the potential of choice to build self governing communities together with the practical evidence he assembles in support of vouchers will give readers hope for the future of our schools and our society

Committee on Banking, Housing, and Urban Affairs, 1996 **After the Crash** Mason Gaffney, 2009-11-16 This book analyzes in a new way the causes of the current crash by showing how such events derive from real estate bubbles and their interactions with banks and other lenders Analyzes the current crisis of the real estate crash and explains the recurring cycle which led to it Examines why frequent assessments are crucial to making the property tax an effective method of preventing speculative real estate bubbles Combines theoretical analysis with observed cycles of land speculation to demonstrate the impact on the modern economy **Unproductive School Choice Debates** John Merrifield, Nathan Gray, 2023-05-22 The book explains why we desperately need an Open Education Industry It clearly defines the term and the confusion about what can should be done to improve schooling outcomes and why over 30 years of efforts to improve schooling outcomes has left all 51 US school systems far short of what is needed to engage all schoolchildren in high value instruction Because of past education failures especially poor basic literacy in economic systems many influential academics and activists have asserted the presence of adequate market forces where key elements of high performing markets are absent and have become pre occupied with discussion of and development of devastating inappropriate generalizations about findings from studies of narrowly targeted restriction laden expansions of access to alternatives to traditional public schools The book compares those to transformational school choice expansions and describes key steps towards the inertia that threatens the future of America as a prosperous and free republic Language, Culture, and Community in Teacher Education Maria Estela Brisk, 2013-09-13 Published by Routledge for the American Association of Colleges for Teacher Education This volume

addresses the pressing reality in teacher education that all teachers need to be prepared to work effectively with linguistically and culturally diverse student populations Every classroom in the country is already or will soon be deeply affected by the changing demographics of America's students Marilyn Cochran Smith's Foreword and Donaldo Macedo's Introductory Essay set the context with respect to teacher education and student demographics followed by a series of chapters presented in three sections knowledge practice and policy The literature on language education has typically been discussed in relation to preparing ESL or bilingual teachers Typically needs of culturally and linguistically diverse students including immigrants refugees language minority populations African Americans and deaf students have been addressed separately This volume emphasizes that these children have both common educational needs and needs that are culturally and linguistically specific It is directed to the preparation of ALL teachers who work with culturally and linguistically diverse students It not only focuses on how teachers need to change but how faculty and curriculum need to be transformed and how to better train teacher education candidates to understand and work efficaciously with the communities in which culturally and linguistically diverse students tend to be predominant The American Association of Colleges for Teacher Education AACTE is a national voluntary association of higher education institutions and related organizations Our mission is to promote the learning of all PK 12 students through high quality evidence based preparation and continuing education for all school personnel For more information on our publications visit our website at www.aacte.org The Essential Renewal of America's Schools Carl Glickman,Ian M. Mette,2020 What can educational leaders do to create schools that are purposeful moral and successful This book outlines a practical framework to replace dependence on top down state and federal regulations with locally guided initiatives to address local goals Building on Glickman's classic *Renewing America's Schools* this resource is for anyone involved with school change in today's complex times The School Choice Wars John Merrifield,2001-03-07 What does the term school choice mean to you Opponents of parental choice have muddied its definition misleading parents and educators and drawing public debate away from the core issues In a book geared for anyone who wants to better understand this hotly contested topic Merrifield clarifies the proposals in existence today defining the key concepts related to choice Arguing for a competitive education industry he discusses policy and political strategy mistakes while suggesting corrections This informative book covers government regulation issues typical fallacies diversity issues private voucher initiatives and experiments and empirical evidence about competition **Earning and Learning** Susan E. Mayer,Paul E. Peterson,2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children's ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what

schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship
