Future Robots Domenico Parisi,2014-06-15 This book is for both robot builders and scientists who study human behaviour and human societies Scientists do not only collect empirical data but they also formulate theories to explain the data Theories of human behaviour and human societies are traditionally expressed in words but today with the advent of the computer they can also be expressed by constructing computer based artefacts If the artefacts do what human beings do the theory blueprint that has been used to construct the artefacts explains human behaviour and human societies Since human beings are primarily bodies the artefacts must be robots and human robots must progressively reproduce all we know about human beings and their societies And although they are purely scientific tools they can have one very important practical application helping human beings to better understand the many difficult problems they face today and will face in the future and perhaps to find solutions for these problems **Robots through the Ages** Robert Silverberg,Bryan Thomas

Schmidt,2023-07-25 A remarkable collection *Robots through the Ages* includes stories from some of the best writers of science fiction both old and new This anthology with an introduction by Robert Silverberg offers a sweeping survey of robots as depicted throughout literature Since *The Iliad* in which we are shown golden statues built by Hephaestus with minds and wisdoms humans have been fascinated by the idea of artificial life From the *Argonautica* to the medieval Jewish legend of the Golem and Ambrose Bierce's tale of a chess playing robot the idea of what robots are and who creates them can be drastically different This book collects a broad selection of short stories from celebrated authors such as Philip K Dick

Sean McGuire, Roger Zelazny, Connie Willis and many more. Robots through the Ages not only celebrates the history of robots and the genre of science fiction but the dauntless nature of human ingenuity.

Blockchain and Applications

Javier Prieto, Ashok Kumar Das, Stefano Ferretti, António Pinto, Juan Manuel Corchado, 2019-06-25 This book gathers the refereed proceedings of the 1st International Congress on Blockchain and Applications 2019 BLOCKCHAIN 19 held in Vila Real, Portugal in June 2019. Among the scientific community, blockchain and artificial intelligence are broadly considered to offer a promising combination that could transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no generally accepted approach nor established best practices for combining blockchain and artificial intelligence. The 21 papers presented here were carefully reviewed and selected from over 40 submissions. They highlight the latest advances in blockchain, artificial intelligence, and their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools, and identifying critical issues and challenges that researchers and practitioners will face in the near future. We wish to thank the sponsors: IEEE Systems, Man, and Cybernetics Society Spain Section Chapter and the IEEE Spain Section Technical Co-Sponsor, IBM, Indra, Viewnext, Global Exchange, AEPIA, APPIA, and AIR institute.
