## **Restless River International Law And The Behavior Of The Rio Grande:**

**Restless River** Jerry E. Mueller,1975      **Reconsidering Regions in an Era of New Nationalism** Alexander Finkelstein,Anne Farrar Hyde,2023 Regions connect and divide us even as global economies weather and germs batter us Historians literary scholars and social scientists use region to ground and challenge ideas about national belonging In **Reconsidering Regions in an Era of New Nationalism** Alexander Finkelstein and Anne F Hyde have assembled leading scholars of regionalism to discuss the relationship of region to nation The contributors explore how historical forces have changed regional associations and how regional associations have changed culture and history The themes of culture space and institutions organize this volume contributors historicize how race and racial thinking have evolved as a major force to define region and nation over time the essays raise questions about the stability and validity of canonical regions in U S history to find new complexity in how these blocs form and how they understand themselves and they focus on historicist and conjunctural trends in how institutions and ordinary people conceive regions through political and cultural processes over time Challenging ideas about both national belonging and local association the contributors emphasize how regional analysis deepens understanding of migration race borders infrastructure climate and Native sovereignty      *Mapping Latin America* Jordana Dym,Karl Offen,2011-12-01 For many a map is nothing more than a tool used to determine the location or distribution of something a country a city or a natural resource But maps reveal much more to really read a map means to examine what it shows and what it doesn't and to ask who made it why and for whom The contributors to this new volume ask these sorts of questions about maps of Latin America and in doing so illuminate the ways cartography has helped to shape this region from the Rio Grande to Patagonia In *Mapping Latin America* Jordana Dym and Karl Offen bring together scholars from a wide range of disciplines to examine and interpret more than five centuries of Latin American maps Individual chapters take on maps of every size and scale and from a wide variety of mapmakers from the hand drawn maps of Native Americans to those by famed explorers such as Alexander von Humboldt to those produced in today's newspapers and magazines for the general public The maps collected here and the interpretations that accompany them provide an excellent source to help readers better understand how Latin American countries regions provinces and municipalities came to be defined measured organized occupied settled disputed and understood that is how they came to have specific meanings to specific people at specific moments in time The first book to deal with the broad sweep of mapping activities across Latin America this lavishly illustrated volume will be required reading for students and scholars of geography and Latin American history and anyone interested in understanding the significance of maps in human cultures and societies      **International Law: New Actors, New Concepts - Continuing Dilemmas** Budislav Vukas,Trpimir Sosic,2010-04-06 The *Liber Amicorum* is published on the occasion of the retirement of Professor Bo idar Bakoti from the University of Zagreb Faculty of Law after an impressive career that started in 1961 His colleagues and former students have contributed to this collection of essays

dealing with a variety of topics in the fields of international law which Professor Bakoti himself has been most active in. Therefore the majority of essays deal with the subjects of international law: the various international regimes of spaces, the international protection of human rights and humanitarian law, the settlement of international disputes and the law of armed conflicts. Notwithstanding the specific international developments over the last twenty years in the geographic area where Professor Bakoti has served Southeastern Europe, all the authors of the contributions to this *Liber Amicorum* have dealt with their topics at the level of general international law. The book comprises 32 essays from scholars who had close relations with Professor Bakoti in the course of his career at the Zagreb Faculty of Law, in various other law schools and international organisations, in the International Law Association, in the Croatian Ministry of Foreign Affairs and its Diplomatic Academy. The majority of essays are in English and six are in French.

**La Gran Línea** Paula Rebert, 2010-07-05. The Treaty of Guadalupe Hidalgo, which officially ended the U.S.-Mexican War in 1848, cost Mexico half its territory while the United States gained land that became California, Nevada, Utah, Texas, and parts of Colorado, Arizona, and New Mexico. Because the new United States-Mexico border ran through territory that was still incompletely mapped, the treaty also called for government commissions from both nations to locate and mark the boundary on the ground. This book documents the accomplishments of both the U.S. and the Mexican Boundary Commissions that mapped the boundary between 1849 and 1857, as well as the fifty-four pairs of maps produced by their efforts and the ongoing importance of these historical maps in current boundary administration. Paula Rebert explores how, despite the efforts of both commissions to draw neutral scientific maps, the actual maps that resulted from their efforts reflected the differing goals and outlooks of the two countries. She also traces how the differences between the U.S. and Mexican maps have had important consequences for the history of the boundary.

**Texas International Law Journal**, 1983. Spaces of Law in American Foreign Relations Daniel S. Margolies, 2011. In the late nineteenth century, the United States oversaw a great increase in extraterritorial claims, boundary disputes, extradition controversies, and transborder abduction and interdiction. In this sweeping history of the underpinnings of American empire, Daniel S. Margolies offers a new frame of analysis for historians to understand how novel assertions of legal spatiality and extraterritoriality were deployed in U.S. foreign relations during an era of increased national ambitions and global connectedness. Whether it was in the Mexican borderlands or in other hot spots around the globe, Margolies shows that American policy responded to disputes over jurisdiction by defining the space of law on the basis of a strident unilateralism. Especially significant and contested were extradition regimes and the exceptions carved within them. Extradition of fugitives reflected critical questions of sovereignty and the role of the state in foreign affairs during the run-up to overseas empire in 1898. Using extradition as a critical lens, *Spaces of Law in American Foreign Relations* examines the rich embeddedness of questions of sovereignty, territoriality, legal spatiality, and citizenship and shows that U.S. hegemonic power was constructed in significant part in the spaces of law, not simply through war or trade.

**Borders** Paulina Ochoa Espejo, 2020 When are borders justified Who has a right to control them Where should they be drawn Today people think of borders as an island's shores Just as beaches delimit a castaway's realm so borders define the edges of a territory occupied by a unified people to whom the land legitimately belongs Hence a territory is legitimate only if it belongs to a people unified by a civic identity Sadly this Desert Island Model of territorial politics forces us to choose If we want territories then we can either have democratic legitimacy or inclusion of different civic identities but not both The resulting politics creates mass xenophobia migrant bashing hoarding of natural resources and border walls To escape all this On Borders presents an alternative model Drawing on an intellectual tradition concerned with how land and climate shape institutions it argues that we should not see territories as pieces of property owned by identity groups Instead we should see them as watersheds as interconnected systems where institutions people the biota and the land together create overlapping civic duties and relations what the book calls place specific duties This Watershed Model argues that borders are justified when they allow us to fulfill those duties that border control rights spring from internationally agreed conventions not from internal legitimacy that borders should be governed cooperatively by the neighboring states and the states system and that border redrawing should be done with environmental conservation in mind The book explores how this model undoes the exclusionary politics of desert islands

**The Rio Grande Basin, Global Climate Change Scenarios**, 1991 **Big Bend National Park Biosphere Reserve: Bibliography** John A. Bissonette, 1985 **Mapping Nature across the Americas**

Kathleen A. Brosnan, James R. Akerman, 2021-10-19 Maps are inherently unnatural Projecting three dimensional realities onto two dimensional surfaces they are abstractions that capture someone's idea of what matters within a particular place they require selections and omissions These very characteristics however give maps their importance for understanding how humans have interacted with the natural world and give historical maps especially the power to provide rich insights into the relationship between humans and nature over time That is just what is achieved in Mapping Nature across the Americas Illustrated throughout the essays in this book argue for greater analysis of historical maps in the field of environmental history and for greater attention within the field of the history of cartography to the cultural constructions of nature contained within maps This volume thus provides the first in depth and interdisciplinary investigation of the relationship between maps and environmental knowledge in the Americas including for example stories of indigenous cartography in Mexico the allegorical presence of palm trees in maps of Argentina the systemic mapping of US forests and the scientific platting of Canada's remote lands
