examination of the place of remorse in psychotherapeutic interventions with criminal offenders The book's jurisprudential chapters explore the problem of how offender remorse is proved in court and the contentious issues concerning the effect that remorse and its absence should have on sentencing criminal offenders The legal and psychological perspectives are then interwoven in a discussion of the role of remorse in restorative justice In *Remorse Psychological and Jurisprudential Perspectives* Proeve and Tudor bring together insights of neighbouring disciplines to advance our understanding of remorse It will be of interest to theoreticians in psychology law and philosophy and will be of benefit to practising psychologists and lawyers

**The Emotional Brain and the Guilty Mind** Federica Coppola, 2021-02-11 This book seeks to reframe the normative narrative of the culpable person in American criminal law through a more humanising lens It embraces such a reframed narrative to revise the criteria of the current voluntarist architecture of culpability and to advance a paradigm of punishment that positions social rehabilitation as its core principle The book constructs this narrative by considering behavioural and neuroscientific insights into the functions of emotions and socio environmental factors within moral behaviour in social settings Hence it suggests culpability notions that reflect a more contextualised view of human conduct and argues that such revised notions are better suited to the principle of personal guilt Furthermore it suggests a model of punishment that values the dynamic power of change of individuals and acknowledges the importance of social relationships and positive environments to foster patterns of social re integration Ultimately this book argues that the potential adoption of the proposed models of culpability and punishment which view people through a more comprehensive lens may be a key factor for turning criminal justice into a less punitive more inclusionary and non stigmatising system
