Restoring Demand In The World Economy Trade Finance And Technology:

Restoring Demand in the World Economy Joseph Halevi, Jean-Marc Fontaine, 1998 During the past two decades the macroeconomic policy debate has been dominated both in developed and developing countries by supply side considerations Distinguished contributors to this important new book conclusively argue that this has led towards depression at a world level and particularly in transitional and developing economies *Restoring Demand in the World Economy* examines the necessity to rehabilitate the role of effective demand in both the analysis of past economic events and in shaping current economic policy At the theoretical level the contributors argue conclusively that the level of effective demand and the aggregate distribution of income play a dominant role in the macroeconomic framework of all economic systems This economic theory is then applied to specific situations including austerity and monetary union in Europe the demand implosion in Eastern Europe and the former USSR the problem of financial fragility in developing countries the demand links between East Asia Japan and the United States inflation paranoia deflationary gaps and imbalances in the major industrial countries the failure of post war schemes for the stabilization of global demand This important contribution presents a strong case for rehabilitating the role of demand in economic policy and decision making This book will be of use to economic theorists policymakers and academics with an interest in international economics

Harcourt, Peter Kriesler, Joseph Halevi, John Nevile, 2017-03-21 Joseph Halevi G C Harcourt Peter Kriesler and J W Nevile bring together a collection of their most influential papers on post Keynesian thought Their work stresses the importance of the underlying institutional framework of the economy as a historical process and therefore of path determinacy In addition their essays suggest the ultimate goal of economics is as a tool to inform policy and make the world a better place with better being defined by an overriding concern with social justice Volume II assess application and policies *Knowledge as Value* Ian Morley, Mira Crouch, 2008 This book considers the place and value of knowledge in contemporary society Knowledge is not a self evident concept both its denotations and connotations are historically situated Since the Enlightenment knowledge has been a matter of discovery through effort and knowledge for its own sake a taken for granted ideal underwriting progressive education as a process which not only taught for and about something but also ennobled the soul While this ideal has not been explicitly rejected in recent decades there has been a tacit move away from a strong emphasis on its centrality even in Higher Education The authors address the values that inform knowledge production in its present forms and seek to identify social and cultural factors that support these values Against the background of increasingly restrictive conditions of academic work the first section of this volume offers incisive critiques of Higher Education with examples drawn from Australia and New Zealand The second group of chapters considers how academics have viewed and have tried to adapt to present circumstances The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend and perhaps try and improve our relationship to learning and knowledge in the 21st Century This timely book will be of particular interest to workers in higher education it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization Methodology, Microeconomics and Keynes Philip Arestis, Meghnad Desai, Sheila C.
