Theodore H. Cohn

Restructuring The Gatt System:

Restructuring the Gatt John H. Jackson, 1990 The multilateral trading system based on the General Agreement on Tariffs and Trade GATT is being eroded by a shift to bilateralism surging protectionism and flouting of its rules by the major trading countries The inclusion of the complex issues of services intellectual property and investment in the Uruguay Round has only increased the strain on the GATT s structure Reform and strengthening of the GATT system can no longer be delayed Jackson argues that part of the problem lies in the defective constitutional nature of the GATT itself He examines the institutional and constitutional changes the GATT would need in order to contain protectionist pressure and respond to the new issues in the evolving international economy Jackson outlines the provisions of a new charter that would strengthen the foundations of the system His proposed reform challenges policymakers and practitioners to think beyond the modest objectives of the Uruguay Round Unedited summary from book cover

The Oxford Handbook of International Trade Law Daniel L.

Bethlehem, 2009 Over the past 10 years the content and application of international trade law has grown dramatically The WTO created a binding dispute settlement process and in resolving disputes the judicial organs of the WTO have built up a substantial amount of new international trade law Emerging from this new WTO process is an international trade law system that is in some respects self contained and in other respects overlapping and linked to other international legal economic and

political regimes The boundaries of trade law are now generating enormous interest and controversy which at a broader level is subsumed within the debate over globalization The detailed development of the rules of international trade is being examined with increasing frequency by scholars government officials and trade law practitioners But how does it fit with existing systems How it is modified by them How does the international trade law system affect and modify other regimes This Handbook places international trade law within its broader context providing comment and critique on contemporary thinking on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with States and other aspects of the international system It examines the economic and institutional context of the world trading system its substantive law including regional trade regimes and the settlement of disputes The final part of the book explores the wider framework of the world trading system considering issues including the relationship of the WTO to civil society the use of economic sanctions state responsibility and the regulation of multinational corporations

Trade and Environment United States. Congress. Office of Technology Assessment, 1992

Governing Global Trade Theodore H. Cohn, 2017-05-15 Cohn s topic of global trade is of enormous and proliferating interest He provides a good background from 1945 to the present and on core contemporary themes such as civil society participation and the

domesticisation of the trade agenda Whilst there is a wealth of literature on policy oriented aspects such as negotiating rounds there are few that provide the careful comprehensive historical overview that this work offers and none that do so with reference to international institutions such as the G7 Quad OECD and UNCTAD as well as the WTO in global trade governance This seminal work has been awarded the British Columbia Political Science Association Weller Prize for 2003 Cohn s political science background will appeal directly to a university audience and a broader public policy market It is also suitable for those interested in trade in the cognates of economics and law This work s theoretical framework embraces and synthesises the major approaches in the field of international relations and will be appropriate for the dominant schools of realists and liberal institutionalists alike It could therefore be apt for courses on international relations theory or international political economy taught in a theoretical mode This book reinforces and broadens the focus of all previous works in The G8 and Global Governance series

Sugar and the Making of International Trade Law Michael Fakhri, 2014-11-27 This book traces the changing meanings of free trade over the past century through three sugar treaties and their concomitant institutions The 1902 Brussels Convention is an example of how free trade buttressed the British Empire The 1937 International Sugar Agreement is a story of how a group of Cubans renegotiated their state s colonial relationship with the US through free trade doctrine and the League of Nations In addition the study of the 1977 International Sugar Agreement maps the world of international trade law through a plethora of institutions such as the ITO UNCTAD GATT and international commodity agreements all against the backdrop of competing Third World agendas Through a legal study of free trade ideas interests and institutions this book highlights how the line between the state and market domestic and international and public and private is always a matter of contest
