## **Restructuring The Global Military Sector Vol 2 The End Of Military Fordism:**

An Empire of Indifference Randy Martin, 2007-03-14 Analyzes imperial ambitions in the context of the dominance of finance not simply as a form of capital but also as a set of protocols for organizing daily life      **The End of Military Fordism** Mary Kaldor, Basker Vashee, 1998-04-22 Part of a 2 volume analysis written by a team of key experts from around the world this text studies the changes taking place within the military sector The conclusion is that there has been little in the way of a peace dividend      Military Waste Joshua O. Reno, 2020-02-04 World War III has yet to happen and yet material evidence of this conflict is strewn everywhere resting at the bottom of the ocean rusting in deserts and floating in near Earth orbit In Military Waste Joshua O Reno offers a unique analysis of the costs of American war preparation through an examination of the lives and stories of American civilians confronted with what is left over and cast aside when a society is permanently ready for war Using ethnographic and archival research Reno demonstrates how obsolete military junk in its various incarnations affects people and places far from the battlegrounds that are ordinarily associated with warfare Using a broad swath of examples from excess planes ships and space debris that fall into civilian hands to the dispossessed and polluted island territories once occupied by military bases to the militarized masculinities of mass shooters Military Waste reveals the unexpected and open ended relationships that non combatants on the home front form with a nation permanently ready for war      **The Globalization of Security** B. Mabee, 2009-05-21 The Globalization of Security is an important rethinking of the connections between globalization and security focusing on a conceptual examination of the role of the state combined with key case studies The book provides a novel historical sociological approach advancing both the understanding of security and the theory of state power      **Arms Diffusion** Thomas W. Zarzecki, 2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997      European Space Policy Thomas Hoerber, Paul Stephenson, 2015-09-25 Space policy is at the cutting edge of current EU policy developments and is a fascinating object of study involving multiple and diverse actors It is also an original and contemporary lens for studying European policy making This book explores advances in European space policy and their significance for European integration Using a framing methodology it addresses central questions in European studies in order to form an interdisciplinary bridge between current research in space policy and contemporary European political studies It assesses the interests of EU institutions in space and how these institutions perceive space policy Furthermore it demonstrates that space is a cross cutting policy domain affecting a diverse range of EU policy fields such as security transport and migration

and underpinning the 21st century European and global economy In doing so this volume firmly locates space policy in the field of European Studies This innovative volume will be of key interest to students and scholars of a range of policy areas including common foreign and security policy technology policy transport policy internal market policies environmental policy development aid and disaster risk management as well as the EU institutions **Bottom-Up Politics** D.

Kostovicova,M. Glasius,2011-12-08 Adopting a people centred perspective to globalization the authors explore complex counterintuitive and even unintended forms and consequences of bottom up politics going beyond simplistic understandings of ordinary people as either victims or beneficiaries of globalization **Demilitarization in the Contemporary World**

Peter N. Stearns,2013-11-16 Contemporary world history has highlighted militarization in many ways from the global Cold War and numerous regional conflicts to the general assumption that nationhood implies a significant and growing military Yet the twentieth century also offers notable examples of large scale demilitarization both imposed and voluntary

Demilitarization in the Contemporary World fills a key gap in current historical understanding by examining demilitarization programs in Germany Japan Honduras Guatemala El Salvador and Costa Rica In nine insightful chapters this volume s contributors outline each nation s demilitarization choices and how they were made They investigate factors such as military defeat border security risks economic pressures and the development of strong peace cultures among citizenry Also at center stage is the influence of the United States which fills a paradoxical role as both an enabler of demilitarization and a leader in steadily accelerating militarization Bookended by Peter N Stearns thought provoking historical introduction and forward looking conclusion the chapters in this volume explore what true demilitarization means and how it impacts a society at all levels military and civilian political and private The examples chosen reveal that successful demilitarization must go beyond mere troop demobilization or arms reduction to generate significant political and even psychological shifts in the culture at large Exemplifying the political difficulties of demilitarization in both its failures and successes Demilitarization in the Contemporary World provides a possible roadmap for future policies and practices *Anthrax* Jeanne Guillemin,1999 This book has implications in an era of growing concern over chemical and biological weapons **Mapping European security after Kosovo** Peter Van Ham,Sergei Medvedev,2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license In the story of post Cold War conceptual confusion the war in and over Kosovo stands out as a particularly interesting episode This book provides new and stimulating perspectives on how Kosovo has shaped the new Europe It breaks down traditional assumptions in the field of security studies by sidelining the theoretical worldview that underlies mainstream strategic thinking on recent events in Kosovo The book offers a conceptual overview of the Kosovo debate placing these events in the context of globalisation European integration and the discourse of modernity and its aftermath It then examines Kosovo s impact on the idea of war One of the great paradoxes of the war in Kosovo was that it was not just one campaign but two there was the ethnic cleansing campaign in Kosovo and the allied bombing

campaign against targets in Kosovo and all over Serbia Serbia's killing of Kosovo has set the parameters of the Balkanisation integration nexus offering Europe and the West in general a unique opportunity to suggest itself as the strong centre that keeps the margins from running away Next it investigates Kosovo as a product of the decay of modern institutions and discourses like sovereignty statehood the warring state or the United Nations system Kosovo has introduced new overtones into the European Weltanschauung and the ways in which Europe asserts itself as an independent power discourse in a globalising world increasingly diffident looking for firm foundations in the conceptual void of the turn of the century

**War as Business** Armin Krishnan, 2016-03-03 The privatization of defence assets and the outsourcing of military services from the armed forces to the private sector is an increasing trend This book approaches the issue of military privatization by linking it to the transformation of the defence industries since the early 1990s and shows the extent to which many military functions and activities ranging from military research to military consulting training to operational support services have already been outsourced in the US and in Europe This detailed study provides new and updated information on the ongoing privatization of the defence sector and offers an original theoretical explanation as to why the most modern armed forces throughout the world have come increasingly to rely on private companies for nearly everything they do Contributing to a better understanding of military privatization and its close connection to technological change the book explains the complexity of the whole phenomenon and discusses its implications for national and international security
