Wassenberg,2013-02-18 Large housing estates for some people these three words symbolise all that is wrong in urban planning Large is wrong because many people prefer a living surrounding that reflects the human scale Housing as a single function is wrong because mixed areas are livelier And estates are wrong as these refer to top down planned areas which the residents themselves have no say in Although many such estates function well others have proved to be in serious problems The question is how to deal with this legacy For these estates to recover an integrated solution is needed Large scale problems require large scale interventions The Amsterdam Bijlmermeer area has been the most deprived and stigmatised area in the Netherlands for at least a quarter of a century despite its glorious design in the 1960s The Bijlmermeer can now be considered as a leading case for area regeneration The author has followed this fascinating neighbourhood for years and provides an analysis of its construction fall and recovery Moreover he compares the Bijlmermeer with many other large housing estates in the Netherlands and abroad and analyses what conclusions may be of use for other areas      **Mass Housing in Europe** Sako Musterd,2009-11-30 Based on empirical research from 29 major postwar housing estates in 15 European cities this collection explores mass housing experiments examining the problems policy responses and residents everyday experiences in the estates in the context of change and regeneration      Sustainable Communities and Urban Housing Montserrat Pareja-Eastaway, Nessa Winston,2016-12-08 Since the start of the twenty first century urban communities have faced increasing challenges in housing affordability with environmental issues causing additional concern It is clear that changes to urban housing are needed to enhance the resilience of cities and improve the economic social and physical well being of residents This book provides a comparative cross national perspective on urban housing and sustainability in Europe exploring the key barriers and drivers associated with sustainable urban development and community regeneration Country specific chapters allow for easy comparison with each summarizing how sustainable housing operates in the country in question before going on to discuss the key barriers and drivers at play This book brings a sustainability perspective to the comparative housing literature which frequently fails to integrate the social economic and environmental pillars of sustainability The book outlines many of the changes that professionals and residents will need to
