Masculinity and Student Success in Higher Education Jonathan M. Bowman,D. Craig Filar,2017-12-15 This practical resource identifies complex issues associated with masculinity in higher education providing administrators and faculty with research based strategies for supporting the success of this student group Grounded in interdisciplinary social science theories and representative case studies this book unpacks the experience of college men while simultaneously addressing the various identities they embrace or are assigned Masculinity and Student Success in Higher Education shares strategies on increasing enrollment engagement and persistence of men in higher education across racial ethnic and socioeconomic distinctions By successfully interrogating their own campus practices readers can better address issues of diversity while also supporting and engaging the social and academic factors that contribute to student success *The Impact of a Sense of Belonging in College* Erin Bentrim,Gavin W. Henning,2023-07-03 Sense of belonging refers to the extent a student feels included accepted valued and supported on their campus The developmental process of belonging is interwoven with the social identity development of diverse college students Moreover belonging is influenced by the campus environment relationships and involvement opportunities as well as a need to master the student role and achieve academic success Although the construct of sense of belonging is complex and multilayered a consistent theme across the chapters in this book is that the relationship between sense of belonging and intersectionality of identity cannot be ignored and must be integrated into any approach to fostering belonging Over the last 10 years colleges and universities have started grappling with the notion that their approaches to maintaining and increasing student retention persistence and graduation rates were no longer working As focus shifted to uncovering barriers to student success while concurrently recognizing student success as more than solely academic factors the term student sense of belonging gained traction in both academic and co curricular settings The editors noticed the lack of a consistent definition or an overarching theoretical approach as well as a struggle to connect disparate research A compendium of research applications and approaches to sense of belonging did not exist so they brought this book into being to serve as a single point of reference in an emerging and promising field of study

Radical Reimagining for Student Success in Higher Education Jo Arney,Timothy Dale,Glenn Davis,Jillian Kinzie,2023-07-03 Co published with the American Association of State Colleges and Universities AASCU which sponsored the project from which the book emerged This book answers the question What would your institution look like if students really mattered The authors argue that really putting student success at the center of attention will require a radical reimagining of higher education Much of what is presented here is grounded in the findings of the American Association of State Colleges and Universities AASCU s Re Imagining the First Year RFY initiative which brought together 44 member institutions over a three year period to identify and test programs strategies and tools aimed at improving retention rates for first year students The book makes a provocative set of arguments about what is possible if campuses radically reimagine

their culture practices structures and rules with the primary purpose of helping students succeed in college and beyond

Completing College Vincent Tinto, 2012-04-15 Even as the number of students attending college has more than doubled in the past forty years it is still the case that nearly half of all college students in the United States will not complete their degree within six years It is clear that much remains to be done toward improving student success For more than twenty years Vincent Tinto's pathbreaking book *Leaving College* has been recognized as the definitive resource on student retention in higher education Now with *Completing College* Tinto offers administrators a coherent framework with which to develop and implement programs to promote completion Deftly distilling an enormous amount of research Tinto identifies the essential conditions enabling students to succeed and continue on within institutions Especially during the early years he shows that students thrive in settings that pair high expectations for success with structured academic social and financial support provide frequent feedback and assessments of their performance and promote their active involvement with other students and faculty And while these conditions may be worked on and met at different institutional levels Tinto points to the classroom as the center of student education and life and therefore the primary target for institutional action Improving retention rates continues to be among the most widely studied fields in higher education and *Completing College* carefully synthesizes the latest research and most importantly translates it into practical steps that administrators can take to enhance student success

student retention rates and success **Minority Student Retention** Alan Seidman, 2019-05-23 Student retention continues to be a vexing problem for all colleges and universities In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals and graduate the figures have not improved over time This is particularly true for minority students who have a greater attrition rate than majority students Demographic information shows that the minority population in the United States is growing at a faster rate than the majority It is imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students Retention rates should not differ appreciably among different racial ethnic groups The Journal of College Student Retention Research Theory and Practice is the only scholarly peer reviewed journal devoted solely to college student retention It has published many articles on minority student retention and this topic continues to garner much attention This book is a compilation of the very best of these articles selected on the basis of reviews by a cadre of experts in the education field The articles discuss African American Latino Latina Asian and Asian Pacific Native American and biracial students and institutional commitments to retaining a diverse student population For those interested in this vital area the collection will teach and inspire them to achieve greater heights and pay additional attention to retaining minority students in our colleges and universities **Student Success in the Community College** Terry U. O'Banion, Marguerite M. Culp, 2020-12-15 For much of the twentieth century the definition of success for most community colleges revolved around student retention and graduation This definition no longer works if it ever did In Student Success in the Community College What Really Works respected community college leaders researchers and innovators argue that student success is about redesigning community colleges in a manner that is consistent with each college's mission goals student population and resources Concluding that there is no one size fits all approach to increasing student success chapter authors analyze national state and regional efforts to increase student success identify principles institutions can use to frame student success initiatives and outline specific actions community colleges can take to increase student and institutional success Student Success in the Community College What Really Works also provides concrete examples of effective student success initiatives in a variety of community college settings
