virus entirely As COVID 19 shows diseases ideas and xenophobic and racist discourses know no borders Plans that transcend borders are vital when dealing with global threats such as climate change and pandemics **The political materialities of borders** Olga Demetriou,Rozita Dimova,2018-10-18 The Political Materialities of Borders seeks to produce social theory at from the border rather than apprehending the border as mere epiphenomenon to urban or state driven social theoretical dynamics it calls for a specificity to the border in border studies as a rejuvenated space for theoretical enquiry

Medicalising borders Sevasti Trubeta,Christian Promitzer,Paul Weindling,2021-05-11 The research of pandemics epidemics and pathogens like COVID 19 reaches far beyond the scope of biomedicine It is not only an objective for the health political and social sciences but epidemics and pandemics are a matter of geography foci and vectors of communicable diseases continue to test the efficacy of medical control at state borders This volume illuminates these issues from various disciplinary viewpoints It starts by exploring historical models of quarantine spatial isolation and detention as precautionary means against the dissemination of disease and contagion by border crossers migrants and refugees Besides the patterns of prejudice with which these groups are confronted the book also deals with various kinds of fear of contamination from outside of the nation state The contributors address the implementation of medical techniques at state borders in the twentieth and early twenty first centuries as well as the presently practiced measures of medical and biometric screening of migrants and refugees Uniquely this volume shows that the current border security regimes of Western states exhibit a high share of medicalised techniques of power which originate both in European modernity and in the medical and biological disciplines developed during the last quarter of the millennium Drawing on the collective expertise of a network of international researchers this interdisciplinary volume is essential reading for those wishing to understand the medicalisation of borders across the globe from the early eighteenth century up to the present day *Of Borders and Thresholds* Michal Kobińska,1999 The theatre is full of borders and boundaries between the real and illusionary conditions of the stage between the way one acts onstage and in real life between stage and audience performance and reception As such theatre offers a unique opportunity to examine the construction representation and functioning of borders This is the task undertaken by the authors of this volume the first to apply the lexicon and concepts of border theory to theatre history and performance theory The contributors highly regarded theatre historians theorists and practitioners address a wide range of border related themes Their topics include the construction of America in the sixteenth century theatre practices in eighteenth century England American Latino playwrights performances of gender and sexuality cyborg technologies and fashion Border abolitionism Martina Tazzioli,2023-07-11 Building on an abolitionist perspective this book offers an essential critique of migration and border policies unsettling the distinction between migrants and citizens This is the only book that brings together carceral abolitionist debates and critical migration literature It explores the multiplication of modes of migration confinement and detention in Europe examining how these are justified in the name of migrants protection It argues that the

collective memory of past struggles has partly informed current solidarity movements in support of migrants A grounded critique of migration policies involves challenging the idea that migrants rights go to the detriment of citizens An abolitionist approach to borders entails situating the right to mobility as part of struggle for the commons Intimacy and mobility in an era of hardening borders Haldis Haukanes, Frances Pine, 2021-04-13 This book is a collection of articles by anthropologists and social scientists concerned with gendered labour care intimacy and sexuality in relation to mobility and the hardening of borders in Europe Interrogating the relation between physical geopolitical borders and ideological conceptual boundaries this book offers a range of vivid and original ethnographic case studies that will capture the imagination of anyone interested in gendered migration policies of inclusion and exclusion and regulation of reproduction and intimacy The first part of the book presents ethnographic and phenomenological discussions of people s changing lives as they cross borders how people shift transgress and reshape moral boundaries of proper gender and kinship behaviour and moral economies of intimacy and sexuality In the second section the focus turns to migrants navigation of social and financial services in their destination countries putting questions about rights and limitations on citizenship at the core The final part of the book scrutinises policy formation at the level of state examining the ways that certain domains become politicised and disputed at different historical junctures while others are left outside of the political

Boxing Pandora Timothy William Waters, 2020-01-07 A timely and provocative challenge to the foundations of our global order why should national borders be unchangeable The inviolability of national borders is an unquestioned pillar of the post World War II international order Fixed borders are believed to encourage stability promote pluralism and discourage nationalism and intolerance But do they What if fixed borders create more problems than they solve and what if permitting borders to change would create more stability and produce more just societies Legal scholar Timothy Waters examines this possibility showing how we arrived at a system of rigidly bordered states and how the real danger to peace is not the desire of people to form new states but the capacity of existing states to resist that desire even with violence He proposes a practical democratically legitimate alternative a right of secession With crises ongoing in the United Kingdom Spain Ukraine Iraq Syria Sudan and many other regions this reassessment of the foundations of our international order is more relevant than ever

West African Studies Borders and Conflicts in North and West Africa OECD, Sahel and West Africa Club, 2022-02-19 This publication examines the role of border regions in shaping patterns of violence since the end of the 1990s in North and West Africa Using the innovative OECD Spatial Conflict Dynamics indicator SCDi the report looks at the growing relationship between political violence and borderlands at the regional level by analysing more than 170 000 violent events between January 1997 and June 2021 and through the exploration of case studies in the Central and Eastern Sahel

Border Women Debra A. Castillo, María Socorro Tabuenca Córdoba, 2002 A transnational analysis with an emphasis on gender examines the work of women writers from both sides of the border writing in Spanish English or a mixture of the two languages whose work questions the accepted notions of border

identities **Europe's Border Crisis** Nick Vaughan-Williams, 2015-10-01 Europe's Border Crisis explores current dynamics in EU border security and migration management. It argues that a crisis point has emerged because irregular migrants are seen as both a security threat to the EU and also as a life threatened and in need of protection. This leads to paradoxical situations whereby humanitarian policies and practices expose irregular migrants to often dehumanizing and sometimes lethal border security mechanisms. The dominant way of understanding these dynamics, one that blames a gap between policy and practice, fails to address the deeper issues at stake and ends up perpetuating the terms of the crisis. Drawing on conceptual resources in biopolitical theory, the book offers an alternative diagnosis and sets out a new research agenda for the interdisciplinary field of critical border and migration studies. Toward a New Art of Border Crossing Ananta Kumar Giri, Arnab Roy Chowdhury, David Blake Willis, 2024-11-05 Boundaries, borders and margins are related concepts and realities, and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness. The logics of stasis and closure, as well as cults of exclusivist and exclusionary sovereignty, are reflected and embodied in the closed, xenophobic conceptualization and organization of boundaries, borders and margins. But an open conceptualization of the borderlands, where mixing and hybridity take place at a rapid, even dizzying pace, gives rise to Creolization at the threshold of sovereignties, which can also be imagined. At present, our border zones are spaces of anxiety-ridden security arrangements, violence and death. The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels, which produces bare lives, bodies and lands. We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non-sovereignties. Border zones can also be zones of meetings, communication, transcendence and festive celebration of the limits of our identities. Thus, we need a new art and politics of boundary transmutation, transformation and transcendence in the broadest possible sense that entails the production of spatial, scalar, somatic, cognitive, affective and spiritual transitions. Borderscaping: Imaginations and Practices of Border Making Chiara Brambilla, Jussi Laine, Gianluca Bocchi, 2016-04-15 Using the borderscapes concept, this book offers an approach to border studies that expresses the multilevel complexity of borders from the geopolitical to social practice and cultural production at and across the border. Accordingly, it encourages a productive understanding of the processual, de-territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows, as well as showcasing border research as an interdisciplinary field with its own academic standing. Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a challenge to national and EU policies and borders as potential elements of political innovation through conceptual re-framings of social, political, economic and cultural spaces. The authors offer a nuanced and critical re-reading and understanding of the border, not as an entity to be taken for granted but as a place of investigation and as a resource in terms of the construction of novel geo-political imaginations, social and spatial imaginaries and cultural images. In so doing, they suggest that rethinking borders

means deconstructing the interweaving between political practices of inclusion exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity The result is a book that proposes a wandering through a constellation of bordering policies discourses practices and images to open new possibilities for thinking mapping acting and living borders under contemporary globalization *Placing the Border in Everyday Life* Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state's territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization *A Research Agenda for Border Studies* James W. Scott, 2020-12-25 This innovative Research Agenda uncovers links between different levels of border making processes or bordering from the political to the cognitive and connects everyday processes and experiences of border making to the wider social world It addresses the question of how everyday bordering practices and discourses can be productively linked to different aspects of social relations *The Routledge Handbook of Smuggling* Max Gallien, Florian Weigand, 2021-12-21 The Routledge Handbook of Smuggling offers a comprehensive survey of interdisciplinary research related to smuggling reflecting on key themes and charting current and future trends Divided into six parts and spanning over 30 chapters the volume covers themes such as mobility borders violent conflict and state politics as well as looks at the smuggling of specific goods from rice and gasoline to wildlife weapons and cocaine Chapters engage with some of the most contentious academic and policy debates of the twenty first century including the historical creation of borders re bordering the criminalisation of migration and the politics of selective toleration of smuggling As it maps a field that contains unique methodological ethical and risk related challenges the book takes stock not only of the state of our shared knowledge but also reflects on how this has been produced pointing to blind spots and providing an informed vision of the future of the field Bringing together established and emerging scholars from around the world The Routledge Handbook of Smuggling is an indispensable resource for students and researchers of conflict studies borderland studies criminology political science global development anthropology sociology and geography **South Asia** Dhananjay Tripathi, Sanjay Chaturvedi, 2021-11-24 Post colonial and post partition South Asia one of the fastest growing and yet one of the least

integrated regions of the world is marked by both optimism and pessimism This intriguing dichotomy of strength and weakness security and insecurity hope and fear connections and disconnects underpins South Asia s regionalism conundrum and gives birth to borders and boundaries both material and mental with a complex territoriality The Janus faced nature of South Asian borderlands the inward nationalizing impulses entangled with the outward regional frontier orientations is a stark reminder that history of mobility in this eco geographical region is much older than the history of territoriality and colonial cartography and ethnography This collection of meticulously researched theoretically informed case studies from South Asia provides useful insights into bordering ordering and othering narratives as practices and performances that are intricately entangled with identity politics and security discourses It shows how a sharper focus on subterranean subregionalism s border communities popular geopolitics of enmity and transborder challenges to sustainability could open up spaces for new multiple re imaginings of borders at diverse scales and sights including sub urban neighbourhoods school textbooks cinema and trans border conservation initiatives The chapters in this edited volume have been contributed by both renowned as well as young emerging scholars looking into the borders and boundaries in South Asia Each chapter offers new perspectives and insights into themes like trans Himalayan borderlands India Pakistan physical and mental borders Afghanistan Pakistan border and numerous social boundaries that we see in everyday South Asia The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies
