**Rethinking Development**, 1999 Papers presented at the International Conference on Kerala's Development Experience organized in New Delhi from 8 to 11 December 1996      **Rethinking Development Economics** Ha-Joon Chang, 2003

Impressive provides a very good compendium of what are usually classified as heterodox development economics an excellent volume Journal of International Development This important new collection tackles the failure of neoliberal reform to generate longterm growth and reduce poverty in many developing and transition economies As dramatically demonstrated in the collapse of the WTO's Seattle talks there is increasing dissatisfaction in both developing and developed countries with the emerging neoliberal global economic order The resignations of Joseph Stiglitz and Ravi Kanbur from the World Bank emphasize that this disillusionment with the orthodoxy now exists at the very heart of the establishment Yet the increasing demand for an alternative to this orthodoxy is not being met Over the last few decades the older generation of development economists have been edged out of most major universities particularly in the USA The situation in most developing countries is even worse although there is more demand for alternatives to orthodox development economics these countries have even less capability to generate such alternatives Rethinking Development Economics is intended to fill this gap It addresses key issues in development economics ranging from macroeconomics finance and governance to trade industry agriculture and poverty Bringing together some of the foremost names in the field this comprehensive and timely collection constitutes a critical staging post in the future of development economics      Rethinking Development Peter Preston, 2012-07-26 First published in 1987 this volume stresses the importance of development studies for sociology as P W Preston argues that this field of study is emerging from the technical social scientific ghetto back into the mainstream of the classical tradition of social theorizing represented by Marx Weber and Durkheim Preston discusses the position of development studies in relation to the wider group of the social sciences in general and to sociology in particular Using examples mainly from the study of Southeast Asia he looks at the diversity of available modes of social theoretic engagement and considers the work of the colonial administrator scholar the humanist academic scholar and the scholar who theorises on behalf of the planners discusses the mode of political writing and Marxian analyses of development and considers the particular problems surrounding the elites of post colonial nation states      Rethinking Development in Latin America Charles H. Wood, Bryan R. Roberts, 2010-11-01      **Rethinking Development Geographies** Marcus Power, 2004-08-02

Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of

geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change **Rethinking Development Geographies** is also grounded in a concern with people and places the view from below the views of women and the view from the South **Rethinking Development in East Asia** Pietro P. Masina, 2002 Masina reassesses the last thirty years of economic development in East Asia in light of recent dramatic events challenging scholars and policy makers to critically review development strategies Rethinking Development Kyōng-dong Kim, 1985

**Perspectives on Global Development 2019 Rethinking Development Strategies** OECD, 2018-11-29 In 2008 the weight of developing and emerging economies in the global economy tipped over the 50% mark for the first time Since then Perspectives on Global Development has been tracking the shift in global wealth and its impact on developing countries How much longer can the dividends of **Rethinking Workplace Learning and Development** Karen E. relationship between culture and politics by focusing on the country of Sri Lanka      Beyond US Hegemony in International Development Jiajun Xu, 2017 This book provides essential background on China's bid for increasing influence over the US hegemonic architecture of international financial institutions      *Development Anthropology* Riall Nolan, 2018-02-06 Students will really appreciate this book It has a rare combination of humor clarity exceptional writing and above all a precision in outlining skills and knowledge for practice As a professional I learned much that will be useful to me Alexander M Ervin University of Saskatchewan At last a textbook on development anthropology that is comprehensive clearly written and up to date Nolan provides an exceptionally useful framework for analyzing development projects carefully illustrated with mini case studies Linda Stone Washington State University Nolan's book should be a backpack staple for the practitioner of grassroots development Jan Knippers Black Monterey Institute of International Studies *Development Anthropology* is a detailed examination of anthropology's many uses in international development projects Written from a practitioner's standpoint and containing numerous examples and case studies the book provides students with a comprehensive overview of what development anthropologists do how they do it and what problems they encounter in their work The book outlines the evolution of both applied anthropology and international development and their involvement with each other throughout the latter half of the twentieth century It focuses on how development projects work and how anthropology is used in project design implementation and evaluation The final section of the book considers how both development and anthropology must change in order to become more effective An appendix provides practical advice to students considering a career in development anthropology      **Development at the WTO** Sonia E. Rolland, 2012-02-23 Seeking to open paths for reconsidering the trade and development relationship at the WTO this book takes into account both the heritage of the trade regime and its present dynamics It argues that the institutional processes for creating and implementing trade rules at the WTO and the actual regulatory outcomes are inseparable A consideration of the WTO's development dimension must examine both jointly It shows that the shortcomings of the Doha Development Round are in part due to a failure to assess trade rules as part of the legal processes and institutions that produced them This book devotes significant analysis to the systemic impact of the WTO as an institution on developing and least developed members From a pragmatic perspective it provides a coherent and systematic analysis of the legal meaning the implementation and the adjudication of special and differential treatment rules for developing members It then evaluates the different regulatory approaches to trade and development from a more theoretical perspective The book finishes by presenting a range of proposals for a better balance between trade liberalization and the development needs of many WTO members

*State Structure, Policy Formation, and Economic Development in Southeast Asia* Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future
