## **Rethinking The Forms Of Visual Expression:**

*Rethinking the Forms of Visual Expression* Robert Sowers, 1990 Robert Sowers begins this book by questioning our conception of the visual arts painting sculpture and architecture as autonomous archetypal entities that can be defined independent of one another in terms of their materials and techniques He cuts through the limits of categorization we have come to accept to lay the groundwork for a coherent theory of the relation between the visual arts He proposes that we treat the pictorial the sculptural and the architectural not as palpable physical things but as activities the basic forms of visual expression employed to create such distinct artifacts as paintings statues and buildings By defining the expressive function of each art Sowers helps us to understand what we mean when we speak of the sculptural qualities of architecture or the pictorial qualities of sculpture The world of visual art then is a structured whole a world in which the arts can meet merge with and mutually reinforce or swear at one another often in unexpected yet compelling ways

**Rethinking the forms of visual expression** R. Sowers, 1990 **Arnheim, Gestalt and Media** Ian Verstegen, 2019-01-09 This monograph presents a synthesis and reconstruction of Rudolf Arnheim's theory of media Combining both Arnheim's well known writings on film and radio with his later work on the psychology of art the author presents a coherent approach to the problem of the nature of a medium space and time and the differentia between different media The latent ontological commitments of Arnheim's theories is drawn out by affirming Arnheim's membership in the Brentano school of Austrian philosophy which allows his theories to be clarified and strengthened particularly with the metaphysical writings of Roman Ingarden The resulting theory is relational portraying essential medial differences with neutral criteria and allowing for a rigorous definition of a medium The way in which a medium is based on the inherent dispositions of medial materials creates a highly appealing theory that is determinate without being deterministic The theory is thus highly timely as people in media studies seek to address the determinate nature of media after the post medium condition The book will appeal to researchers and graduate students in cultural and media studies as well as architecture and design

**Literatures in the Digital Era** Dolores Romero, Amelia Sanz, 2009-03-26 The application of technology to information communication and culture has been through the history of humanity a key factor in social progress and well being *Literatures in the Digital Era* Theory and Praxis analyses in its twenty chapters the impacts of digital technology for the contemporary culture The literary system is being powerfully affected in three aspects In the first place computer resources have been used to preserve and edit literary texts associating to them graphical material links with related texts or with dictionaries and above all developing search tools of concordance and syntactic semantic analysis Secondly we are watching the birth of a digital literature with new generic characteristics new creators with knowledge of both technological mechanisms and literary resources and a reader capable of interpreting and enjoying texts on the screen Thirdly literary theory has expressed new postulates with regard to the multiple authorship of digital texts the disintegration of the textual meaning the intertextuality and implications of the reader in the creation

process and the interpretation of the texts These three impacts imply for some authors the search of a new paradigm for the creation reading and interpretation of digital texts which points to a new humanism *Rethinking the High Renaissance* Jill Burke,2017-07-05 The perception that the early sixteenth century saw a culmination of the Renaissance classical revival only to degrade into mannerism shortly after Raphael s death in 1520 has been extremely tenacious but many scholars agree that this tidy narrative is deeply problematic Exploring how we can reconceptualize the High Renaissance in a way that reflects how we research and teach today this volume complicates and deepens our understanding of artistic change Focusing on Rome the paradigmatic centre of the High Renaissance narrative each essay presents a case study of a particular aspect of the culture of the city in the early sixteenth century including new analyses of Raphael s stanze Michelangelo s Sistine Ceiling and the architectural designs of Bramante The contributors question notions of periodization reconsider the Renaissance relationship with classical antiquity and ultimately reconfigure our understanding of high Renaissance style

the settings for complex and diversified rituals of religious social and political dimensions the buildings today stand in a completely different time frame and are experienced by a different audience This volume addresses the hermeneutics of the development of scholarship concerning the Gothic church reviewing the variable but largely exclusive agendas from the early nineteenth century to the present including those of Viollet le Duc Lef vre Pontalis M le Sedlmayr Von Simson Panofsky Grodecki and Bony The conclusion is that there is no way to return to the original Gothic cathedral or the original audience Artistic Integration in Gothic Buildings reassesses the traditional canon through a new pluralism of approaches and presents the Gothic church as an intricate and complex living monument that has been evolving over eight centuries and more

*Rethinking Oral History and Tradition* Nepia Mahuika, 2019 For many indigenous peoples oral history is a living intergenerational phenomenon that is crucial to the transmission of our languages cultural knowledge politics and identities Indigenous oral histories are not merely traditions myths chants or superstitions but are valid historical accounts passed on vocally in various forms forums and practices *Rethinking Oral History and Tradition An Indigenous Perspective* provides a specific native and tribal account of the meaning form politics and practice of oral history It is a rethinking and critique of the popular and powerful ideas that now populate and define the fields of oral history and tradition which have in the process displaced indigenous perspectives This book drawing on indigenous voices explores the overlaps and differences between the studies of oral history and oral tradition and urges scholars in both disciplines to revisit the way their fields think about orality oral history methods transmission narrative power ethics oral history theories and politics Indigenous knowledge and experience holds important contributions that have the potential to expand and develop robust academic thinking in the study of both oral history and tradition **Rethinking Oral History and Tradition** N<sup>e</sup>pia Mahuika, 2019-10-09

Indigenous peoples have our own ways of defining oral history For many oral sources are shaped and disseminated in multiple forms that are more culturally textured than just standard interview recordings For others indigenous oral histories are not merely fanciful or puerile myths or traditions but are viable and valid historical accounts that are crucial to native identities and the relationships between individual and collective narratives This book challenges popular definitions of oral history that have displaced and confined indigenous oral accounts as merely oral tradition It stands alongside other marginalized community voices that highlight the importance of feminist Black and gay oral history perspectives and is the first text dedicated to a specific indigenous articulation of the field Drawing on a Maori indigenous case study set in Aotearoa New Zealand this book advocates a rethinking of the discipline encouraging a broader conception of the way we do oral history how we might define its form and how its politics might move beyond a subsuming democratization to include nuanced decolonial possibilities **Painting with Words, Writing with Pictures** Franco Ricci, 2001-01-01 Ricci s book ranges widely over Calvino s oeuvre to illustrate the accuracy of the idea articulated by Calvino himself that a visual image lies at the origin of all his narrative The book s main theme is the difficult interface between word and image that Calvino

struggled with throughout his career the act of perception that rendered visible that which was invisible and transformed what was seen into what is read Ricci holds that Calvino's narrative has an imagocentric program and that his literary strategy is ekphrastic i.e. it is characterized by literary description of visual representation real or imaginary The book is interdisciplinary in nature and will interest not only scholars of literature but also those who work with the visual arts and with information technology
