## **Rethinking The Unthinkable New Directions For Nuclear Arms:**

Rethinking the Unthinkable Ivo H. Daalder, Terry Terriff, 2014-02-04 Rethinking the Unthinkable examines the future direction of nuclear arms control in the post Cold War security environment Believing that the new environment requires a radical rethinking of the purpose and role of nuclear weapons in international politics the contributors address many fundamental issues influencing further US Russian and European nuclear arms reductions This volume is a product of the Project on Rethinking Arms Control sponsored by the Center for International and Security Studies in Maryland **US Nuclear Weapons Policy After the Cold War** Nick Ritchie, 2008-08-08 This book offers an in depth examination of America's nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in policy It provides "The Unthinkable" in Ethics, History and Philosophical Anthropology Sami Pihlström, 2025-02-06 What we find unthinkable is not seriously considered as an ethical option in our thought and deliberation it is ruled out from the outset Combining a broadly pragmatist approach with a Kantian inspired transcendental strategy Sami Pihlström distinguishes between what is considered unthinkable and what is merely ethically wrong Pihlström demonstrates how different issues concerning the unthinkable vs the thinkable ranging from the proper ethical response to the Holocaust to philosophical considerations of monstrous characters familiar in gothic fiction may challenge the categories we use to structure the world In particular he makes the case that it is unthinkable for us to reject the kind of human exceptionalism that attributes an ineliminable dignity or preciousness to human beings Chapters also explore the complex relationship between our responses to human suffering and the suffering of non human animals together with questions concerning the philosophy of war and pacifism The Unthinkable in Ethics History and Philosophical Anthropology turns our attention to the ethically and ontologically constitutive character of the boundaries we draw between the thinkable and the unthinkable while utilizing conceptual and argumentative resources from the Wittgensteinian tradition in moral philosophy particularly from the work of Raimond Gaita An original and timely study it will be welcomed by students and scholars interested in the fundamental ethical issues of human life *Historical Dictionary of Arms Control and Disarmament* Jeffrey A. Strategies of

Arms Control Stuart Croft, 1996 In this groundbreaking analysis Stuart Croft brings the subject of arms control into the era of complex multi polar international relations He moves beyond the narrow definitions of the phenomenon associated with the Cold War to show how it not only has a long past but also a clear future The author begins by tracing the history of agreements between polities over weapons back to ancient times An understanding of this history allows him to put forward a typology of arms control It occurs at the end of major conflicts stabilises balances between states develops norms of behaviour manages weapons proliferation and acts as a tool of international organisations Stuart Croft examines the evolution of these five qualitatively different strategies and applies the typology to arms control agreements in the post Cold War world This definitive new study will be of interest to students in international relations and security studies as well as specialists in these disciplines

*Encyclopedia of Violence, Peace, and Conflict*, 1999-08-16 The *Encyclopedia of Violence Peace and Conflict* a three volume set written by more than 200 eminent contributors from around the world takes advantage of increasing worldwide awareness in the public private commercial and academic sectors about manifestations of violence in all segments of society While the contributors do not use these volumes to make specific arguments they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace

Our reviewers consistently note that while many in depth studies of war peace and aggression exist the attendant specialization keeps scholars from learning about related fields No publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world *The International Dimensions of Internal Conflict* Michael Edward Brown,1996 Internal conflicts threaten many countries and regions globally The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community The second part covers specific problems policy instruments and key actors *Preventing the Use of Weapons of Mass Destruction* Eric Herring,2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist American Power after 9/11 M. Astrada,2010-04-12 This study expounds upon the composition dynamics and consequences of the post 9 11 global security context by positing the following overarching research question how has the event of 9 11 further enabled the US to legitimately articulate disseminate and implement an absolutist security agenda ASA on the world stage *Post-Cold War Security Issues in the Asia-Pacific Region* Colin McInnes,Mark Rolls,2013-07-23 The Asia Pacific region presents a challenge to international security in the post Cold War era Doubts as to the US military commitment concern with Japan s security aspirations build up of military capabilities and the nuclear ambitions of North Korea have further heightened tension **US Military Strategy and the Cold War Endgame** Stephen J. Cimbala,1995 The transition from the end of the Cold War to a new world order is both promising and perilous The US and its NATO allies were caught largely unprepared by the rapid collapse of the Warsaw Pact the sudden demise of the Soviet Union and the reunification of Germany events that redrew the map of East Central Europe and shifted US security concerns eastward in Eurasia They also redefined security as a condition based more on the prevention or containment of regional and civic conflicts compared with the Cold War expectations of global or nuclear war The next century is certain to strain US and NATO strategy considerably if indeed NATO survives at all A new group of interstate institutions for European security will compete for the right to claim pre eminence in security issues International peace keeping and peace enforcement whether United Nations directed or regionally sponsored will also challenge traditional definitions or military missions Changes will also occur in the role of nuclear weapons in military strategy US and Russian strategic nuclear forces will be drastically reduced and both states will take other steps to dampen

the nuclear arms race The antagonists of the Cold War will be the collaborators of the next century in seeking to stabilize conflicts inside and outside Europe      The United States and Europe in the Global Arena F. Burwell, I. Daalder, 1999-08-26  
This book examines cooperation between the United States and Europe on a range of global issues With the Soviet threat no longer a unifying factor the transatlantic partners have sought a new basis for acting together in the post Cold War era The conditions and strategies that determine the success or failure of cooperation in restructuring relations with the East countering the threat of weapons proliferation dealing with so called rogue states and managing the global economy are explored
