## **Rethinking Tuition And Student Aid Strategies New Directions For Higher Education:**

*Rethinking Tuition and Student Aid Strategies* Edward P. St. John, 1995 Many institutions are encountering problems attracting and retaining students due to college costs The tuition and student aid strategies that worked so well for so many institutions in the 1980s are no longer working quite as well This volume is intended to help college and university administrators build a better understanding of alternative ways of approaching pricing decisions in this new context The first four chapters examine the experiences of two states and two institutions that have taken different paths in their tuition and student aid strategies The second four chapters suggest techniques that administrators and policy makers can use in their efforts to evaluate alternative tuition and aid strategies Redesigning the Financial Aid System Robert B. Archibald, 2003-05-22 As the cost of higher education continues to rise students and their families find it increasingly difficult to navigate the financial aid maze In *Redesigning the Financial Aid System* economist Robert Archibald examines the history of the system and its current flaws and he makes a radical proposal for changing the structure of the system Archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer As a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and so have difficulty making a timely choice In addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid Under Archibald's proposed reforms the federal government would assess a student's financial need and provide need based grants while institutions would be responsible for guaranteeing student loans Not only would this new system demystify financial aid and allow students to be better informed about the cost of college earlier in the process but it would greatly simplify the application procedure and prevent financial aid allocation from contributing to the problem of rising tuition costs Archibald's clear explanation of the current system its impact strengths and weaknesses as well as his plans for reform will be of interest to educators administrators students and parents *The Finance of Higher Education* Michael B. Paulsen, John C. Smart, 2001 A wide ranging examination of the governmental and institutional policies and practices and essential theories and areas of research that in combination establish the foundation explore and extend the boundaries and expand the base of knowledge in the **Higher Education: Handbook of Theory and Research 15** J.C. Smart, 2000-05-31 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Higher Education: Handbook of Theory and Research John C. Smart, 2008-03-21 The Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic

critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic      New Directions in Higher Education R. Nata, 2005 Higher education is a complex package of issues which never seems to leave the limelight The primary wedge issues are tuition cost access accountability financial aid government funding sports and their place within higher education academic results societal gains as a whole in terms of international competition and continuing education This new book examines new directions in this ever changing vital and controversial field which has a profound effect on society      Refinancing the College Dream Edward P. St. John, Eric H. Asker, 2014-09-15 During the 1990s rising tuition costs and inadequate federal grant aid prevented more than a million otherwise qualified low income students from continuing their education past high school Education policy expert Edward P St John is troubled by this situation and argues that equal access to higher education is both feasible and just In Refinancing the College Dream he examines recent trends in public funding of education and explores alternatives to financing which would provide equal access to postsecondary education for all Americans The growing gap in the rate of participation in higher education for low income groups compared to upper income groups over the past three decades St John finds has been a direct result of the decreased availability of federal grants even after taking into account such factors as an increased emphasis on strengthening high school graduation requirements To reverse this trend he suggests that policymakers refocus the debate over the public financing of higher education from taxpayer costs to principles of social responsibility and justice along with economic theories of human capital He then shows how improved coordination between state and federal agencies expanded use of loans and better targeting of grant aid can maximize access for low income students while minimizing increases in taxes Making higher education accessible to low income students is one of the crucial challenges for citizens and policymakers in the early twenty first century Refinancing the College Dream offers a theoretical and practical foundation for boldly rethinking the financial strategies used by colleges and universities states and the federal government to accomplish this essential goal      **Education and the Public Interest** Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education In the U S these reforms are rationalized based on intermediate variables like the number of math credits completed in high school and net prices However the reforms rationalized based on this research are seldom evaluated in relation to outcomes i e measures of student achievement and equal opportunity to attain an education In Education and the Public Interest the editor re examines the political rationales for these reforms John Rawls s theory of justice is reconstructed to develop a framework for assessing the effects of public policy on these outcomes This volume undertakes a comparative study of the states in the U S to examine how education reforms influence student achievement high school graduation and college access and finance schemes influence college access Policies implemented by states in the 1990s were associated with improved

achievement as measured by test scores for high school students These policies also correlate with increased high school drop out rates and the widening gap in college enrolment rates across income groups This volume considers how privatization and accountability policies can be reconstructed to reduce inequality while continuing to improve student achievement and college enrolment I enjoyed reading the book and benefited from it and I feel confident others will as well I am particularly taken by its sweep and by the skill and persuasiveness with which the author ties together the broad trends and themes of privatization globalization school reform preparation equity equality and college access Prof James C Hearn Vanderbilt University USA What I especially like about this book is the framing of the importance of the topic in terms of the global political and economic changes and the notion of access to quality education as a basic right Prof Laura W Perna College of Education University of Maryland USA

**Co-Learning in Higher Education** Edward P. St. John, 2022-11-14 Co-Learning in Higher Education addresses topics critical to the future of higher education the wellbeing of communities engagement of scholars supporting new generations of social activists and the renewal and expansion of educational and career pathways It develops a theory of co learning that engages students and professors across generations in partnerships with community organizations schools and corporations that solve emerging social and environmental challenges Collaboratively written cases discuss community projects engaging pedagogies and action research projects These co cases demonstrate the power of using critical pedagogies and social action within troubling contexts rather than assuming public policy changes are the only solution Contributors explore mentoring discuss pedagogies that promote community wellbeing and equity address the urgency of change in universities and reflect on the implications of this chaotic period for empowering social agency among youth in rising generations This is a timely volume for scholars and students in higher education and educational policy

**Higher Education** Joseph J. Eglin, Jr., Charles M. Novak, Charles H. Shervey, 1997-02 Paying for a college education even at public four year colleges universities now ranks as one of the most costly investments for American families This report discusses the increase in college tuition related fees at four year public colleges universities from school year 1980 95 schools expenditures over the same period Also discusses variations in tuition charges among states in school year 1995 96 initiatives that some states colleges have undertaken to hold down tuition increases make paying for college easier

The Journal of Student Financial Aid, 1997

*Privatization and Public Universities* Douglas M. Priest, Edward P. St. John, 2006 A timely book on an important subject for the future of higher education in America

**Detroit School Reform in Comparative Contexts** Edward St. John, Feven Girmay, 2019-07-08 This book critically examines how the narrative of global economic competition was used to rationalize college preparatory curriculum for all high school students and promote charter schools in Detroit Using mixed qualitative and quantitative methods the study identifies neighborhood risk factors undermining students academic success along with the positive effects of churches and service centers as mitigating forces The authors focus on a range of topics and issues including market competition

urban decline community resources testing and accountability smaller schools and engaged learning The volume illustrates how action studies by engaged scholars working with community activists empowers students to overcome emerging barriers
