politics   China's Regions in an Era of Globalization Tim Summers,2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China s regions This book responds to this challenge by looking at the development of China s regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China s regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China s political economy and international relations   Hainan - State, Society, and Business in a Chinese Province Kjeld Erik Brødsgaard,2008-08-27 This book examines the complex relationship between the state society and business in China focusing on the experience of the island province of Hainan It provides detailed evidence of how relations between party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today   China's Provinces and the Belt and Road Initiative Dominik Mierzejewski,2021-03-29 This book discusses the Belt and Road Initiative at the provincial level in China It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China s economy in 1978 showing how the provinces initially competed with each other and how the central government was forced to react developing more centralised policies Unlike other books on the Belt and Road Initiative which focus on the international aspects of the initiative this book demonstrates the importance of the Belt and Road in reinforcing China s unitary status and for managing and coordinating development at the local level as well as centre province relations and province to province relations inside China   China's Local Administration Jae Ho Chung,Tao-chiu Lam,2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level whereas local government which has played and continues to play a key role in these developments is often overlooked The themes of China s local administrative hierarchy and its historical evolution have until now received scant attention this book fills that gap and presents a comprehensive survey of China s local administration from the province down to the township It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China the province the centrally administered municipality the ethnic minority autonomous region the special administrative region the deputy provincial city the prefecture the county township and urban district It investigates how each of the different levels of China s local administration has developed historically both before and after 1949 and it explores the functions political and economic that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time It also discusses how far the post Mao reforms have

affected local administration and how the local administrative hierarchy is likely to develop going forward **Building New China, Colonizing Kokonor** Gregory Rohlf,2016-03-04 Building New China Colonizing Kokonor Resettlement to Amdo and Qinghai in the 1950s examines rural resettlement to the Sino Tibetan cultural borderlands in the 1950s More than 100 000 eastern Han and Hui Chinese were sent to Qinghai province known in Mongolian as Kokonor and Amdo to Tibetans to plow up new fields in areas that were being incorporated into the Chinese state for the first time The settlers were to bring their skilled labor literacy and modern thinking to backward Qinghai to fully exploit its natural resources of oil natural gas gold and empty lands for the benefit of the industrializing nation The book is a social and political history of resettlement focusing on the people who were moved and the overall impact the program had on the province It is a frontier history but it also narrates a story of state building in modern China that spans the twentieth century and the opening years of the twenty first

workforce By analyzing information on these women s personal experiences careers and families this book investigates their status at work and at home as well as their connections with local politics The research results suggest that although traces of gender inequality can still be found in these women s lives they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities This book will be of interest to students and scholars of Chinese Studies Chinese Business Chinese Economics and Asian Studies Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University Australia

urban ideology in China How to contextualize it Are debates about the differentiation between the city and urbanization relevant to China Fourth massive rural urban migration in China has taken place within its mega rural urban dual system an institution that has persisted since the 1950s How does it manifest nowadays Fifth has the town country divide in China like in the West disappeared If not how can one interpret China s town country relations within the politics and administration of the Chinese state Sixth how to decipher the territorial development in the Pearl River Delta the world s factory under the auspices of the state The collection of essays in this volume contributes to the theoretical understanding of urban China The chapters in this book were originally published in the Eurasian Geography and Economics   **Autonomy, Self-governance and Conflict Resolution** Marc Weller,Stefan Wolff,2005 Conflicts over the rights of self defined population groups to determine their own destiny within the boundaries of existing states are among the most violent forms of inter communal conflict Many experts agree that autonomy regimes are a useful framework within which competing claims to self determination can be accommodated This volume explores and analyses the different options available The contributors assess the current state of the theory and practice of institutional design for the settlement of self determination conflicts and also compare and contrast detailed case studies on autonomous regimes in the former Yugoslavia the Crimea land Northern Ireland Latin America Indonesia and Vietnam   **Small Works** John A. Donaldson,2011-08-15 How can policymakers effectively reduce poverty Most mainstream economists advocate promoting economic growth on the grounds that it generally reduces poverty while bringing other economic benefits However this dominant hypothesis offers few alternatives for economies that are unable to grow or in places where economic growth fails to reduce or actually exacerbates poverty In Small Works John A Donaldson draws on his extensive fieldwork in two Chinese provinces Yunnan and Guizhou that are exceptions to the purported relationship between economic growth and poverty reduction In Yunnan an outward oriented developmental state one that focuses on large scale urban development has largely failed to reduce poverty even though it succeeded in stimulating economic growth Provincial policy shaped roads tourism and mining in ways that often precluded participation by poor people By contrast Guizhou is a micro oriented state one that promotes small scale low skill economic opportunities and so reduces poverty despite slow economic growth It is no coincidence that this Guizhou approach parallels the ideas encapsulated in the scientific development view of China s current president Hu Jintao After all Hu when Guizhou s leader helped establish the micro oriented state in the province Donaldson s conclusions have implications for our understanding of development and poverty reduction economic change in China and the thinking behind China s policy decisions   **Telemodernities** Tania Lewis,Fran Martin,Wanning Sun,2016-09-09 Yoga gurus on lifestyle cable channels targeting time pressured Indian urbanites Chinese dating shows promoting competitive individualism Taiwanese domestic makeover formats combining feng shui with life planning advice Asian TV screens are increasingly home to a wild proliferation of popular factual programs providing lifestyle guidance to viewers In Telemodernities Tania Lewis
