**Energy Security in Japan** Vlado

Vivoda,2016-04-29 For a country already uneasy about energy security the 2011 earthquake and tsunami which caused a nuclear catastrophe at the Fukushima nuclear power plant turned pre existing Japanese concern about the availability of energy into outright anxiety The subsequent closure of many nuclear reactors meant Japan needed to replace lost power quickly and so had no choice but to secure additional fossil fuels undermining Japanese diversification policy and increasing global and regional competition for energy This switch has been at a cost to the already weak Japanese economy whilst the increase in fossil fuel consumption has caused a significant increase in greenhouse gas emissions In this book Vlado Vivoda examines the drastically changed environment following the disaster in order to analyse Japan s energy security challenges and evaluate Tokyo s energy policy options Looking at how the disaster exacerbated Japan s existing energy security challenges Vivoda considers the best policy options for Japan to enhance national energy security in the future exploring the main impediments to change and how they might be overcome *Energy Security Cooperation in Northeast Asia* Bo Kong,Jae Ku,2015-04-24 Drawing on cutting edge research from leading scholars this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia s energy domain defined as the geographical area comprising the following countries Russia Mongolia China Japan South Korea and North Korea It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia The book analyses the factors that shape each country s fundamental energy interests in the region how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement Based on countries interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation the collection assesses each state s role in contributing to an energy regime in Northeast Asia It then concludes with a critique on the decade plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation This book will be of great interest to scholars and students of environmental policy energy policy security studies Asian studies and international relations *Achieving Energy Security In Asia: Diversification, Integration And Policy Implications* Farhad Taghizadeh-hesary,Naoyuki Yoshino,Youngho Chang,Aladdin Rillo,2019-09-24 This book presents a critical review of the status of energy security in Asia and suggests how a country or a region collectively can achieve energy security in two broad aspects First it analyzes how regional cooperation and energy trade can enhance energy security in the region Second it reviews how energy security can be ensured in national and regional general contexts From the reviews and analyses this book asserts that diversification and integration are key to ensuring energy security It presents policy implications for enhancing energy security especially in resource rich as well as resource poor developing countries in Asia [International Handbook of Energy Security](#) Hugh Dyer,Maria Julia Trombetta,2013-01-01 This Handbook should be consulted by anybody interested in the issue of energy security It convincingly demonstrates why the

provision of energy is such a contentious issue addressing the complex interaction of economic social environmental technical and political aspects involved The book is particularly valuable in investigating and highlighting processes in which inter national actors apply this variety of aspects in re constructing their notion of energy security its particular meaning and the implications thereof Such understanding of energy security is helpful Aad F Correlj Delft University of Technology The Netherlands Energy security has for long been treated as an issue of pure geopolitics Hugh Dyer and Maria Julia Trombetta aim at broadening energy security debates and extend them to new agendas Their excellent Handbook offers a fresh perspective on four crucial dimensions supply demand environment and human security A diverse group of international energy scholars provides for an in depth and comprehensive analysis of key contemporary energy problems ranging from an oil producers perspectives on energy security to ethical dimensions of renewable energy and climate governance Andreas Goldthau Central European University Hungary This Handbook brings together energy security experts to explore the implications of framing the energy debate in security terms both in respect of the governance of energy systems and the practices associated with energy security The contributors expertly review and analyse the key aspects and research issues in the emerging field of energy security test the current state of knowledge and provide suggestions for reflection and further analysis This involves providing an account of the multiplicity of discourses and meanings of energy security and contextualizing them They also suggest a rewriting of energy security discourses and their representation in purely economic terms This volume examines energy security and its conceptual and practical challenges from the perspectives of security of supply security of demand environmental change and human security It will prove essential for students in the fields of global international and national politics of energy economics and society as well as engineering It will also appeal to policy practitioners and anybody interested in keeping the lights on avoiding climate change and providing a secure future for humanity

**Energy, Wealth and Governance in the Caucasus and Central Asia** Richard Auty, Indra de Soysa, 2006-08-21 Drawing upon recent progress in development economics and political science the book provides fresh analysis of the Caucasus and Central Asia CCA countries transition to a market economy by tracing the impact of natural resource endowment The book examines the synergies between energy rich and energy poor states and highlights the practical consequences of both well managed and poorly managed deployment of energy Featuring contributions from prominent specialists on resource driven economies the book argues that unless CCA elites change the way in which they deploy natural resource revenues regional development will fall short of its potential with possible disastrous consequences The contributors apply the experience of the developing market economies to demonstrate that the region still holds considerable potential to become an important stable supplier of raw materials and a source of industrial demand to the global economy However the CCA is equally likely to become a threat to the global economy as a consequence of the misuse of energy revenues to promote the interests of predatory political elites Russia as an Aspiring Great Power in East Asia P.

Rangsimaporn,2009-08-27 Rangsimaporn argues that Russia aspires to become a great power and tries to achieve this through utilizing its position as a Eurasian country with vast territories in East Asia its economic assets primarily arms and energy and careful management of its role in a multipolar East Asia with a complex balance of power     Japan's Security Agenda Christopher W. Hughes,2004 Long constrained as a security actor by constitutional as well as external factors Japan now increasingly is called to play a greater role in stabilizing both the Asia Pacific region and the entire international system Japan s Security Agenda explores the country s diplomatic political military and economic concerns and policies within this new context     **Power Struggles** Se Hyun Ahn,2022-10-03 This book explores East Asia s and the Asia Pacific s energy security exploring key issues including major trans border energy projects major country s energy mix policy trans border pipelines LNG transfer between nations balance of power relations between major powers the North Korean energy situation energy alliances Belt and Road Initiative Indo Pacific Strategy World Choke point and more In particular this book provides the detailed analysis of the current problems of energy security and diplomacy among various countries as well as policy implications It will clearly serve as a manual to enhance energy security in the region and boost energy transaction as well as the pioneering step to conceptualize the notion of energy security among political circles in the diplomatic community and energy industry as well as international relations academics     Transnational Trajectories in East Asia Yasemin Nuhoğlu Soysal,2014-11-20 In recent decades East Asia has become increasingly interconnected through trade investment migration and popular culture at regional and global levels At the same time the region has seen renewed national assertiveness and nationalist impulses The book interrogates these seemingly contradictory developments as they bear on the transformations of the nation and citizenship in East Asia Conventionally studies on East Asia juxtapose these developments focusing on the much exercised dichotomy of the national and transnational In contrast this book suggests a different orientation First it moves beyond the simplistic view that demarcates the transnational as the West Second it does not view the national and transnational as distinct or contradictory spheres of influence and analysis but rather focuses on the interactions between the two with a view on how these interactions work to transform the ideals and practices of the good nation good society and good citizen The chapters cover a broad range of empirical research education science immigration multicultural policy human rights gender and youth orientations art and food flows politics of values and regional identity which highlight the ways in which the nation is reconfigured and the relationship between the citizen and national collective is redefined in relation to transnational dynamics and frameworks Transnational Trajectories in East Asia provides a new perspective on and original analysis of transnational processes bringing a fresh understanding to developments of the nation and citizenship in the region It will be of great interest to students and scholars of transnationalization and globalization comparative citizenship migration and multiculturalism and Asian politics society and regionalism     **Energy Security and the Indian Ocean Region** Dennis Rumley,Sanjay Chaturvedi,2015-07-24 First published in 2005 this book is the second volume

produced by the Indian Ocean Research Group IORG The Indian Ocean Region has become increasingly important to discussions on energy security not only because of the critical importance of regional states as energy suppliers but also because of the essential role of the Ocean as an energy route The main purpose of this volume is to provide an elaborate and critical evaluation of some of these issues and their implications for regions outside the Indian Ocean *Singapore 2065: Leading Insights On Economy And Environment From 50 Singapore Icons And Beyond* Euston Quah, 2015-07-30 As Singapore enters its 50th year of independence it is a time for introspection to look back at the successes and challenges of the past but is also a crucial time to consider what the future holds for the nation Singapore 2065 Leading Insights on Economy and Environment from 50 Singapore Icons and Beyond is one such key contribution to the endeavour of thinking about what lies ahead While many forthcoming projects and books take a more retrospective approach reflecting upon Singapore's past this book adopts a forward looking perspective contemplating Singapore's distant future which is important for posterity This book is a collection of key insights from 50 iconic individuals of Singapore and beyond and contains reasoned arguments speculations and visionary expectations of Singapore's future in 50 years time The book discusses the distant future of Singapore's economy and the environment What will Singapore's economic and environment landscape be like 50 years from now Are there trends or scenarios common to the various discussions contained in this book If there are how big would be the impact of some of these trends What and how should the government respond to these projections expectations and informed visions of tomorrow In sum what would Singapore's economy and environment be like in 2065 The book explores a range of possible answers to these questions and more Not only will the generations of today be able to gain much insight into Singapore's future by reading this book but future generations specifically 100 years after Singapore's independence will be able to understand and affirm what and how today's generations think about their time The book is a key contribution to envisioning Singapore's future which is also vital for understanding what shapes Singapore's landscape today [Policing Northeast Asia](#) Se Hyun Ahn, 2020-06-02 This book explores the progress in and the obstacles surrounding developing comprehensive security cooperation between Russia and South Korea since diplomatic relations were established in 1991 within the framework of economic security The book focuses on oil and natural gas projects linking the Trans Siberian and Trans Korean Railroads industrial development in the Nakhodka Free Economic Zone fishery cooperation and the arms trade and examines whether these five aspects of cooperation serve to contribute to building Russian South Korean bilateral and regional economic security The author argues that these five aspects of cooperation all have the potential to enhance comprehensive bilateral security and further regional economic security in Northeast Asia However Russian South Korean economic cooperation has been hampered by a number of obstacles including domestic factors as well as external factors and prevented Russia and South Korea from fulfilling their potential for creating a cooperative comprehensive security relationship The author concludes with an assessment on the utility of the concept of multi dimensional security cooperation

as a framework for studying and improving the prospects for Russian South Korean bilateral relations
