Rethinking Multicultural Education Case Studies In Cultural Transition:

Rethinking Multicultural Education Carol Korn-Bursztyn, Alberto M. Bursztyn Ph.D., 2002-03-30 Korn and Bursztyn and their contributors examine the cultural transitions that children make as they move between the cultures of home and school To better understand these transitions they explore how educators understand their students shifting experiences and examine how educators also negotiate transitions as they too move from home to school each day The narratives or case studies reflect this shifting gaze from child to teacher to parents and take up the various relational configurations that these can form amongst and between each other They turn a critical eye toward instances of classroom practice and school life connecting personal knowledge with school change In some cases the authors draw directly on autobiographical material linking these to a reflective approach to teaching Avoiding the celebratory tone that often attends discussions of multiculturalism the authors address how diversity engages us in continual renegotiation of the personal and social The perspectives of educators and of teacher candidates are presented and the construction of cultural identity and its impact on schools explored In illuminating the complicated nature of cultural transitions and the obligation of schools to create places in which children and families of diverse backgrounds can thrive they highlight how multiculturalism can play a transformative role in the lives of children and schools A must reading for educators and graduate students in education school psychology guidance and counseling

The Native Speaker Concept Neriko Musha Doerr,2009-12-22 The native speaker is often thought of as an ideal language user with a complete and possibly innate competence in the language which is perceived as being bounded and fixed to a homogeneous speech community and linked to a nation state Despite recent works that challenge its empirical accuracy and theoretical utility the notion of the native speaker is still prevalent today The Native Speaker Concept shifts the analytical focus from the second language acquisition processes and teaching practices to daily interactions situated in wider sociocultural and political contexts marked by increased global movements of people and multilingual situations Using an ethnographic approach the volume critically elucidates the political nature of not claiming the native speaker status in daily life and the ways the ideology of native speaker intersects and articulates supports subverts or complicates various relations of dominance and regimes of standardization The book offers cases from diverse settings including classrooms in Japan a coffee shop in

Barcelona secondary schools in South Africa a backyard in Rapa Nui Easter Island restaurant kitchens a high school administrator's office a college classroom in the United States and the Internet It also offers a genealogy of the notion of the native speaker from the time of the Roman Empire Employing linguistic anthropological and educational theories the volume speaks not only to the analyses of language use and language policy planning and teaching but also to the investigation of wider effects of language ideology on relations of dominance and institutional and discursive practices Encyclopedia of Race and Ethnic Studies Ellis Cashmore, 2004-03 The book comprises essays each highlighting a particular word or term germane to the study of race and ethnic studies **MultiCultural Review**, 2002 Handbook of Multicultural School Psychology Emilia C.
