Rethinking Nationalism Jonathan S. Hearn, 2020-06-29 This is an innovative and interdisciplinary introduction to the study of nationalism The author uses paired chapters first to present the work of key authors in relation to each of a set of key themes primordialism modernism power and culture and then critically to rethink these core concepts **Rethinking Nationalism** Jocelyne Couture, Kai Nielsen, Michel Seymour, 1998 In the last two decades nationalism has become a multiform and complex phenomenon which no longer seems to correspond to the accounts given previously by sociologists political scientists and anthropologists Students of nationalism now face the daunting task of renewing their subject matter This formidable volume of seventeen essays and an extensive Introduction and Afterword by the very capable editors contains some of the most innovative samples of present reflection on this contentious subject Moreover contributions are from a variety of disciplines from different parts of the world often reflecting very different ways of thinking about nationalism and sometimes reflecting very different methodologies substantive beliefs and underlying interests

Mills,2014-12-01 Most scholarship has attributed Sudanese independence in 1956 to British dominance of the Condominium historical animosity toward Egypt or the emergence of Sudanese nationalism Dividing the Nile counters that

Egyptian entrepreneurs failed to develop a united economy or shared economic interests guaranteeing Egypt's loss of the Sudan. It argues that British dominance of the Condominium may have stymied initial Egyptian efforts but that after the First World War Egypt became increasingly interested in and capable of economic ventures in the Sudan. However, early Egyptian financial assistance and the seemingly successful resolution of Nile waters disputes actually divided the regions while later concerted efforts to promote commerce and acquire Sudanese lands failed dismally. Egyptian nationalists simply missed opportunities of aligning their economic future with that of their Sudanese brethren resulting in a divided Nile valley. Dividing the Nile will appeal to historians, social scientists and international relations theorists among those interested in Nile valley developments but its focused economic analysis will also contribute to broader scholarship on nationalism and nationalist theory.

Polemical Austria Anthony Bushell, 2013-06-15 Austria today offers the picture of a small neutral and economically successful country in the heart of Europe. Yet modern Austria is the product of a complex and violent history. After the First World War Vienna changed overnight from being the capital of a large continental and multi-ethnic Empire to being an alpine Republic surrounded by larger states. This study examines Austria's transition from a major power and multi-ethnic Empire to a militarily marginalised alpine Republic and asks how those often sudden and violent changes including two world wars and one civil war in the twentieth century have been reflected in the way Austrians have perceived themselves. Whilst many studies map out the political events, this study places special emphasis on the language used by Austrians as they struggled to define themselves.

Law and Identity in Mandate Palestine Assaf Likhovski, 2006 One of the major questions facing the world today is the role of law in shaping identity and in balancing tradition with modernity. In an arid corner of the Mediterranean region in the first decades of the twentieth century, Mandate Palestine was confronted.

A Century of Arab Politics Bruce Maddy-Weitzman, 2015-12-16 From the Great Arab Revolt against Ottoman rule in World War I to the upheavals of the Arab Spring, this text analyzes a century of modern Arab history through the lens of three intertwined notions: the idea of a single Arab nation, the reality of multiple Arab states and the competition between them over both concrete and symbolic interests. These concepts are presented against the background of Great Power involvement in the region, regional issues such as the Arab-Israeli conflict and the Iran-Iraq war and the rise of political Islam. The evolution of regional Arab politics is examined from its infancy at the beginning of the 20th century to the profound challenges posed by the upheavals of the Arab Spring and through the emergence of multiple Arab states organized under the League of Arab States, the pan-Arab heyday of Gamal Abdel Nasser between 1955 and 1967 and the subsequent consolidation of a multi-polar Arab state system. This history

highlights the changing nature of modern Arab identity the achievements and shortcomings of Arab state formation processes and the influence of enduring communal tribal religious and ethnic identities on the modern Arab order Altogether these factors help explain contemporary Arab realities and why the Arab nationalist dream of achieving power and prosperity in line with an idealized image of the past has proven elusive This failure in turn has fueled both the recent upheavals and limited the prospects for successful outcomes This broad and readable synthesis covers the political economic social and cultural history of the Arab region By reexamining what being Arab means today politically and culturally it will be a valuable text to students seeking to understand the modern Middle East **World Class** William Gaudelli, 2014-04-04 Reports on and analyzes how teachers and students in three high schools have engaged in global education Intended to help social studies educators reflect on their own thinking and practice
