Rethinking The Labor Process:

Rethinking the Labor Process Mark Wardell, Thomas L. Steiger, Peter Meiksins, 1999-09-09 This diverse collection rethinks and reinvigorates the field of labor process

Bodies in Revolt Ruth O'Brien, 2013-08-21 Bodies in Revolt argues that the Americans with Disabilities Act ADA could humanize capitalism by turning employers into care givers creating an ethic of care in the workplace Unlike other feminists Ruth O'Brien bases her ethics not on benevolence but rather on self preservation She relies on Deleuze's and Guattari's interpretation of Spinoza and Foucault's conception of corporeal resistance to show how a workplace ethic that is neither communitarian nor individualistic can be based upon the rallying cry one for all and all for one

Working Life Paul Thompson, Chris Smith, 2017-09-16 Labour process theory is consolidated in Working Life to develop a credible account of the relationships between capitalist political economy work systems and the strategies and practices of actors in the employment relationship Beyond this the book explores the future of labour process analysis

Class Acts Rachel Sherman, 2007-01-17 In this lively study Rachel Sherman goes behind the scenes in two urban luxury hotels to give a nuanced picture of the workers who care for and cater to wealthy guests by providing seemingly unlimited personal attention Drawing on in depth interviews and extended ethnographic research in a range of hotel jobs including concierge bellperson and housekeeper Sherman gives an insightful analysis of what exactly luxury service consists of how managers organize its production and how workers and guests negotiate the inequality between them She finds that workers employ a variety of practices to assert a powerful sense of self including playing games comparing themselves to other workers and guests and forming meaningful and reciprocal relations with guests Through their contact with hotel staff guests learn how to behave in the luxury environment and come to see themselves as deserving of luxury consumption These practices Sherman argues help make class inequality seem normal something to be taken for granted Throughout Class Acts sheds new light on the complex relationship between class and service work an increasingly relevant topic in light of the growing economic inequality in the United States that underlies luxury consumption

State Work Stefano Harney, 2002-07-02 This is a case study of ways that labor is organized by public administration to produce state effects

Critical Perspectives on Activity Peter Sawchuk, Newton Duarte, Mohamed Elhammoumi, 2006-01-16 The last two decades have seen an international explosion of interest in theories of mind culture and activity This unique collection is the first to explicitly reach back to the tradition's original critical impulse within which the writings of Karl Marx played such a central role Each author pushes this

impulse further to address leading contemporary questions It includes a diverse array of international scholars working from the fields of education psychology philosophy sociology anthropology communications industrial relations and business studies Broken into three main sections education work and everyday life each chapter builds from an analysis of practice and learning as social cultural participation and historical change in relation to the concept of activity contradiction and struggle This book offers insight into an important complex of overlapping practices and institutions to shed light on broader debates over such matters as the knowledge economy and lifelong learning Ethnography Unbound Stephen Gilbert Brown, Sidney I. Dobrin, 2012-02-01 These provocative new essays redefine the goals methods and assumptions of qualitative and ethnographic research in composition studies making evident not only the crucial importance of ethnographic research but also its resilience As *Ethnography Unbound* makes evident critical ethnographers are retheorizing their methodologies in ways that both redefine ethnographic practices and values and at the same time have begun to liberate ethnographic practices from the often disabling stronghold of postmodern critique Showing how ethnography works through dialogic processes and moves toward political ends this collection opens the doors to rethinking ethnographic research in composition studies *Critical Study Of Work* Rick Baldoz, Charles Koeber, Philip Kraft, 2001-05-14 These essays challenge the celebration of globalization and new technologies while trying to make sense of fluid work relations and uncertain employment The authors highlight themes like race technology and geography while constructing a critical study of work and the workplace *Touching Encounters* Kevin Walby, 2012-09-15 Often depicted as deviant or pathological by public health researchers psychoanalysts and sexologists male with male sex and sex work is in fact an increasingly mainstream pursuit Based on a qualitative investigation of the practices involved in male with male or m4m Internet escorting *Touching Encounters* is the first book to explicitly address how masculinity and sexuality shape male commercial sex in this era of Internet communications By looking closely at the sex and work of male escorts Kevin Walby tries to reconcile the two extremes of m4m sex the stereotypical idea of a quick cash transaction and the tendency toward friendship and mutuality In doing so Walby draws on the work of Foucault to make visible the play of power in these physical and commercial relations between men At once a revelation to the sociology of work and a much needed critical engagement with queer theory *Touching Encounters* responds to calls from across the social sciences to connect Foucault with sociologies of sex sexuality and intimacy Walby does this and more retying this sexual practice back to society at large **Revolutionaries to Race Leaders** Cedric Johnson, The Black Power movement represented a key turning point in American politics Disenchanted by the hollow progress of federal desegregation during the 1960s many black citizens and leaders across the United States demanded meaningful self determination The popular movement they created was marked by a vigorous artistic renaissance militant political action and fierce ideological debate Exploring the major political and intellectual currents from the Black Power era to the present Cedric Johnson reveals how black political life gradually conformed to liberal democratic capitalism

and how the movement's most radical aims the rejection of white aesthetic standards redefinition of black identity solidarity with the Third World and anticapitalist revolution were gradually eclipsed by more moderate aspirations Although Black Power activists transformed the face of American government Johnson contends that the evolution of the movement as a form of ethnic politics restricted the struggle for social justice to the world of formal politics Johnson offers a compelling and theoretically sophisticated critique of the rhetoric and strategies that emerged in this period Drawing on extensive archival research he reinterprets the place of key intellectual figures such as Harold Cruse and Amiri Baraka and influential organizations including the African Liberation Support Committee the National Black Political Assembly and the National Black Independent Political Party in postsegregation black politics while at the same time identifying the contradictions of Black Power radicalism itself Documenting the historical retreat from radical democratic struggle Revolutionaries to Race Leaders ultimately calls for the renewal of popular struggle and class conscious politics Cedric Johnson is assistant professor of political science at Hobart and William Smith Colleges

Managerial Control of American Workers Mel van Elteren, 2017-03-13 Today surveillance and regulation of employees are pervasive at all levels except the highest in a wide variety of American workplaces Digital information systems have become important tools of managerial control The constraints built into these systems by so called business process reengineering are a continuation of scientific management principles developed during the late 19th century Additional means of control have included employment based welfare capitalism and human relations and corporate culture approaches This book provides fresh insight into various practices of managerial control from the 1880s to the present and their effects on work organization and quality and worker skill requirements The author highlights current developments including those focused on highly skilled knowledge workers accounting for enhanced automation offshoring and related changes in the production and distribution of goods and services

Tipping Point for Advanced Capitalism D.W. Livingstone, 2023-09-07T00:00:00Z Tipping Point for Advanced Capitalism is a pathbreaking study of the changing class makeup of the Canadian other G7 and Nordic labour forces since the 1980s documenting especially the rise of non managerial professional employees The book provides unprecedented tracking of the links between employment classes and higher levels of class consciousness including the often hidden political consciousness of corporate capitalists as well as the extent of oppositional and revolutionary consciousness among non managerial workers The large differences exposed between class conscious capitalists and these non managerial workers on issues of poverty reduction and global warming reveal the strategic roles these key class agents play in actions to defend or transform advanced capitalism The most concerted evidence based study to bring class back into grasping the intimately linked ecological economic and political crises we now face
