Tradition-Based Natural Resource Management Edward W. Glazier, 2019-05-10 This book addresses the complex socio political context of natural resource management in coastal and marine environments throughout the contemporary Pacific Islands and provides lessons that can be applied around the globe The author spotlights one particular case in which Native Hawaiians worked successfully to develop a formal policy mechanism through which to advise government agencies in the State of Hawaii on matters regarding traditional and customary use and management of the island s natural resources Glazier describes historic traditional aspects of natural resource use and management in the Hawaiian Islands and the challenging process that was employed to enhance the capacity of modern Hawaiians to influence the course of their future This process successfully broached and addressed truly difficult challenges including but not limited to the convening of representatives of a complex society of indigenous persons in order to elicit traditional place based knowledge and varying perspectives on the appropriate use and management of natural resources the incorporation of such knowledge and perspectives into the modern natural resource management and policy context and the need to balance the interests of indigenous persons and those of more recently arriving persons around the island chain The lessons learned were many and varied and are particularly germane for resource managers scientists policymakers and indigenous persons seeking to undertake balanced natural resource policy decisions in island coastal and indigenous settings around the Pacific and beyond

Rethinking 'Mixed Race' David Parker, Miri Song, 2001-05-20 One of the fastest growing ethnic populations in many Western societies is that of people of mixed descent However when talking about multicultural societies or mixed race the discussion usually focuses on people of black and white heritage The contributors to this collection rectify this with a broad and pluralistic approach to the experiences of mixed race people in Britain and the USA The contributors argue that people of mixed descent reveal the arbitrary and contested logic of categorisation underpinning racial divisions Falling outside the prevailing definitions of racialised identities their histories and experiences illuminate the complexities of identity formation in the contemporary multicultural context The authors examine a range of issues These include gender transracial and intercountry adoptions in Britain and the US interracial partnering and marriage mixed race and family in the English African diaspora theorising of mixed race that transcends the black white binary and includes explorations of mixtures among non white minority groups and the social and political evolution of multiracial panethnicity

Baigorri-Jalón, 2023-02-22 The aspiration of an Atlas is to cover the whole world by compiling cartographical material representing territories from across the five continents This book intends to contribute to that ideally comprehensive yet always unfinished Atlas with pieces gathered from all of the Earth s regions However its focus is not so much of a geographical nature although maps and geographical reflections are not absent in its pages but of a historical analytical one As such the Atlas engages in the historical analysis of interpreters of both language and cultures in multiple interpreting settings and places including in zones which are less frequently studied in specialized literature in different historical periods and at various scales All the interpreters described in the book share the ability to speak two or more languages and to use them as vehicles otherwise their individual socio professional statuses vary so much that there is no similarity between a Venetian dragoman in Istanbul and a prisoner of war or between a locally recruited interpreter and a missionary Each contributor has approached the specific spatial and temporal dimensions of their subject as perceived through their different methodological lenses This multifaceted perspective which is expected to provide fertile soil for future interdisciplinary research has been possible thanks to a balanced combination of scholars from History and from Translation and Interpreting

Akerman, 2017-06-16 Almost universally newly independent states seek to affirm their independence and identity by making the production of new maps and atlases a

top priority For formerly colonized peoples however this process neither begins nor ends with independence and it is rarely straightforward Mapping their own land is fraught with a fresh set of issues how to define and administer their territories develop their national identity establish their role in the community of nations and more The contributors to Decolonizing the Map explore this complicated relationship between mapping and decolonization while engaging with recent theoretical debates about the nature of decolonization itself These essays originally delivered as the 2010 Kenneth Nebenzahl Jr Lectures in the History of Cartography at the Newberry Library encompass more than two centuries and three continents Latin America Africa and Asia Ranging from the late eighteenth century through the mid twentieth contributors study topics from mapping and national identity in late colonial Mexico to the enduring complications created by the partition of British India and the racialized organization of space in apartheid and post apartheid South Africa A vital contribution to studies of both colonization and cartography Decolonizing the Map is the first book to systematically and comprehensively examine the engagement of mapping in the long and clearly unfinished parallel processes of decolonization and nation building in the modern world
