

RETICULOENDOTHELIAL SYSTEM

Reticuloendothelial system or macrophage system is the system of primitive phagocytic cells, which play important role in defense mechanism of the body.

MACROPHAGE

Macrophage is a large cell derived from monocyte. It has the property of phagocytosis. Therefore, the macrophage is also defined as a large phagocytic cell.

CLASSIFICATION OF RETICULOENDOTHELIAL CELLS

The reticuloendothelial cells are classified into two types:

- Fixed reticuloendothelial cells or tissue macrophages
- Wandering reticuloendothelial cells.

FIXED RETICULOENDOTHELIAL CELLS – TISSUE MACROPHAGES

The fixed reticuloendothelial cells are also called the tissue macrophages or fixed histiocytes because these cells are usually located in the tissues.

The tissue macrophages are:

Intracellular Delivery Aleš Prokop,2011-05-26 This book features a special subsection of Nanomedicine an application of nanotechnology to achieve breakthroughs in healthcare It exploits the improved and often novel physical chemical and biological properties of materials only existent at the nanometer scale As a consequence of small scale nanosystems in most cases are efficiently uptaken by cells and appear to act at the intracellular level Nanotechnology has the potential to improve diagnosis treatment and follow up of diseases and includes targeted drug delivery and regenerative medicine it creates new tools and methods that impact significantly upon existing conservative practices This volume is a collection of authoritative

reviews In the introductory section we define the field intracellular delivery Then the fundamental routes of nanodelivery devices cellular uptake types of delivery devices particularly in terms of localized cellular delivery both for small drug molecules macromolecular drugs and genes at the academic and applied levels are covered The following section is dedicated to enhancing delivery via special targeting motifs followed by the introduction of different types of intracellular nanodelivery devices e g a brief description of their chemistry and ways of producing these different devices Finally we put special emphasis on particular disease states and on other biomedical applications whilst diagnostic and sensing issues are also included Intracellular delivery therapy is a highly topical which will stir great interest Intracellular delivery enables much more efficient drug delivery since the impact on different organelles and sites is intracellular as the drug is not supplied externally within the blood stream There is great potential for targeted delivery with improved localized delivery and efficacy

Nuclear Science Abstracts, 1975 **Manual of Liver Surgery** W.P. Longmire, R.K. Tompkins, 2012-12-06

As research in liver disease has greatly expanded over the past few decades the etiology pathology and natural history of many hepatic disorders have been clearly defined Many new and accurate diagnostic tools are now available In spite of all this progress the treatment of many liver diseases remains ameliorative Nevertheless a more aggressive and successful surgical approach has taken place in regard to many diseases of the liver in part due to the pioneering work of Dr William P Longmire Jr and his colleagues Dr Longmire was among the early advocates of liver resection of neoplasms successfully removing a large benign tumor of the liver in 1946 In the following decades his contributions covered the surgical treatment of trauma tumors cysts and other congenital abnormalities He has performed hundreds of operations on patients with these disorders In 1948 he reported a procedure now named for him in which intractable common duct obstruction was relieved by partial left hepatectomy and cholangiojejunostomy He was one of the first to advocate side to side portacaval shunt for portal hypertension Other essential contributions by this master surgeon were the periodic reviews that covered the advances in his field Dr Longmire with his scholarly approach and broad background of knowledge in all aspects of hepatic surgery is exceptionally qualified to write this book He and his colleague Dr Ronald K Tompkins are to be congratulated on this complete treatise
