based on distinctive histories and climates Harry Margalit explores the flowering of these many architectural variants from the bid to create a model city in Canberra through the stylistic battles that opened a space for modernism to the idealism of postwar reconstruction and beyond to the new millennium Australia reveals a vibrant and influential culture of the built environment at its best when it matches civic idealism with the sensuality of a country of stunning light and landscapes

Practical Poetics in Architecture Leon van Schaik, 2015-04-29 Integrate poetics into real world spaces by bringing theory down to earth Practical Poetics in Architecture takes poetics out of the theory class and into the design studio showing architects how the atmospheric and experiential qualities of built structures can be intentionally considered and planned With an emphasis on analysing and explaining the sensibility of poetics at work in designing and constructing architecture this book features projects from architects around the world that demonstrate the principles of poetics come to life The rich illustration of two hundred colour images including analytical diagrams plans sections and photos make this insightful guide a highly visual foray into a topic that has thus far remained more theoretical than practical The text is matter of fact and concrete yet remains richly connected to its forbears and the writings of William Lethaby Gaston Bachelard and Steen Eiler Rasmussen The perspective is contemporary in its examples and its connections to the evolving science of perception An established seminar topic in theory classes around the world poetics tends to rely

heavily on classic philosophic texts until now Practical Poetics in Architecture brings theory down to earth to show architects how to invoke poetics when designing real projects Integrate poetics principles into real world designs Consider atmosphere in terms of form space and acoustics Study actual projects that bring poetics into real spaces Take cues from analytical diagrams of projects accounting for context Poetics the accumulated experience of place space and culture has become more critical in recent years as the atmospheric and experiential qualities of built spaces have become more elusive in the virtual age Practical Poetics in Architecture provides real guidance for real projects and brings poetics out of the mind and onto the plans

Living the Modern Claudia Perren, Kristien Ring, 2007 Since the nineteen fifties a unique form of modern architecture has been developing in Australia a progressive modernism which involves the dynamic combination of tradition and transformation This catalogue accompanies the exhibition Living the Modern_Australian Architecture and analyzes this culture and environment specific architecture using its residential constructions as a basis for examination The scope of the book extends from detached family houses to high rise buildings Examples of early design from the post war period are explored in an introductory overview but the focus of the publication is directed towards a diverse mix of twenty five Australian architects For the last fifteen years they have been applying interpreting or reworking modernist approaches but despite fame in their homeland their outstanding and refreshing productions remain largely unheard of in Europe Including texts by Richard Blythe Philip Drew Philip Goad Gevork Hartoonian Tom Heneghan Hannah Lewi Elizabeth Musgrave Stephen Neille Claudia Perren Kristien Ring and Peter Wilson Book jacket

Architecture in Dialogue with an Activated Ground Urs Bette, 2020-03-30 Architecture in Dialogue with an Activated Ground sets out to validate the role of the unreasonable in the design process Using case study projects architect Urs Bette gives an insight into the epistemological processes of his creative practice and unveils the strategies he deploys in order to facilitate the poetic aspects of architecture within a discourse whose evaluation parameters predominantly involve reason Themes discussed include the emergence of space from the staged opposition between the architectural object and the site and the relationship

between emotive cognition and analytic synthesis in the design act In both cases there is a necessary engagement with forms of unreasonable thought action or behaviours By arguing for the usefulness and validity of the unreasonable in architecture and by investigating the performative relationship between object and ground Bette contributes to the discourse on extensions growth and urban densification that tap into local histories and voices including those of the seemingly inanimate the architecture itself and the ground it sits upon to inform the site related production of architectural character and space In doing so he raises debates about the values pursued in design approval processes and the ways in which site relatedness is both produced and judged **Sean Godsell** ,2000* The New Modern House Will Jones,2005-04-07 Every architect dreams of a perfect client and every client dreams of a perfect architect Alas these relationships don t always work out to everyones expectations But when they do when there are shared ideas and the communication flows the results can be spectacular The New Modern House features forty new buildings where the synergy between the right designer and the right client resulted in works that surpass everyone s expectations The book is divided into five thematic chapters conditions materials environment budget and aesthetics and each contain eight case studies These include Rafael Violy s Piano House in New York Sean Godsell s Peninsula House in Australia and Ahadu Abaineh s Tree House in Ethiopia among others Beautifully produced The New Modern House captures these noteworthy designs with a wealth of color photography plans and drawings and makes an ideal book for anybody dreaming of the perfect house **Spatial Intelligence** Leon Van Schaik,2008-10-20 The book is organised into three distinct sections that in turn highlight the significance of spatial intelligence for architecture the first section provides an overview of spatial intelligence as a human capability the second section argues how the acknowledgement of this capability in architectural education and the profession should enable the demystification of the practice of design forming the basis of a more democratic interface between society and practice the final section explores exciting new opportunities for practice in the linking of real and virtual environments in the information age Inflection 06: Originals Sir Peter Cook,Alison Brooks,Beatriz Colomina,Sean Godsell,Adam Peacock,2019-09-16 Architects are expected to create original ideas resulting in a unique bespoke design With the rise of Modern Architecture originality became ingrained in perceptions of good design As a result originality has become a barometer against which we measure the value of design However technology today allows for ease of replication and copies thus originality in design has become an ostensibly hollow prospect Originals gathers a wide range of responses varied in their opinions and approaches to originality and authorship in design and architecture Inflection is a student run design journal based at the Melbourne School of Design University of Melbourne Born from a desire to stimulate debate and generate ideas it advocates the discursive voice of students academics and practitioners Founded in 2013 Inflection is a home for provocative writing a place to share ideas and engage with contemporary discourse *The Architects' Journal* ,2005 *New Directions in Australian Architecture* Philip Goad,Patrick Bingham-Hall,2005 Showcasing the work of 14 of Australia s most exciting architectural firms the text and
