Bottoming Out the Universe Richard Grossinger, 2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth's

own words and Jane Roberts's and John Friedlander's interpretations. He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all, why there is something rather than nothing. Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe, Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency.

Oddball Colorado Jerome Pohlen, 2002. Monuments to all that is bizarre are contained in this guide with location, websites, open hours, cost, and directions included. The Outline of Parapsychology Jesse Hong Xiong, 2009-11-09. This is a work of systematic parapsychology. The book aims to construct a framework and system of parapsychology taking a comprehensive approach to the field. The Outline of Parapsychology states that parapsychology has a different philosophical background from the existing science and religions and posits that pantheism could be the theoretical basis of parapsychology. The book also integrates parapsychology with oriental philosophies and New Age movement thought.

Paul Blaisdell, Monster Maker Randy Palmer, 2015-07-11. Paul Blaisdell was the man behind the monsters in such movies as *The She Creature*, *Invasion of the Saucer Men*, *Not of This Earth*, *It*, *Terror from Beyond Space*, and many others. Working in primarily low-budget films, Blaisdell was forced to rely on greasepaint, guts, and most importantly, an unbounded imagination for his creations. From his inauspicious beginning through *The Ghost of Dragstrip Hollow* (1959), the construction of Blaisdell's monsters and the making of the movies in which they appeared are fully detailed here. Blaisdell's work in the early monster magazines of the 1960s is also covered.

The Psychology and Science of Pseudoscience Terence Hines, 2025-03-12. This book provides a comprehensive review of numerous areas of pseudoscience and related pathological science. It not only describes the factual bases for rejecting pseudoscientific claims but also emphasizes the psychological processes that lead to the acceptance of such claims. This book is timely given the increase in misinformation over the past decade. Using three principles of cognitive psychology, this book helps explain why people are hard-wired to accept and continue to believe in pseudoscientific claims. It provides up-to-date discussions of numerous paranormal and pseudoscientific topics, including the usual suspects: UFOs and alien abductions, astrology, cryptozoology, and more, but also belief in conspiracy theories, laboratory parapsychology, bogus forensic science techniques, the pseudopsychologies of Freud, medical fraud, and the unethical practices of Big Pharma. Older research that was foundational in the critical examination of several topics is woven throughout to situate them in a historical context.

Reincarnation , The Abduction of Betty and Barney Hill Matthew Bowman, 2023-08-29 A gripping account of an alien abduction and its connections to the breakdown of American society in the 1960s Excellent and exhaustive Colin Dickey Slate In the mid 1960s Betty and Barney Hill became famous as the first Americans to claim that aliens had taken them aboard a spacecraft against their will Their story involving a lonely highway late at night lost memories and medical examinations by small gray creatures with large eyes has become the template for nearly every encounter with aliens in American popular culture since Historian Matthew Bowman examines the Hills story not only as a foundational piece of UFO folklore but also as a microcosm of 1960s America The Hills an interracial couple who lived in New Hampshire were civil rights activists supporters of liberal politics and Unitarians But when their story of abduction was repeatedly ignored or discounted by authorities they lost faith in the scientific establishment the American government and the success of the civil rights movement Bowman tells the fascinating story of the Hills as an account of the shifting winds in American politics and culture in the second half of the twentieth century He exposes the promise and fallout of the idealistic reforms of the 1960s and how the myth of political consensus has given way to the cynicism and conspiratorialism and the paranoia and illusion of American life today
